SUMMARY

Arch Reinsurance Europe Underwriting dac ("ARE" or "the Company") is an Irish regulated composite reinsurance entity authorized by the Central Bank of Ireland ('CBI"). The Company's ultimate parent is Arch Capital Group Ltd ("ACGL" or together with its subsidiaries, the "Group" or the "Arch Group"), whose common shares are listed and traded on the NASDAQ stock market LLC in the U.S. The Company is a property and casualty reinsurance underwriting company writing a diversified portfolio, both in terms of product mix and geography, in non-commoditised niche areas primarily.

Business, Strategy & Performance

Gross written premium was €335m which represented a 20% increase to the prior year total of €280m. Although the Company's net underwriting profit for 2017 increased to €13.5m from €1.6m in 2016 pre-tax profits were lower, compared to 2016, primarily due to net investment losses, including realized and unrealized gains and losses, of €15.4m. This compares to net investment returns of €12.0m in 2016 and contributed to a pre-tax profit for the year of €3.2m compared to pre-tax profits of €28.6m for 2016.

The theme described in respect of 2016 remained broadly unchanged in 2017 in what continued to be challenging market conditions with further, albeit moderating in some lines, price erosion experienced in the segments operated in by the Company. Despite the very meaningful catastrophe losses experienced across the market in 2017, which did not affect the Company in a material way, reinsurance capital erosion was limited and did not lead to a market turning event. Capital still appears to be ample in the industry which leads to the market clearing mostly at rates considered as flat on a risk adjusted basis. This means that the downward trend has clearly come to a halt in most of the Company's lines of business. We did see rate increases where there has been a meaningful change in the risk being accepted or following material losses in certain lines. Despite this the strategy of the Company was unchanged with the focus on business that meets its target returns. The Company has been successful in growing the business by leveraging our underwriters' technical abilities whilst applying underwriting discipline.

The Company purchases reinsurance on the business it writes to protect it against adverse performance and to efficiently manage capital. The Company's external reinsurance purchases are in the form of both excess of loss and quota share agreements. In addition, the Company cedes 85% of its net retained premium under a quota share agreement with a related group entity, Arch Reinsurance Ltd, a Bermuda domiciled company with $10.5 billion (2016: $10.5 billion) of capital, comprised of shareholders' equity and debt as at 31 December 2017.

System of governance

The Company maintains an effective system of governance, which provides for sound and prudent management of its integrated operations.

The Company has designed its system of governance to achieve the following:

- Maintain an adequately transparent organizational structure that has well-defined, clear, consistent and documented lines of responsibility across the integrated operations;
- Ensure staff have the skills, knowledge and expertise necessary to properly discharge their assigned responsibilities;

- Establish and maintain processes to achieve effective internal reporting and communication of information at all relevant levels within the integrated operations;
- Maintain information systems that produce sufficient, reliable, consistent, timely and relevant information concerning all business activities, the commitments assumed and the risks to which the integrated operations are exposed;
- Safeguard the security, integrity and confidentiality of information, taking into account the nature of the information in question; and
- Any outsourced responsibilities are delegated and managed appropriately, with ultimate responsibility residing with the Board.

The system of governance is based on the principle of proportionality, such that systems and controls are proportionate to the nature, scale and complexity of the integrated operations. Appropriate and proportionate systems, resources and procedures are in place for the Company's operations.

In this regard, the Board monitors key aspects of the business and is assisted where appropriate by the Risk and Audit Committees of the Board.

It is not deemed appropriate or proportionate, given the scale of the business and the governance structure in place to appoint an Investment Committee, Nomination Committee or a Remuneration Committee. In addition, the Board reviews information that would otherwise be addressed by such committees at its meetings.

The principles and requirements of the system of governance, particularly risk management, internal control, internal audit and outsourcing, are the responsibility of the Board. While retaining these responsibilities, the Board has delegated the authority for day-to-day risk management to ARE's Executive team. The Company's CRO monitors the Risk Management Framework for operating effectiveness and reports to the Risk Committee and Board as appropriate.

The Board has approved formal policies, which are a component of the Company's Governance Structure.

The system of governance is assessed via reviews by the Compliance Officer, together with the Chief Risk Officer ("CRO") and periodic evaluation by Internal Audit. All related findings and/or reports are presented to the Audit Committee and the Board.

Risk Profile

ARE's risk appetite framework provides an expression of the level of risk the Company is willing to accept in pursuit of its strategic objectives. The risk appetite framework provides quantitative and qualitative statements which are used to define the general attitude within the organization towards the desired level of risk. It not only supports the Company's risk management framework, it also enables ARE to make informed business decisions having regard to the key risks to which it may be exposed by such a decision.

In general, ARE has an appetite for insurance (underwriting) risk and a tolerance for other forms of risk. The risk philosophy of ARE encompasses all major risks and focuses on attaining the following business objectives:

- Underwrite business that meets agreed targeted returns
- Underwrite business with selected cedants
- Underwrite only carefully selected business lines
- Manage underwriting volumes in line with the business cycle

- Limit the downside risk such that the Company maintains a sufficient solvency margin.

To meet these objectives and the Company's overall strategy, performance against risk appetites and risk tolerances & limits metrics, as articulated in the Company's Risk Appetite Statement, are monitored by the Risk Function and reported on to the Risk Committee on a quarterly basis with defined escalation process for breaches of these key metrics.

Valuation for Solvency II purposes

The Company prepares its financial statements in accordance with Generally Accepted Accounting Practice ('GAAP') in Ireland comprised of accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and promulgated by the Institute of Chartered Accountants in Ireland and Irish Companies Act 2014.

The Company's Solvency II balance sheet is prepared on an economic or fair value basis. The most significant differences between the Solvency II and the balance sheet on a GAAP basis arise from;

- the valuation of technical provisions and reinsurer's share of technical provisions;
- the valuation of holdings in related undertakings;
- the valuation of insurance and intermediary balances receivable and reinsurance balances payable;
- the valuation of deferred acquisition costs / deferred ceding commissions; and
- the valuation of deferred tax asset / deferred tax liability.

Section D provides a reconciliation between the valuation of assets and liabilities under GAAP and under Solvency II along with further details on valuation for Solvency II purposes.

Capital Management

The Company's Solvency Capital Requirement ("SCR") coverage ratio as at 31 December 2017 was 207% with Own Funds of €446.7m and a Solvency Capital Requirement (SCR) of €215.4m. There were no material changes in SCR during the year. The Company has a strong capital base enabling it to meet its solvency requirements and to facility the level of activity anticipated throughout the planning period and within the Company's Own Risk and Solvency Assessment ("ORSA").

SECTION A – BUSINESS AND PERFORMANCE

A.1 Business

A.1.1 Name and Legal Form of the Undertaking

ARE is incorporated in Ireland as a designated activity company ("dac"). A dac is a corporate form for a private company limited by shares, which activities are limited by its objects clause, and its constitution comprises a memorandum and articles of association. The address of the registered office of the Company is:

Level 2, Block 3, The Oval
160 Shelbourne Road, Ballsbridge
Dublin 4, Ireland

This Solvency and Financial Condition Report ("SFCR") covers ARE on a solo basis.

A.1.2 Insurance Supervisor and Group Supervisor

Insurance Supervisor
Central Bank of Ireland ("CBI")
PO Box 559
Dublin 1, Ireland

Group Supervisor
Bermuda Monetary Authority ("BMA")
BMA House
43 Victoria Street
Hamilton HM 12 Bermuda

A.1.3 External Auditor

PricewaterhouseCoopers
One Spencer Dock
North Wall Quay
Dublin 1, Ireland

A.1.4 Description of the ownership details including proportion of ownership interest

Arch Financial Holdings Europe II Limited, a private company limited by shares and incorporated in Ireland, owns 100% of the equity share capital of the Company.

A.1.5 Group Structure

The Company's ultimate parent and ultimate controlling party is ACGL, a Bermuda public limited liability company. ACGL prepares group financial statements and is the largest group for which group financial statements are drawn up and of which the Company is a member. Copies of the ACGL group financial statements are available on ACGL's website located at www.archcapgroup.com or on the website of the U.S. Securities and Exchange Commission located at www.sec.gov.

An organization chart illustrating ARE's position in the Group is included as Appendix 1.

A.1.6 Material Lines of Business and Geographical areas where business is conducted

The following tables set forth summary information regarding net premiums written, by major business line and geographical region for the year to December 31 2017;

	Gross Written Premium (000 EUR)	
Major Line of Business	**2017**	**2016**
Casualty	90,591	73,681
Other Property	18,702	18,494
Other Specialty	222,722	185,132
Property Cat	2,050	1,331
Marine & Other	516	1,121
Grand Total	**334,580**	**279,759**

	Gross Written Premium (000 EUR)	
Geographic Region	**2017**	**2016**
Europe	243,011	197,930
Asia Pacific	51,522	49,856
Southern & Central America	27,720	14,085
Middle East & Africa	5,723	10,933
North America	4,242	3,995
Other	2,361	2,960
Grand Total	**334,580**	**279,759**

A.1.7 Significant Business or Other Events

No significant business or other events occurred during 2017 that had a material impact on the Company.

A.2 Underwriting Performance

Since the Company prepares its financial statements in accordance with Generally Accepted Accounting Practice in Ireland[1], the underwriting performance information given in this section is on an GAAP (Ireland) basis. The following table summarizes the performance, by major line of business in Euro '000, for the technical account for year ended 31 December 2017;

	Casualty	Other Property	Other Specialty	Property Cat	Marine & Other	Total YTD
	€'000	€'000	€'000	€'000	€'000	€'000
Gross premiums written	**90,591**	**18,702**	**222,722**	**2,050**	**516**	**334,580**
Net premiums written	11,283	2,702	25,681	160	69	39,894
Net premiums earned	**10,556**	**2,552**	**29,224**	**111**	**107**	**42,550**
Other underwriting-related fee income	-	-	(2,376)	-		(2,376)
Net Losses and LAE	**11,471**	**3,499**	**14,994**	**(49)**	**78**	**29,993**
Net Acquisition expenses – GAAP	**(15,197)**	**(1,935)**	**(7,715)**	**(313)**	**115**	**(25,045)**
Other operating expenses - GAAP	5,112	3,352	13,045	116	29	21,655
GAAP underwriting profit (loss)	**9,170**	**(2,364)**	**6,523**	**357**	**(115)**	**13,572**
GAAP net ratios:						
Losses and LAE	**108.66%**	**137.12%**	**51.31%**	**-44.53%**	**72.38%**	**70.49%**
Acquisition expenses	-143.96%	-75.84%	-26.4%	-282.41%	107.25%	-58.86%
Other operating expenses (Incl DKK fee)	48.43%	131.35%	52.77%	104.49%	27.12%	56.48%
Combined ratio	**13.13%**	**192.63%**	**77.68%**	**-222.46%**	**206.76%**	**68.1%**

The equivalent table for year ended 31 December 2016 is provided in the table below;

	Casualty	Other Property	Other Specialty	Property Cat	Marine & Other	Total YTD
	€'000	€'000	€'000	€'000	€'000	€'000
Gross premiums written	**73,681**	**18,494**	**185,132**	**1,331**	**1,121**	**279,759**
Net premiums written	9,220	2,675	23,203	70	157	35,324
Net premiums earned	**9,225**	**2,531**	**22,266**	**111**	**107**	**34,241**
Other underwriting-related fee income	-	-	(2,223)	-		(2,223)
Net Losses and LAE	**7,957**	**954**	**13,669**	**(267)**	**27**	**22,340**
Net Acquisition expenses – GAAP	**(13,406)**	**(2,772)**	**(3,227)**	**(339)**	**(14)**	**(19,759)**
Other operating expenses - GAAP	6,688	4,145	16,789	111	104	27,836
GAAP underwriting profit (loss)	**7,987**	**204**	**(7,188)**	**606**	**(9)**	**1,601**
GAAP net ratios:						
Losses and LAE	**70.94%**	**37.7%**	**61.39%**	**-241.43%**	**25.35%**	**61.12%**
Acquisition expenses	-145.33%	-109.51%	-14.49%	-305.82%	-13.38%	-57.71%
Other operating expenses (Incl DKK fee)	72.49%	163.74%	85.39%	99.9%	96.51%	87.79%
Combined ratio	**-1.89%**	**91.92%**	**132.28%**	**-447.35%**	**108.47%**	**91.2%**

The above table does not include items such as income investment income and realized and unrealized gains and losses including those relating to foreign exchange.

[1] Generally Accepted Accounting Practice in Ireland - accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 the Financial Reporting Standard applicable in the UK and Republic of Ireland and promulgated by the Institute of Chartered Accountants in Ireland and companies Act 2014.

The negative combined ratios in the table above arise due to the commission structure in place in our inter-company quota share agreement with Arch Reinsurance Ltd. ("ARL"). A flat fee commission is paid by ARL to cover costs incurred by the Company in writing the business. The actual expenses on contracts will vary however, leading to some contracts where the commission received is lower than net costs incurred, and other contracts where the commission is higher than the net costs (including losses) incurred. The negative combined ratios above arise in Lines of Business with a high proportion of contracts where the commission is higher than the combination of net loss expense, original acquisition costs and other expenses incurred.

Qualitative discussion – major lines of business:

2017 to 2016 comparison:

Gross written premium for 2017 were €334.6m, prior to cessions to the Company's retrocessionaires. This compares to €279.8m in 2016. The increase in Gross written premium of €55m arose largely in Other Specialty (€38m) and Casualty (€17m) whilst other lines were flat year on year, on a net basis, with a small increase in Property Catastrophe offset by a similar size reduction in Marine & Other. The loss ratio for 2017 was 70.5% compared to 61.1% for 2016.

The deterioration in the loss ratio in 2017, compared to 2016, is explained by a combination of factors impacting the Casualty and Other Property Lines. In Casualty the loss ratio was impacted by the change during quarter 1, 2017 to the Ogden discount in the UK (which moved from 1.5% of –0.75%) that is used to set compensation settlement amounts. This impacted the Company's UK motor excess of loss reinsurance portfolio requiring an increase in reserves to reflect this change. The Other Property line of business experienced a small number of large loss events within the Property Facultative division resulting the business line's loss ratio increasing to 137% compared to 37% for 2016. Other Specialty experienced some favourable reserve development with the business line's loss ratio reducing in comparison to 2016 which offset the movements seen in Casualty and Other Property discussed herein.

The net underwriting profit for 2017 was €13.7m, excluding investment income and realized gains and losses and other non-underwriting items. The equivalent result for 2016 was a profit of €1.6m. The improvement in the underwriting result of €12.1m, despite the higher loss ratio, is explained by 1) higher net earned premium consistent with increased gross written premium 2) lower acquisition expenses (i.e. increased negative expenses after allowing for increased ceding commissions received in line with increased ceded premiums) and 3) lower operating expenses compared to 2016 due to lower consulting fees incurred for Solvency II compliance and a change in accounting practice, made in 2016, which required a one-time increase in expenses not repeated in 2017 (In 2016 the Company discontinued its practice of deferring an element of operating expenses and this change increased 2016 expenses by requiring a one-time write-off of the carried deferred operating expense balance).

Casualty

In the Casualty area the Company's focus is on providing coverage to ceding company clients on third party liability products like motor, employers', general and/or professional liability, primarily on a treaty basis. Our main markets are in Continental Europe, United Kingdom and Ireland. We are active in exploring other European territories as well.

Arising from the change to the Ogden rate, in addition to the impact on loss ratios outlined already, there was also an impact on the pricing of the 2017 renewals which in the main source of the increased gross written premium compared to 2016 along with some new business written in addition.

Allowing for the impact of the Ogden rate change, the overall performance across the Company's Casualty book is well within expectations overall.

Other Property

The Company provides coverage for both personal lines and commercial property exposures and principally covers buildings, structures, equipment and contents. On the treaty side we have seen little growth with most of our business being from multiline bouquet covers we participate on in Europe. Rate pressure in this line continued in 2017.

The Company's Property Facultative business is written by two teams based in London and Zurich. Both teams have found the market challenging in 2017 largely due larger ceding companies retaining more risks on their own balance sheet. Notwithstanding this the team has managed to generate new opportunities to supplement this lost income by more intense marketing efforts.

The Facultative unit's business has been impacted by some of the catastrophe events that occurred in 2017 with individual property damage losses incurred from both Cyclone Debbie in Australia and the Californian wildfires. There was greater loss activity, not linked to the year's catastrophe events, compared to prior years some of which impact on the Facultative unit in addition.

Other Specialty

Within the Other Specialty unit the Company provides coverage to ceding company clients for surety, accident and health, workers' compensation catastrophe, agriculture, trade credit & political risk and proportional motor liability. Geographically we run most of those lines on a highly diversified world-wide basis excluding the United States.

In trade credit & surety the reinsurance market has displayed similar characteristics to 2016 and it continues to be competitive due to ample capacity as other reinsurers have sought diversification into specialty lines. The Company has managed to stay relevant with its client base and has defended its portfolio for the most part. The performance of this line meets our expectations.

The agriculture unit contributed to the growth in gross written premium within Other Specialty by providing capacity in markets where the demand was elevated either due to the growth of the underlying business or due to loss activity. The performance of the Company's agriculture book meets our expectations.

The accident and health part of Other Specialty experiences slightly reduced premium writings in 2017 as, again, price competition and disciplined underwriting resulted in few new opportunities. In the Cat and per risk excess of loss part of the book competition is strong. The supplemental health activity during 2017 continued to focus mainly on a small number of core relationships on the Continent. Overall the book performed as expected.

Proportional motor liability saw significant relative growth following the completion of a new transaction in a market that was also new for this line of business.

Marine and other

The Company has Marine activity in some legacy accounts and some ancillary premium relating to terrorism.

A.3 Investment Performance

ARE invests in a diversified portfolio of highly rated securities. Fixed income securities comprise the majority of the Company's investment assets. In addition to fixed income the Company also holds some short term cash or cash equivalent securities and an investment in a limited partnership which is value using the equity method. The following table summarizes the invested assets of the Company at year ended 31 December 2017 and 2016.

	2017		2016	
	Amount '000	**% of Total**	**Amount '000**	**% of Total**
Bonds				
GOVERNMENT BONDS	294,139	75.6%	217,528	65.9%
CORPORATE BONDS	28,277	7.3%	62,683	19.0%
ASSET BACKED SECURITIES	2,901	0.7%	6,873	2.1%
CMBS	0	0%	3,602	1.1%
Subtotal	**325,317**	**83.6%**	**290,686**	**88.0%**
Short term investments				
MONEY MARKET FUNDS	38,470	9.9%	1,689	0.5%
CASH & CASH EQUIVALENT	15,160	3.9%	23,898	7.2%
Subtotal	**53,630**	**13.8%**	**25,587**	**7.7%**
Equity method investment				
LIMITED PARTNERSHIP FUND	10,199	2.6%	13,891	4.2%
Total	**389,146**	**100.0%**	**330,164**	**100.0%**

The components of net investment income included in the statement of income and expenses are as per the table below.

Investment income	**2017 €'000**	**2016 €'000**
Interest income	2,979	2,496
Investment return		
Foreign exchange (losses) on investments	(6,463)	(2,497)
Unrealised (losses)/gains on investments	(2,979)	2,935
Realised (losses)/gains on investments	(10,143)	4,202
Income on investments valued under equity method	1,771	5,346
Total investment income & investment return	**(14,835)**	**12,483**
Investment expenses and charges	(598)	(455)
Net investment return	**(15,433)**	**12,027**

A.4 Performance of other activities

The following table summarizes the profit and loss account in Euro for the non-technical account for year ended 31 December 2017 and year ended 31 December 2016;

	Year Ended 31/12/2017 €'000	Year Ended 31/12/2016 €'000
Balance on the technical account	3,784	29,097
Net investment return included in the non-technical account	(598)	(455)
Profit on ordinary activities before taxation	**3,185**	**28,632**
Tax on profit on ordinary activities	(3,021)	(1,511)
Profit on ordinary activities after taxation	**164**	**27,121**

There were no gains or losses recognized directly in equity.

There were no material other income or expenses during the year.

A.5 Any other information

No other material information to report as of 31 December 2017.

SECTION B – SYSTEM OF GOVERNANCE

B.1 General information on the system of governance

B.1.1 Overview

The Company is classified as Medium Low Risk under the Central Bank of Ireland's PRISM rating framework and is subject to the Central Bank of Ireland's Corporate Governance Requirements for Insurance Undertakings 2015.

The Company's Board of Directors ("Board") is responsible for overseeing, controlling and directing the activities of the Company. The Board retains primary responsibility for corporate governance within the Company at all times. Senior Management also plays an important role in ensuring effective governance.

The terms of reference of the Board require the Board be made up of at least five directors, the majority of whom must be non-executive directors or independent directors. At least two members of the Board must be independent non-executive directors.

The Board of Directors as at 31 December 2017 is as follows:

- Ian Britchfield, Chairman (INED, Chairman of the Board and Risk Committee)
- Gerald König (INED, Audit committee chair, Risk committee member)
- Anthony Asquith (INED, Risk committee member, Audit committee member)
- Maamoun Rajeh (NED)
- Soren Scheuer (NED, Risk committee member)
- Jason Kittinger (NED, Audit committee member)
- Michael Hammer, CEO (Executive Director, Risk committee member)

The company secretary is Mark Nolan.

The presence of independent non-executive directors ensures that there is an appropriate element of independent challenge and oversight. The presence of ACGL executive management on the Board ensures that the Company's strategic direction remains aligned with the wider Group and ensures there is continuous feedback between, and interaction with, the Company and its parent. This structure enables the Group to retain an appropriate oversight of the Company's operations and to ensure that the business is aligned with the Group's long term goals.

The Board is responsible for overseeing the business of the Company and supervising management. The Board sets the standards of conduct of the Company, provides direction and oversight, and promotes a culture of integrity. While the Board delegates certain function to Sub-Committees, this does not absolve the Directors of their responsibility for the Company.

The Board operates under agreed terms of reference and has the following key responsibilities:

- To comply with any obligations for the Board prescribed by the Code, the Companies Acts 1963 – 2014 and all other rules, regulation, guidelines and laws applicable;
- The effective, prudent and ethical oversight of the Company;
- Setting the business strategy for the Company; and
- Ensuring that the Company complies with its constitution as well as relevant legal, regulatory, and governance requirements.

The Board reserves the following matters specifically to the Board unless, where permitted by applicable Irish law and regulatory requirements, such matters are expressly delegated in writing to management, the Audit Committee, the Risk Committee of the Company, or otherwise. These matters are also subject, where appropriate, to the direction/decision of the shareholder.

- All matters prescribed as being specifically reserved to the Board by the Company's Memorandum and Articles of Association, company law, and regulatory requirements.
- Appointment of Members of the Board, subject to regulatory approval.
- Approval of minutes of meetings of the Board and acknowledgement of the content of any minutes of any Committee of the Board or management/operational committee.
- Approval or ratification of any recommendation from or action taken by management or any Committee of the Board or management/operational committee, to the extent that any such recommendation or action requires approval or ratification.
- Recommendation and approval of distributions or dividends to the shareholders.
- Approval of Annual Financial Statements and Regulatory Returns, including approval of content of, and signing, the annual directors' compliance certificate and the annual compliance statement with respect to the Code.
- Appointment of Auditors.
- Appointment of Bankers and/or Investment Managers or Advisors.
- Approval of any changes in the structure of the Board.
- Approval of the business plan.
- Establishment, appointment to and/or dissolution of, as the case may be, Committees of the Board and management/operational committees, including prescribing and approving charters and/or terms of reference for such committees.
- Determining the Risk Appetite of the Company.
- Self-assessment of the Board, including in relation to composition, performance, conflicts of interest and any other matter specified in the Code. In relation to performance, the Board shall document the fact and results of its review.
- Waiver of any actual or apparent conflict of interest, if legally appropriate, involving the Company.
- Final approval of litigation or arbitration activities, including compromises and settlements of disputed litigation claims (other than ordinary course insurance claims).
- Approval of corporate strategy, goals, and structure.
- Approval of the removal from office of any head of a Control Function as defined in the Code.
- Dealings with (including disposal or acquisition of, or change of use of) any material asset of the Company.
- Approval of any appointments to senior management.
- Assess performance of, and monitor, the Board committees and management/operational committees of the Company.
- Any other matters not delegated to management or otherwise delegated by the Board

The Board has an Audit Committee and a Risk Committee. Both are governed by their respective Terms of Reference.

The duties of the Audit Committee are:

- to liaise with the external and internal auditor particularly in relation to their audit findings;
- to oversee the relationship with the external auditors;
- to review the integrity of the Company's financial statements and to ensure that they give a "true and fair view" of the financial status of the Company;
- to review any financial announcements and reports and to recommend to the Board whether to approve the Company's annual accounts;
- to assess auditor independence and the effectiveness of the audit process;
- to monitor the effectiveness and adequacy of the Company's internal control, internal audit and IT systems;
- to review all reports on the Company from the auditors and management's responsiveness;
- to review and assess the annual audit plan including adequacy of resources and ensure that it is consistent with the scope of the audit engagement;
- to check quarterly the developments under the Annual Compliance Plan;
- to review the Annual Plan for the Compliance function including adequacy of resources; and
- to review and challenge, where necessary,
    - the consistency of, and any changes to, accounting policies;
    - the methods used to account for significant or unusual transactions where different approaches are possible; and
    - whether the Company has followed appropriate accounting standards and made appropriate estimates and judgments, taking into account the views of the external auditor.

The duties of the Risk Committee are:

- to liaise at least quarterly with the Chief Risk Officer to discuss the quarterly Risk report and other matters under these Terms of Reference;
- to oversee the risk management function and to check quarterly the developments under the Annual Risk Plan;
- to review updated or new Risk Policies and make a recommendation to the Board;
- to review the Annual Plan for the Risk Function including a review of adequacy of resources;
- to review at least annually the Risk Management Framework and advice the Board accordingly;
- to ensure that the risk appetite is clearly articulated and reflected within the Risk Appetite Statement and that the Risk Appetite Statement is reviewed at least annually;
- to review at least annually the Risk Register and advice the Board accordingly;
- to review quarterly the Risk Appetite Matrix and advise the Board on the current risk exposures;
- to keep under review the Company's overall risk assessment processes ensuring both qualitative and quantitative metrics are used;
- to review the Company's capability to identify and manage new risk types;
- to advise the Board, before a decision is taken to proceed with a proposed strategic transactions including acquisitions or disposals, on risk aspects of such transaction(s) and any implications for the risk appetite and tolerance of the Company;
- to review reports on any material breaches of risk limits and the adequacy of proposed action;

- to ensure the Risk Function has appropriate access to information to enable it to perform its function effectively;
- to ensure the Risk Function has adequate independence and unfettered access to the Board and Chairman of the Risk Committee;
- to consider other risk management topics, as defined by the Board;
- to monitor the effectiveness and adequacy of the Company's risk management processes;
- to advise the Board on the effectiveness of strategies and policies with respect to maintaining, on an on-going basis, amounts, types and distribution of both internal capital and own funds adequate to cover the risks of the institution;
- to review, challenge and advise on the inputs to and outputs from the (at least) annual ORSA process and report;
- to oversee the Compliance management function and to check quarterly the developments under the Annual Compliance Plan; and
- to review updated or new Compliance and Governance Policies and make a recommendation to the Board.

B.1.2 Code of Business Conduct

The Company has adopted the Group Code of Business Conduct, which describes our ethical principles for the conduct of our business. The full text of our Code of Business Conduct and our Corporate Governance Guidelines are available on the Company's website located at www.archcapgroup.com.

B.1.3 Independent Control Functions

The Company has in place four key independent control functions as required under the Corporate Governance Requirements for Insurance Undertakings 2015. These are:

- Risk Management (See Section B3)
- Compliance (See Section B4.2)
- Actuarial (see Section B6)
- Internal Audit (see Section B5)

These functions are responsible for providing oversight of and challenge to the business and for providing assurance to the Board in relation to the Company's control framework. Each function has the necessary authority, resources and operational independence to meet their responsibilities.

B.1.4 Material Changes

There have been no material changes in the systems of governance or memberships of the Board and Committees over the period.

B.1.5 Remuneration Policy and Practices

The Company has a Remuneration Policy in place which is guided by principles which are embedded in the Company's risk management framework and in the Group Code of Business Conduct and Compliance and Ethics Program ("Ethics Code"). The Ethics Code embodies the Group's goal of promoting an organisational culture that encourages the highest standards of ethical business conduct.

The Board of the Company is responsible for the implementation and administration of the Policy. It is not deemed appropriate or proportionate, given the scale of the business and the governance structure in place in Ireland and within the Arch Group, to appoint a Remuneration Committee. At least annually, the Risk Committee of the Company will review the Policy against the Company's risk framework and provide recommendations to the Board. The Board will review the Risk Committee's recommendations and ultimately approve the Policy for implementation if appropriate.

The CEO is responsible for reporting to the Board on the implementation and operation of this Policy, and consequent controls and processes. The Compliance Officer ("CO") is responsible for providing advice, implementing a monitoring program and reviewing the Policy at least on an annual basis as part of the Compliance Plan. The CO and CEO will present recommendations for changes to the Policy to the Risk Committee.

The CO will monitor the implementation of the Policy, then conferring with the CEO and, if needed, Group Human Resources staff, confirm that the Policy is being implemented appropriately. Reasonable evidence of the implementation shall be provided to the CO.

Responsibility for the determination of fixed salary levels rests with the CEO. For departmental staff, consultation is undertaken with department heads. The remuneration of the CEO is set at the Group level.

The principal features of our compensation programs and policies are summarized below.

- **Key Principles:**

  Remuneration decisions are meant to encourage employees to meet the strategic aims and objectives of the Company within a framework of prudent and effective risk management and system of internal controls. Remuneration decisions should also take into account financial and non-financial considerations, as well as an employee's functions, responsibilities and experience.

- **Material Risk Takers:**

  With respect to Material Risk Takers, who are defined as those employees who are permitted to commit or bind the Company to reinsurance transactions and to accept risk on behalf of the Company, the Policy also embodies the Group's guiding principles to emphasise long-term compensation tied to Group performance in order to mitigate excessive risk-taking. Arch philosophy requires exercise of judgment in making compensation decisions for employees after reviewing the Group's and Company's overall performance and long-term interests and evaluating an employee's performance during the year against established objectives, leadership qualities, scope of responsibilities and current compensation. Specific factors affecting compensation decisions include key financial metrics, such as growth in book value, return on capital, after-tax operating income, combined ratio and investment performance, as well as achieving strategic objectives and supporting Arch's values by promoting a culture of integrity through compliance with law and its ethic policies. Fixed (base salary) and variable (bonus) components of remuneration may be adjusted upwards or downwards based on these considerations. The Group can modify or terminate elements of the compensation program for Material Risk Takers which create a fully flexible bonus policy, including the possibility of no payout of the variable cash component and no issuance of new equity awards. In addition senior management, who are not within the definition of Risk Takers, also participate in this long-term compensation plans linked to Group performance.

- **Formula Approach:**

  Material Risk Takers and some senior non-Material Risk Takers who perform an underwriting or underwriting support function and who are eligible to receive cash bonuses will be granted them based on a "Formula Approach", which is determined by ACGL. Under the Formula Approach, a bonus pool is established for each business segment based on underwriting performance during a given underwriting year. Further, individual performance is factored using a modifier to the target which becomes the basis for future payouts. For each underwriting year, the bonus pool will be recalculated annually as actual underwriting results emerge, and any resultant payments will be made to the employees over a 10-year development period. A deferral period of three years is in place for a substantial portion of the bonus in that the bonus is paid out over ten years. The Group adopts this approach because it believes that much of its business requires multiple years to determine whether the business written has been successful (in terms of return on capital). The Group believes that making payments to employees over a period of years as actual results become known effectively aligns pay with performance. Thus, performance-based remuneration is awarded in a manner which promotes sound risk management and does not induce excessive risk-taking.

- **Risk Management:**

  We believe our approach to evaluation of performance and the design of our compensation programs assists in mitigating excessive risk-taking that could harm our Company. We emphasize variable compensation that is tied to Company performance. For senior management, we emphasize long-term compensation that vests over a multi-year period. Furthermore, and as discussed above, the Formula Approach is based on underwriting performance during a given underwriting year. For each underwriting year, the bonus pool will be recalculated annually as actual underwriting results emerge, and any resultant payments will be made to the participants over a 10-year development period. Since much of our business requires multiple years to determine whether we have been successful in our assessment of risk, we have structured our plan in this manner so that incentive payments are made to employees as actual results become known. In addition, senior management is subject to our clawback policy and share ownership guidelines with hedging/pledging restrictions.

B.1.6 Supplementary Pension / Early Retirement Schemes

The Company operates a defined contribution plan for certain employees. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity and has no legal or constructive obligation to pay further contributions or to make direct benefit payments to employees if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The assets of the plan are held separately from the Company in independently administered funds. The contributions to the defined contribution plan are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet.

B.1.7 Material Transactions

The Company did not enter into any material insurance or other business transaction with its shareholder controllers, persons who exercise significant influence, the board or senior executive during the reporting period.

B.2 Fit and proper requirements

B.2.1 Fit and Proper Process

The Company's Fitness & Probity policy sets out the guidelines to ensure that employees meet the fit and proper standards, both on entry and throughout their employment at the Company. The CEO is responsible for implementing this policy, while the Compliance Officer is responsible for providing advice, implementing a monitoring program and reviewing the policy at least annually.

The Compliance Officer identifies and maintains a record of Pre-Approved Controlled Function ("PCF") and Controlled Function ("CF") holders. Before the Company can appoint a person to a PCF, the CBI must have approved the appointment in writing.

The Fitness & Probity policy sets out a number of steps that must be carried out before proposal of a PCF to the CBI. These include, but are not limited to:

- A competency interview to establish evidence of the required competencies
- A full chronological interview to establish patterns and trends in behaviour that should indicate integrity and competency
- A full and thorough screening by and independent third-party company with a recognized reputation for pre-employment screening, where necessary
- Pre-employment screening including identity verification, credit and bankruptcy checks, self-certification on conflicts of interests, directorship checks, education and professional qualifications validation, employment reference checks, compliance and regulatory checks.

B.2.2 Professional Qualifications, Skills and Expertise

The Company ensures that all persons who hold key positions or functions are fit to provide sound and prudent management through their professional qualifications, knowledge and experience and are proper by being of good repute and integrity.

As described above, the Fitness and Probity policy sets out the due diligence that must be performed before a candidate is proposed to the CBI to a PCF role, or appointed to a senior management position. The process aims to ensure that key function holders and decision makers have the requisite employment experience, technical skills, professional qualifications and key competencies to perform their duties to the highest standard.

All employees are monitored on an on-going basis through a formal performance appraisal process and continuing professional development. Specific requirements include:

- Appraisal meetings are conducted in the third month of employment.
- The appraisal meeting focuses on development by reviewing the employee against a set of competencies specific to their role and on setting objectives for the next year and measurement of goals during the first three months of employment. Competency also is reviewed at this meeting.
- Formal appraisal meetings are held annually to ensure that staff continues to meet their goals and to set new objectives for the year ahead.
- Appraisal meetings and development requirements are documented and training needs are actioned via the appropriate training methods.

- Employees are encouraged to maintain an on-going record of their CPD/training
- Employees are required to attend a minimum level of training courses and maintain a minimum standard of competency. Examples of areas covered by on-going training are work specific roles; general insurance; legal issues and regulations.
- Employees also are required to complete in-house training, including code of conduct training, anti-harassment training and anti-money laundering.

B.3 Risk management system including the own risk and solvency assessment

B.3.1 Chief Risk Officer ("CRO")

The Board has approved the CRO, who is responsible for the Risk Management Function. The Board has approved terms of reference for the CRO and the Risk Management Function and reviews the terms of reference annually. The Risk Committee has approved the annual risk plan and reviews the plan annually.

The Risk Management Function is defined as a "Key Function" in Solvency II. The CRO has responsibility for the Risk Management Function and is the Key Function Holder for Risk Management.

The CRO's primary responsibility is to the Board, and reports to the Board periodically with direct access to the Chairman of the Board. The CRO also reports to the Risk Committee, at least quarterly.

The Risk Management Function and CRO carry out the following duties:

- ensure that ARE has and maintains effective processes to identify, monitor, manage and report on the risks to which ARE is or might be exposed;
- measure and assess the controls of material risks;
- implement the risk management framework and risk policies;
- prepare a regular risk report including a view of all current and future material risks;
- provide comprehensive and timely information on ARE's material risks which enables management and the Board of Directors (the Board) to understand the overall risk profile;
- be the central point for risk reporting;
- maintain a Risk Function calendar of activities;
- report on the effectiveness of the risk management system;
- provide advice on risk management to all Stakeholders;
- provide education and training on risk matters to colleagues and staff in related companies;
- promote a strong risk culture;
- co-ordinate the annual refresh of the risk policies;
- maintain the risk register;
- lead the ORSA process; and
- facilitate the setting of the risk appetite by the Board.

B.3.2 Risk Management Process and Procedures

As described above, the CRO produces regular risk reports, including the quarterly CRO report. This reporting aims to provide the Board, Risk and Audit Committees with sufficient oversight of the Risk Management Framework and the risks to which the company is exposed.

The ORSA process is carried out throughout the year, which facilitates integration with decision making, culminating in the annual ORSA report which is owned and shaped by the Board.

The Company has a Risk Management Framework in place which is designed to support the Company's decision-making procedures by providing consistent, reliable and timely risk information and protecting capital from risks that exceed established risk tolerances.

The following narrative provides an overview of the Risk Management Framework, which sets out the Company's methodology for identifying, measuring, managing and reporting on the key risks affecting

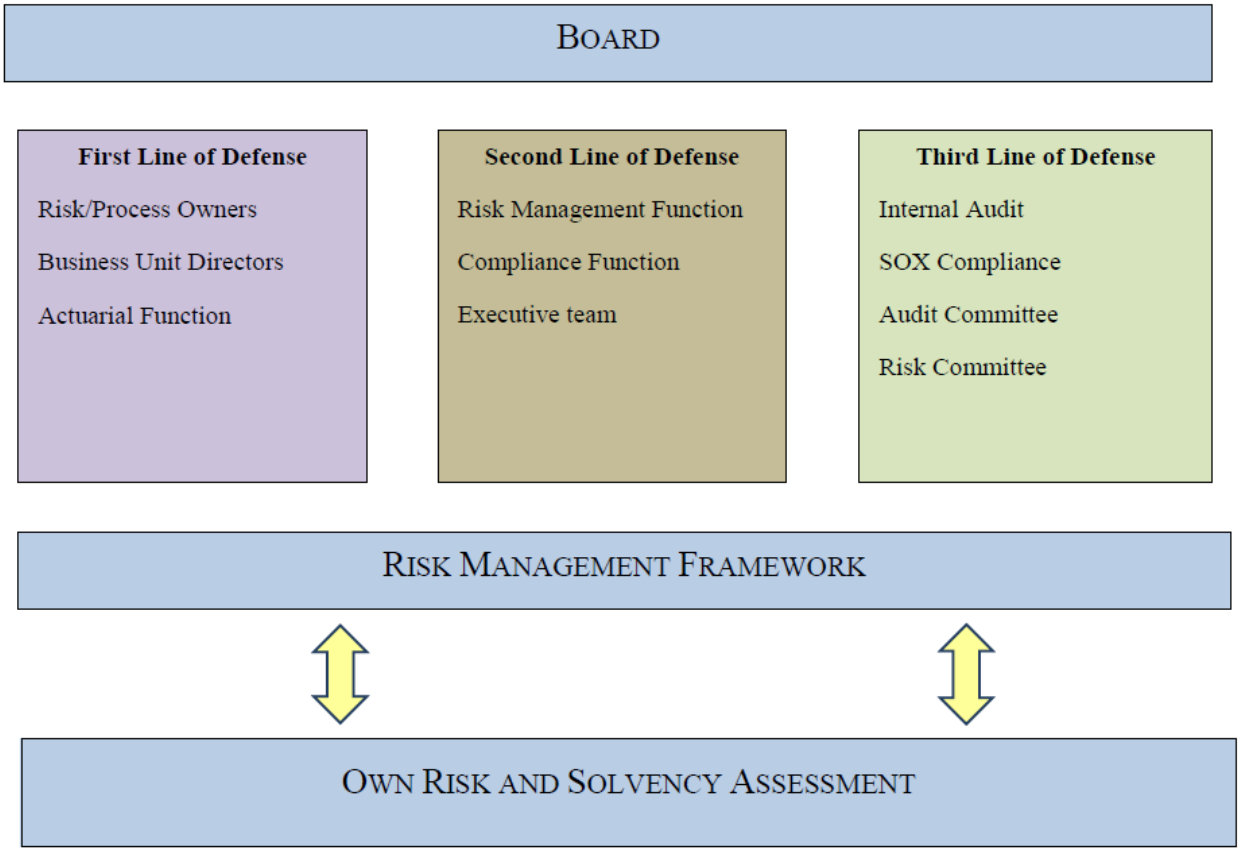

ARE. It outlines ARE's approach to risk identification and assessment and provides an overview of ARE's risk appetite and tolerance for each of the following major risks:

- Underwriting Risk;
- Market risk;
- Counterparty credit risk; and
- Operational, including governance, regulatory, business/strategic, investor relations (reputational), rating agency and outsourcing risks.

The framework includes details of the Company's:

- Risk philosophy and policies to address the material risks confronting the Company; and
- Compliance, approach and procedures to control and or mitigate these risks.

The Risk Management Framework follows the Three Lines of Defence model, and fits into the overall governance structure as follows:

The actions and policies implemented to meet the Company's business management and regulatory obligations form the core of this framework. The Company has adopted a holistic approach to risk management by analysing risk from both a top-down and bottom-up perspective.

Risk Identification and Assessment

The Risk Committee of the Board oversee the top-down and bottom-up review of the Company's risks. Given the nature and scale of the Company, the committee considersunderwriting, investments and

operational risks within the scope of the assessment. The Chief Risk Officer ("CRO") assists the committee in the identification and assessment of all key risks.

The CRO is responsible for maintaining the Risk Register and continually reviewing and challenging risk assessments, including the impact of emerging risks and significant business developments. Board approval is required for any new high level risks or change in inherent / residual designations.

Risk Monitoring and Control

ARE's Risk Management Framework requires risk owners to monitor key risks on a continuous basis. The highest residual risks are actively managed by the Risk Committee. The remaining risks are managed and monitored at a process level by the risk owners and/or CRO.

Risk owners have ultimate responsibility for the day-to-day management of each designated risk, reporting to the CRO on the satisfactory management and control of the risk and timely escalation of significant issues that may arise in relation to that risk.

The CRO is responsible for overseeing the monitoring of all risks across the business and for communicating to the relevant risk owners if he becomes aware of issues, or potential and actual breaches of risk appetite, relevant to the assigned risks.

A key element of these monitoring activities is the evaluation of the Company's position relative to risk tolerances and limits approved by the Board.

Risk Reporting

Quarterly, the CRO compiles the results of the key risk review process into a report to the Risk Committee for review and discussion at their quarterly meeting. The report includes:

- An overview of selected key risks (e.g., Underwriting, Market, Credit);
- Changes in the rating of high level risks in the Risk Register;
- A risk dashboard that depicts the status of risk limit and tolerance metrics;
- Summary of largest exposures and concentration risks; and
- Reinsurance arrangements, including outstanding and uncollectible recoveries.

If necessary, risk management matters reviewed at the Risk Committee meeting are presented for discussion by the Board. The CRO is responsible for immediately escalating any significant risk matters to ARE executive management, the Risk Committee and/or the Board for approval of the required remediation.

B.3.3 Implementation and Integration of ORSA

The Company believes an integrated approach to developing, measuring and reporting its ORSA is an integral part of the Risk Management Framework. The ORSA process provides the link between the Company's risk profile, its Board-approved risk appetite including approved risk tolerances and limits, its business strategy and its overall solvency requirements.

The ORSA is the entirety of the processes and procedures employed to identify, assess, monitor, manage, and report the short- and long-term risks the Company faces – or may face – and to determine the capital necessary to ensure that overall solvency needs are met at all times. The ORSA also makes the link between actual reported results and the capital assessment.

The ORSA process and reporting are integral parts of ARE's business strategy, tailored specifically to fit into ARE's organisational structure and risk management system with the appropriate techniques in place to assess its overall solvency needs, taking into consideration the nature, scale and complexity of the risks inherent in the business.

The Company also takes the results of the ORSA into account for its system of governance, including long-term capital management, business planning and new product development. It also contributes to various strategic decision-making including how best to optimise capital management, establishing the most appropriate premium levels and deciding whether to retain or transfer risks.

The ORSA is the basis for risk reporting to the Board and its committees and acts as a mechanism to embed the Risk Management Framework within the Company's decision making processes and operations. The Board has delegated responsibility for supervision and oversight of the ORSA to the Risk Committee. This oversight includes regular reviews of the ORSA process and output.

An ORSA Report is produced at least annually and the results of each assessment are reported to the Board. The Board actively participates in the ORSA process by steering how the assessment is performed and challenging its results, including suggesting and challenging stress scenarios. This assessment is also taken into account when formulating strategic decisions for the Company.

B.3.4 Performance, Documentation and Review of the ORSA

A full ORSA cycle is performed at least annually and reported to the Risk Committee of the Board.

The ORSA process is a circular process that relies on key elements of the business:

- **The Board outputs –** Strategy / Capital Management Plan / The Board Risk Appetite/ORSA Policy
- **Business planning –** providing the basis for the base case projections
- **The Solvency II Pillar I standard formula –** 3 yr outputs & base assumptions used
- **The Risk Committee** – who review, challenge & approve the test scenarios, and ORSA process and output
- **The Actuarial Function** – who quantify technical provisions and provide other input into the Pillar I model
- **The Risk Function and Management –** who quantify the Pillar I capital requirements, assess the outputs and prepare the reports
- **The Risk Committee & Board –** who provide an assessment of the output and resultant capital, strategy & risk appetite review
- **ORSA Reporting to the all stakeholders**

The Key Activities in the ORSA Process are:

- Strategy & Planning
- Pillar I base outputs and assumptions
- Risk identification & assessment
- Scenario setting
- Scenario testing through the Pillar I model & production of test output
- Review of test output & report preparation

- Risk Committee & Board review & reporting

Each run of the ORSA process will be appropriately documented to evidence each of its constituent parts, and this record will be retained for any later scrutiny.

The documentation shall contain:

- A summary of the Board strategy for the Company
- The Risk Appetite Statement
- The Pillar I standard assumptions & output
- The schedule of scenarios to be tested, cross-referenced to the Risk categories in the Board's risk appetite, and quantification of deviations from the base assumptions
- The scenario test results
- The ORSA report
- Any Audit and Risk Committee Minutes relating to scrutiny & challenge of the ORSA process & outputs
- Any Board minutes relating to ORSA output review & challenge – resultant strategy decisions and risk appetite review
- A record of the report to the CBI

B.3.5 Relationship between the ORSA, Solvency Needs, and Capital and Risk Management Systems

The Company has both a Capital Management Policy and Capital Management Plan in place. The Risk Management Function is responsible for developing and maintaining the Capital Management Plan. The Risk Committee reviews and monitors the plan and presents it to the Board for approval. The Audit Committee is responsible for monitoring the alignment of the investment strategy with the plan.

The Capital Management Plan incorporates the output from the ORSA and associated reporting. The plan also sets out triggers for corrective capital actions relative to the Company's Solvency Ratios, both in terms of Solvency Capital Requirement ("SCR") and Minimum Capital Requirement ("MCR").

ARE's capital planning process aims to be dynamic and forward-looking in relation to ARE's risk profile and shall take into account the output from ARE's risk management activities and the ORSA process and associated reporting as part of capital planning activities.

As such, capital planning activities take into account any current or anticipated changes in ARE's risk profile, such as those reflected in its business plan, and forecasting the related impact on capital. In addition, as part of its capital planning, the Company integrates projected capital needs with its business planning and financial forecasting processes.

The Capital Management Plan identifies a number of potential sources of capital and associated corrective actions that may be utilised to restore sufficient capitalisation, depending on the severity of the capital requirements placed upon ARE.

When considering the sources of capital and corrective actions, ARE will have regard to the Solvency II Own Fund requirements.

Any material changes in the underlying risks, such as changes in business mix, reinsurance strategy and investment strategy, are modelled for potential impact upon ARE's capital requirements. The result of this process is to ensure that all material risks feed into the capital requirements analysis, and in some cases also trigger further investigation through stress testing.

B.3.6 Approval Process

The Company records the actual performance of the overall capital assessment and the assessment of any deviations in its risk profile from the assumptions underlying the capital requirements analysis to a level of detail that enables a third party to evaluate the assessments performed.

The CRO prepares a quarterly report for the Risk Committee covering risk management in general, including relevant ORSA topics, for discussion in the Risk Committee meetings. The Risk Register is presented to the Risk Committee on an annual basis for review, followed by Board approval. Any material changes in the risk management strategy, policies, processes, procedures and/or capital requirements analysis are presented to the Board for approval.

The ORSA policy and the ORSA report are reviewed by the Risk Committee and recommended to the Board for approval.

B.4 Internal control system

B.4.1 Internal Control System

ARE maintains an effective internal control system, which includes administrative and accounting procedures, an internal control framework, appropriate reporting arrangements and a compliance function.

The Board is responsible for monitoring the establishment and maintenance of the system of controls used to assess and manage exposure to all areas of risk. The objectives of these controls are to ensure that ARE's risk strategy is maintained and risk remains within the appetite and tolerances set by the Board.

ARE is part of Group-wide compliance activities, including management's assessment to confirm the design and operating effectiveness of internal controls over financial reporting and the identification and testing of key internal controls, including any required remediation.

The Board has delegated management and oversight of certain controls to appropriate forums within the Group. ARE's internal control framework provides an appropriate level of reporting on the control environment to the Board.

Controls are detailed in the Risk Register, which associates elements within the category of risk to one or more mitigating controls. ARE's internal control framework includes reviews of both the design and effectiveness of key controls, with results of this periodic evaluation regularly reported to the Board.

The Group's Sarbanes-Oxley (SOX) compliance function's testing of internal control over financial reporting (ICFR) is a major element of the Company's monitoring activities. The focus of testing is to provide auditable evidence regarding the design and operating effectiveness of ICFR. A major component of this process is the identification, tracking and disposition of internal control deficiencies that are assessed individually and in the aggregate. The results of the testing are continually communicated to stakeholders who include senior management, process/control owners and the Group Audit Committee.

B.4.2 Compliance Function

Implementation of the Compliance Function

The Board has approved a Compliance Officer, who is responsible for the Compliance Function. In addition the Board approved a Compliance Handbook (policy) and a Compliance Plan. Both have to be reviewed on an annual basis. Changes have to be approved by the ARE Board.

The Compliance Handbook contains among others Mission Statement, Charter, Responsibilities, Powers, Limitations, Activities, Planning and Reporting of the Compliance Function.

While the Board retains primary responsibility for compliance and governance within ARE at all times, senior management plays an important part in ensuring effective governance and compliance and hence is responsible for operating effective over sight consistent with board policy. The role of the Compliance Function is to assist and advise the Board and management with their responsibilities. In addition, senior management and all staff members are responsible for their own regulated activities and for complying with relevant rules, legislation, standards, contracts, policies and procedures relevant to their work.

The high-level goals of the Compliance Function are:

- To ensure that a proportionate compliance infrastructure is in place;
- To identify and manage Compliance risks;
- To implement a review and monitoring program; and
- To help the business to meet requirements with applicable legislation and regulation.

The Compliance Officer has to produce and submit an Annual Compliance Plan to the Board for approval. The Compliance Plan ensures that the Compliance Function's work has a focus with measurable output that is understood by and aligns with expectations of the business. It determines the actions that the Compliance Function needs to achieve in the next 12 months.

The Compliance Plan shall cover at least the following:

- Compliance Objectives;
- Compliance Resources;
- Provision of regulatory staff training;
- Revision of existing policies and procedures;
- Preparation of new policies and procedures;
- Monitoring – details of a risk based monitoring review program; and
- Projects – on-going and planned business or regulatory projects.

The Compliance Officer is required to make following internal reports:

- Quarterly to the Audit and Risk Committees;
- Monthly to the CEO;
- Promptly any medium or major compliance issues identified to the relevant person and the CEO; and
- Provide update to management team at the bi-weekly management call hosted by the CEO.

Independence and Authority

The Compliance Officer does not hold any other responsibilities besides Compliance at ARE. He attends Committee and Board meetings and reports to the Audit and Risk Committee and the Board on all relevant matters.

The Compliance function is authorized to review all areas of the Company and has full, free, and unrestricted access to all Company activities, records, property and personnel. Compliance has full and direct access to ARE's Board and the authority to escalate matters to ACGL where required.

B.5 Internal audit function

Arch Capital Services, Inc. ("ACSI") provides internal audit services to all ACGL entities through Internal Audit Services ("IAS") which is led by the Director of Internal Audit Services . ARE and its subsidiaries are included within the scope of IAS's responsibilities. As such, it is deemed by ARE management that the internal audit function is effectively outsourced to ACSI.

IAS is an independent, objective, assurance and consulting activity designed to add value and improve the Companies' operations. It helps management and the Audit Committee accomplishes its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control and governance processes.

IAS is adequately staffed by competent individuals and is objective and independent of ARE's day-to-day activities. Where necessary, IAS utilizes external resources to support its work. Appropriate budgets are set to support IAS.

IAS has appropriate access to all staff, Senior Management and records, including those relating to third party service providers. No restrictions are placed on the scope of IAS's work.

IAS's scope encompasses, but is not limited to, the examination and evaluation of the adequacy and effectiveness of the Companies' procedures and internal controls related to its business processes, governance and risk management functions. In addition IAS may perform special examinations and tasks at the request of management, the Board, or the Audit Committee.

B.5.1 Internal Audit Reporting

The Director of IAS reports to the Chairman of the ACGL Audit Committee and administratively to the ACGL Chief Financial Officer. The Director of IAS also reports to the Company's Audit Committee for ARE related activities and has direct access to all members of the Audit Committee.

An Annual Internal Audit Plan ("Audit Plan") is produced and submitted to the Company's Audit Committee prior to the start of the year to which the Audit Plan pertains. It summaries IAS's risk assessment of the business, the scope of its work, the competencies of the team, and the resources, both internal and external, required to accomplish the Audit Plan. The Plan takes into consideration management's view of key and emerging risks per the Risk Register, as well as IAS's assessment of the Company's key and emerging risks and related controls and their linkage to historical and planned audits. IAS also performs a process based risk assessment in which we analyse risks within each of the business process to assess the impact on the Audit Plan. The rationale for internal audit activity for the coming year is also detailed within the Audit Plan and is based on a number of factors which include, but is not limited to our assessed level of risk associated with each business process, planned operational changes, new or expanding lines of business, consideration of the work performed by other assurance providers, etc.

IAS maintains communication with other assurance providers in order to identify potential issues and also to leverage where applicable upon the work they perform. The Audit Plan includes an overview of

the various other assurance activities performed upon which IAS places partial reliance and which provides additional rationale for our areas of focus.

IAS issues a planning and scoping memo prior to each audit which details the scope of the audit including any specific exclusions, as well as resources and timing of fieldwork and reporting. During fieldwork, audit procedures will include both substantive testing and control testing (including inspection and/ or re-performance) where appropriate. Audit evidence is retained for all audit work performed.

Subsequent to completion of fieldwork and discussion of findings with management, IAS issues a report (or memo where appropriate) for all audit engagements and reviews performed. These reports or memos include a management response for all recommendations along with a target date for remediation. The progress of all recommendations is monitored by IAS and periodically reported to the Audit Committee.

In addition to the annual Audit Plan, IAS presents an Internal Audit Status Report at the quarterly Audit Committee meetings. The report includes (but is not limited to):

- Changes to the original Audit Plan presented to the Audit Committee;
- Status of the audits included on the Audit Plan;
- Results of recently issued audit reports;
- Status of prior audit findings and recommendations; and
- Any other matters which in the Director of IAS's opinion requires reporting to the Audit Committee

B.5.2 Maintaining Independence

A key feature that ensures the independence of the Internal Audit function is its positioning outside of functional roles and responsibilities. IAS staff are employees of Arch Capital Group and may not carry out operational roles for ARE.

The Internal Audit policy sets out the following specific measures aimed at ensuring independence;

- The Internal Audit function is managed and run by personnel separate to ARE management.
- The director of IAS has the authority to inform the CBI of any issues should they deem it necessary
- The staff in the IAS function have no involvement in the day to day operations of the Company;
- IAS has access to all staff, management and records and no restriction may be placed on this access or the scope of IAS's work and;
- IAS reports directly to the Audit Committee, not to operational management.

B.6 Actuarial function

The Board has approved the Head of Actuarial Function ("HoAF"), who is responsible for the Actuarial Function. The Board has approved terms of reference for the Actuarial Function and reviews the terms of reference annually. The terms of reference state that the Actuarial Function must be free from influence from other functions and the Board.

The Head of Actuarial Function ("HoAF") has been assigned responsibility for the ARE Actuarial Function. Actuarial Terms of Reference are in place which state that the Actuarial Function must be free from influence from other functions and the Board. The role of HoAF is outsourced to the Chief Actuary of ARL. The Board provides oversight to ensure the HoAF has adequate resources and authority to operate effectively.

The main activities of the Actuarial Function in a Solvency II environment shall include the requirements of the Solvency II Directive, the CBI's Domestic Actuarial Regime and the CBI Guidance for (Re) Insurance Undertakings on the Head of Actuarial Function Role including:

- Coordinate the calculation of technical provisions;
- Ensure the appropriateness of the methodologies and underlying models used as well as the assumptions made in the calculation of technical provisions;
- Assess the sufficiency and quality of the data used in the calculation of technical provisions;
- Compare best estimates against experience;
- Inform the Board of the reliability and adequacy of the calculation of technical provisions;
- Oversee the calculation of technical provisions in the cases set out in the regulations;
- Express an opinion on the overall underwriting policy;
- Express an opinion on the adequacy of reinsurance arrangements; and
- Contribute to the effective implementation of the risk management system
- Provide an Actuarial Opinion on Technical Provisions;
- Provide Actuarial Report on Technical Provisions; and
- Express an opinion on each ORSA process.

On an annual basis the Head of Actuarial Function will prepare an Actuarial Opinion on Technical Provisions ("AOTP") and present the Actuarial Report on Technical Provisions ("ARTP") to the Board of Directors. The ARTP will be prepared in line with relevant regulatory and Actuarial Standards of Practice.

The Actuarial Function comprises experienced, fully qualified, individuals with in-depth knowledge of actuarial and financial mathematics. The function is staffed appropriately given the nature, scale and complexity of the risks inherent in the integrated operations.

ACGL's Chief Actuary oversees actuarial policies throughout the Group, as well as development of Group-wide actuarial techniques and education. This individual provides an independent assessment of the Group's reserves to the ACGL Audit Committee each quarter.

B.7 Outsourcing

B.7.1 Outsourcing Policy

ARE defines outsourcing as contracting out part or all of an internal business process to a third party provider (either outside or inside the Arch Group of companies). In this regard ARE may use the external service provider's processes and controls to perform the agreed upon services. However, ARE will retain all decision making and ultimate responsibility over the business function and maintain the appropriate monitoring mechanisms to ensure adherence to a service level agreement.

The Company has an Outsourcing Policy in place which sets out the following:

- The definition of outsourcing

- Responsibility for implementation and operation of the policy and consequent controls and processes
- The criteria for outsourcing
- The approval process
- Contract and legal requirements
- Risk assessment and risk mitigation measures
- Monitoring and on-going requirements

Key functions that have been outsourced (within the Arch Group) include:

- Head of Actuarial Function role (to the Chief Actuary of ARL)
- Investment Management Services (to Arch Investment Management Ltd)
- Head of Internal Audit (to Director of Internal Audit Services at ACSI)

B.8 Assessment

Given the nature, scale and complexity of the risks inherent in our business, we conclude our system of governance is adequate and appropriate.

B.9 Any other information

No other material information to report as of 31 December 2017.

Overview

ARE's risk appetite framework provides an expression of the level of risk the Company is willing to accept in pursuit of its strategic objectives. The risk appetite framework provides quantitative and qualitative statements which are used to define the general attitude within the organization towards the desired level of risk. It not only supports the Company's risk management framework, it also enables ARE to make informed business decisions having regard to the key risks to which it may be exposed by such a decision.

In general, ARE has an appetite for insurance (underwriting) risk and a tolerance for other forms of risk. The risk philosophy of ARE encompasses all major risks and focuses on attaining the following business objectives:

- Underwrite business that meets agreed targeted returns
- Underwrite business with selected cedants
- Underwrite only carefully selected business lines
- Manage underwriting volumes in line with the business cycle
- Limit the downside risk such that the Company maintains a sufficient solvency margin.

The following table shows the composition by sub-module of the SCR as at 31 December 2017, along with the composition as at 31 December 2016 for comparison purposes.

Risk Category	Description	Allocated % of SCR as at 31-Dec-17	Allocated % of SCR as at 31-Dec-16
Underwriting Risk	Risk of losses from business already written or planned to be written over the next year	22.0%	22.0%
Market Risk	Risk of losses from market movements, including exchange rates and investment returns	64.6%	64.4%
Credit Risk	Risk of losses from counterparty defaults, including reinsurers and other counterparties	8.1%	9.4%
Operational Risk	Risk of operational losses	5.4%	4.2%

C.1 Underwriting risk

C.1.1 Key Underwriting Risks

Underwriting risk refers to the risk of loss, or of adverse change in the value of insurance/reinsurance liabilities, due to inadequate pricing or risk quantification assumptions, which includes the fluctuations in the timing, frequency and severity of insured events. At a risk policy level, we consider underwriting risk is linked to reserving risk. Reserving risk refers to the risk of loss, or of adverse change in the value of insurance liabilities, due to inadequate reserving assumptions, which includes the fluctuations in the timing, frequency and severity of insured events.

The reinsurance industry is very competitive in many parts and will likely remain so unless there are further substantial market loss events. Competition is especially intense as the market is currently

experiencing over capacity, a trend which we expect to continue for at least the next 12 months. Furthermore, the nature and breadth of the business we write means we are exposed to regulatory, legislative and fiscal changes, economic factors and changes in behaviour, as well as catastrophe events.

The resulting key underwriting and reserving risks identified by management are:

- Reserve Risk: The risk of loss, or adverse change, in the value of insurance liabilities due to the occurrence, amount, and timing of claims, inadequate pricing and provisioning assumptions.
- Pricing Risk: The risk of loss due to inadequate pricing of business pre-claim.
- Catastrophic Risk: The risk of loss from infrequent high severity claims from natural or man-made disasters.

C.1.2 Material Risk Concentrations

An identified risk to the Company is an inappropriate concentration of underwriting risks, through over-exposure to a particular geographic region, line of business / peril or cedant. The risk is monitored in the Risk Register and is managed through a number of controls, including the setting of exposure limits, modeling of CAT exposure and quarterly measurement and reporting of accumulations. Credit and Surety concentrations are limited at the portfolio level through monitoring of the maximum probable maximum loss per counterparty group. Single Realistic Disaster Scenario events at a 1 in-250 year return period are limited to less than 25% of shareholders' equity (net of expected reinsurance recoverables). After controls, the risk is considered low impact; therefore there is not considered to be material underwriting risk concentration.

C.1.3 Underwriting Risk Mitigations

ARE purchases Excess of Loss retrocession protection on particular programmes to mitigate the impact of catastrophic claims and/or to manage accumulations of risk. In addition, inter-company Quota Share reinsurance is in place to mitigate the impact of attritional losses. An inter-company Stop Loss agreement is also in place to help protect the overall underwriting result against pre-deterioration beyond a determined level.

In addition, underwriting risk is further mitigated through a number of controls and practices, which include the following:

- Business performance is monitored regularly, including consideration of market factors, pricing trends and strategic challenges
- Actual performance is compared against expected each quarter
- Treaties are subject to the four eye review principle – peer underwriter review ensures that guidelines are being adhered to
- The CAT Modelling Group validates the models and assumptions used for pricing and to analyse CAT exposures
- Audits are performed in respect of selected cedents/contracts periodically to review underwriting standards and claims files to ensure accuracy of cedents reporting to ARE and adherence to treaty terms and conditions
- Bi-annual European underwriting meetings occur in ARE, attended by all key underwriting staff, senior executives from ARE and representatives from ARL to review risk, claims and underwriting performance at contract level, movements and aggregation. Market conditions are also discussed.

- Quarterly Change Report ("QCR") meetings are held between the Underwriting, Finance and Actuarial teams to review development of treaties relative to expectations
- A quarterly IBNR memo from the HOAF documents known issues and underlying assumptions around loss reserves and is sent out to Executive Management
- An independent actuarial firm provide an annual review of ARE reserves.

C.1.4 Stress and Sensitivity Testing

Stress and scenario testing is carried out as part of the ORSA process, which is conducted at least annually. These tests consider moderate as well as extreme but plausible stresses and assess the impact on ARE's capital position.

We considered a number of scenarios in the ORSA which aim to reflect the underwriting and reserving risk to which the company is exposed.

Numerous Realistic Disaster Scenarios ("RDS") were devised in conjunction with underwriting teams across the various lines of business; these represent very adverse scenarios to which the company could be exposed. We also devised a scenario in which reserves are not adequate to meet the liabilities that arise, and therefore must be increased by 20%. The projected SCR and Own Funds were then calculated under each of these scenarios, allowing us to assess the capital impact of each scenario.

Due to the Company's capital strength, while the stresses showed deterioration in the Company's capital position, none of the modelled scenarios were considered likely to result in a breach of the SCR. The Company's underwriting risk profile is therefore considered to be resilient to most shocks.

C.2 Market risk

C.2.1 Key Market Risks

Market Risk is the risk of changes in income or values of assets arising from fluctuations in political and economic variables (systemic), including interest rates, currency exchange rates, equity markets, commodity markets and real estate markets. It is the risk of loss, or adverse change, resulting directly or indirectly from fluctuations in the prices of assets. Market Risk at ARE includes the following specific components:

- Currency Risk
- Interest Rate Risk
- Spread Risk
- Equity Risk
- Property Risk

Market Risk is also affected by:

- Concentration Risk: The risk that the Company will suffer losses from lack of diversification with regards to a particular sector, industry, geographic region, security, or asset class in the investment portfolio. Concentration Risk also includes the risk of failure to identify and manage correlation risk between insurance/reinsurance operations and invested assets.
- Investment Credit Risk: The risk of loss, or adverse change in financial condition, resulting from fluctuations in the credit standing of issuers of securities and counterparties to which

undertakings are exposed, in the form of counterparty default risk, or spread risk, or market risk concentration risk.

The Company's primary investment objective is to preserve capital and ensuring adequate liquidity for policyholder / cedant claims, while supplementing the return on equity ("ROE") generated by the reinsurance underwriting operations. The key market risks identified by management are:

- Failure or impairment of investment counterparty
- Exposure to foreign currency fluctuations

C.2.2 Material Risk Concentrations

ARE has a diversified portfolio of assets with no material risk concentrations in non-government securities. The Company's investment guidelines have specific single issuer limits, including sovereign and supranational single issuer limits, to prevent asset risk concentrations.

C.2.3 Market Risk Mitigations

ARE mitigates investment risk through the implementation of appropriate controls. These include:

- Regular Board and Senior Management oversight;
- Formal agreements which delegate investment authority to AIM;
- Investment Guidelines which are structured to ensure sufficient liquidity and prevent over-exposure to any one risk sector;
- Analysis of quarterly Investment Guideline compliance confirmations issued by Investment Managers, as summarized by ACSI personnel and reviewed by ARE;
- Quarterly review of investment portfolios with ARE Senior Management;
- Appropriate trade due diligence and guideline compliance;
- Utilisation of company approved brokers, investment managers and 3rd party service providers;
- Quarterly testing of Investment Guideline compliance and subsequent review with ARE Senior Management;
- Investment portfolio reporting from AIM to ARE Senior Management and the Board. This reporting includes performance and risk summaries, and includes duration analysis;
- Accounting reconciliations across holdings and risk data; and
- Linkage between ALM and the limits for asset classes, as approved by the Board and set out in this Investment Risk Policy.

C.2.4 Stress and Sensitivity Testing

A number of ORSA stress tests were performed to reflect the Company's exposure to Market Risk. Two economic crisis scenarios were devised – one reflecting an economic crisis centred in Europe, and another centred in the US.

In the Europe-centric scenario, we consider the impact of such a scenario on Trade Credit & Surety claims and exchange rate movements, along with the impact of interest rate movements on bond prices and technical provisions.

The US-centric scenario also considers Trade & Credit losses, interest rate movements and exchange rate movements. It also specifically models the effect of a US-crisis on the Company's holding in a US-based subsidiary of the Group.

Due to the Company's capital strength, while the modelled stresses would result in some deterioration in the Company's capital position, none of the scenarios were considered likely to result in a breach of the SCR. The Company's market risk profile is therefore considered to be resilient to most shocks.

C.2.5 Prudent Person Principle

ARE seeks to manage investment assets subject to the Prudent Person Principle which states that the Board must discharge its duties with the care, skill, prudence and diligence that a prudent person acting in a similar capacity would use in the conduct of an enterprise of similar character and objectives.

- The Board of ARE has outlined the following risk management objectives in order to minimise its exposure to Investment Risk in line with the overall ARE Risk Appetite:
    - ARE shall adopt a conservative approach to investments and seek to safeguard the assets of shareholders;
    - ARE shall hold sufficient investment values and investment liquidity to ensure all liabilities are met as they fall due; and,
    - ARE shall ensure that there are appropriate policies, strategies and procedures in place to meet these objectives.

ARE adopts a conservative approach to investments and, as articulated in the Company risk management philosophy, limits Investment Risk such that the overall portfolio will consist of high quality fixed income securities and bank deposits, and limits the proportion of total investments that may be represented by other investments. New investment products initiatives fall into the category of other investments and include investments such as equities and all alternative investments. Participation in new investment products are subject to Board approval. In circumstances where new products are being considered by the Company, the following steps will be undertaken:

- Detailed information will be provided describing the nature of the investment such that the Board has full information to properly evaluate the risk
- The finance function will document the impact of the new product, including an assessment of whether it complies with the prudent person principle
- A presentation will be made to the Board to explain the rationale for the proposed investment
- The Risk Committee will separately review the material and consider the impact on ARE's risk appetite and risk profile

If the proposed investment is approved, ARE's finance and compliance functions will liaise with AIM to revise or develop bespoke Investment Guidelines for the new product where appropriate. In certain circumstance, such as in the case of an investment in a fund, this may not be required.

C.3 Credit risk

C.3.1 Key Credit Risks

ARE has a low appetite for investment credit risk, which is recommended by ARE management and approved by the Board.

ARE is exposed to credit risk from the following sources:

- Investments in fixed income securities
- Deposits with banking counterparties
- Reinsurance counterparties
- Premiums collectable from cedants.

The key risk is that one or more of these counterparties fail.

The exposure to counterparty default risk includes banks where the Company has short term deposits, insured and insurance intermediary receivable balances and reinsurance agreements including the 85% quota share reinsurance agreement with ARL.

C.3.2 Material Risk Concentrations

As at December 31, 2017, the reinsurance recoverable from the quota share reinsurance agreement with ARL is significant however this mitigated by assets in trust to partially collateralise the net recoverable.

C.3.3 Credit Risk Mitigations

ARE mitigates credit risk through the implementation of appropriate controls, processes and procedures.

At purchase, securities must be rated investment grade by at least two of the following ratings agencies (if rated by all three): Moody's, Standard & Poor's or Fitch. If only two of the three agencies rate the security, the lower rating is used to determine eligibility. If only one of the three agencies rates a security, the rating must be Aa3/AA- or higher.

For the placement of time deposits, banks must be rated at least Al+ or equivalent by Standard & Poor's or Fitch and P-l or equivalent by Moody's at the time of purchase.

Reinsurance and premium receivables are closely monitored and controlled, with short credit periods mitigating any risk exposure. Furthermore, other than the inter-group Quota Share reinsurance, other reinsurance arrangements are split across a number of counterparties, thereby reducing single name exposure.

In addition, ARE requires many counterparties, including ARL, to post significant collateral against reinsurance balances, further mitigating this risk.

C.3.4 Stress and Sensitivity Testing

Due to the high level of reinsurance ceded, ARE is exposed to a material amount of counterparty default (credit risk). As one of the company's most material risks, a downgrade of the Company's immediate parent ("ARL") was considered as part of a Reverse Stress Test carried out in the ORSA, in conjunction with a number of other adverse scenarios occurring simultaneously. The aim of a reverse stress test is to devise a scenario which breaches the SCR.

When stressed on a standalone basis, the Company is able to withstand the shock of a downgrade in ARL's credit rating without breaching the SCR.

C.4 Liquidity risk

Liquidity risk is the risk of losses due to a lack of liquidity. Liquidity risk has low materiality for the Company. One of the objectives of the investment risk policy of the Company is that the Company shall hold sufficient investment values and investment liquidity to ensure all liabilities are met as they fall due. To achieve this objective, the investment risk appetite permits only highly rated securities to be purchased. Risk limits and tolerances have been also set in respect of (i) asset-liability duration matching and (ii) availability of liquid assets. These risk appetites, risk limits and tolerances are monitored by the risk function and reported to the Board and Risk Committee. The Company considers that the composition of its assets in terms of their nature, duration and liquidity are appropriate in order to meet its obligations as they fall due.

C.4.1 Risk Exposure and Material Risk Concentrations

The Company considers its exposure to this risk as low. The Company monitors its liquidity in compliance with its investment risk policy and stated limits and tolerances in respect of the percentage of assets which are invested in liquid investments.

C.4.2 Risk Mitigation

Liquidity risk is mitigated by the cash held in investments and bank accounts. There are no planned changes to risk mitigation over the business planning horizon.

C.4.3 Expected Profit in Future Premium

As of December 31 2017, the expected profit in future premium is €39.8m.

C.5 Operational risk

C.5.1 Key Operational Risks

Operational Risk means the risk of loss arising from inadequate or failed internal processes, or from personnel and systems, or from external events.

It also includes the risk of loss resulting from failure to comply with laws as well as prudent ethical standards and contractual obligations, and the exposure to litigation from all aspects of business activities.

Within Operational Risk, ARE also includes:

- Group Risk: Risks related to unregulated entities within the Group, implicit or explicit exposure to losses throughout the group (“contagion risk”), risks related to inter-company transactions and double gearing, the extent to which practical, legal, or regulatory barriers to the transfer of capital between group members exist, and other additional risks which individual members of a group face by virtue of their group membership.
- Strategic Risk: Risk that strategic business decisions prove to be ill-founded or poorly executed. Examples of such risk include mergers and acquisitions, moving into new markets, business lines, or regions, changes to the operating model, or failing to anticipate or react to a more general shift in the economic environment, demographics, etc.

- Reputational Risk: The potential adverse impact of an economic loss through deterioration of reputation, credibility or standing with coinsurance and MGA partners, other customers, brokers and the investor community.

ARE's management has identified the following key operational risks:

- Financial and/or non-financial (e.g. reputational) loss arising from over reliance on outsourced service providers.
- Legal, litigation, regulatory, political and reputational risk
- Reliance on key individuals (including directors and staff at outsourced service providers)
- Reliance on key brokers
- Inappropriate overall business strategy or inadequate monitoring of strategic decisions
- Risks external to ARE but internal to ACGL

Those risks classified under the Operational Risk profile have been identified, assessed and articulated in the ARE Risk Register. Relevant risk and control owners report to the Chief Risk Officer, who in turn reports to the Risk Committee, and are responsible for identifying new, emergent or changing risks and any consequent control changes required to realign the risks with the risk appetite.

With respect to Legal Risk, ARE's Compliance Officer has the responsibility for monitoring new and pending legislation from the CBI or Irish Government, the European Insurance and Occupational Pensions Authority ("EIOPA") and relevant bodies in other applicable jurisdictions for items that could potentially impact the Company.

In addition, applicable international risks are identified through discussions, meetings and memos with/from law and accounting firms within the jurisdiction of all ACGL entities.

C.5.2 Material Risk Concentrations

There is no material Operational Risk concentration.

C.5.3 Operational Risk Mitigations

ARE has put in place a strong internal control framework which mitigates operational risk. In particular, the following are key controls in managing this risk:

- Appropriate segregation of duties across all functions
- Systems access controls
- Four-eyes oversight of all key areas
- Regular management accounting process including reconciliations and checks
- Business Continuity and Disaster Recovery Plans
- All outsourced arrangements conducted under formal agreements and in accordance with the Outsourcing Policy
- Ongoing oversight and regular audits of outsourced service providers
- All material contracts reviewed by the ARL General Counsel on behalf of ARE
- Appropriate reporting to ACGL on all relevant matters to enable oversight
- Business plans and budgets reviewed quarterly
- Appropriate governance structures, including quarterly Board meetings

C.5.4 Stress and Sensitivity Testing

Operational risk is included in the Standard Formula. However, as part of its ORSA process, ARE also considers those areas of operational risk which may not be adequately covered, such as implementation and compliance with Solvency II and other relevant regulation, investment in subsidiaries and other group risks. In addition, operational risk is indirectly stress tested through other risks, such as a credit down-grade of the inter-company Quota Share partners.

Operational risk comprises a moderate part of ARE's risk profile and the stress tests prove the company's capital buffer to be sufficiently resilient to withstand this risk.

C.6 Other material risks

A number of other risks are considered to be relevant for the Company, namely group risk, strategic risk, regulatory risk and compliance risk. These risks have not been quantified but are included within the Own Risk and Solvency Assessment.

Risk Exposure and Material Risk Concentrations
The Company considers the most material exposures in this category of risk are (i) the potential for inappropriate business strategy and (ii) the potential for regulatory breaches.

Risk Mitigation
Risk controls, risk monitoring and reporting are considered to be the main method of risk mitigation. There are no planned changes to risk mitigation over the business planning horizon.

C.7 Any other information

No other material information to report as of 31 December 2017.

D.1 Assets

The table below sets out the value of the assets of the Company as at 31 December 2017 under Solvency II and Irish GAAP, along with equivalent values as at 31 December 2016.

Assets	2017 Solvency II €'000	2017 Irish GAAP €'000	2016 Solvency II €'000	2016 Irish GAAP €'000
Reinsurer's Share of Technical Provisions	506,763	662,991	367,760	521,391
Deferred Tax Asset	6,040	24	11,948	9
Investments (including accrued interest & cash)	399,197	399,197	340,738	340,738
Holdings in related undertakings	316,386	334,915	315,176	354,732
Insurance and intermediaries receivable	12,553	126,292	21,778	109,822
Deposits to Cedants	19,307	19,135	17,267	17,267
Other assets and non-insurance receivables	11,719	11,854	10,594	10,594
Deferred Acquisition Costs	-	35,818	-	31,409

Note that 'Deposits to Cedants' differ by €0.172m, which is the amount of negative withheld funds, which are displayed as a liability on the Solvency II balance sheet, but netted against the asset on an Irish GAAP basis.

The following are the bases, methods and main assumptions used for valuation of each material class of assets for Solvency II purpose.

D.1.1 Deferred tax assets

Deferred tax assets are the temporary differences arising between the tax bases of assets and liabilities and their carrying amounts under Solvency II. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and that are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred income tax assets and liabilities are offset if there is a legally enforceable right to set off current tax assets against current tax liabilities and if they relate to income taxes levied by the same taxation authority on the same taxable entity.

D.1.2 Holdings in related undertakings

As at December 2017, the Company has two holdings in related undertakings; a 10% holding in Arch Capital Group (U.S.) Inc. ("ACGI"), valued at €256.1m, and a wholly owned subsidiary, Arch Insurance Company (Europe) Limited ("AICE"), valued at €60.3m.

These valuations are based, in the case of AICE, on their solvency II excess of assets over liabilities whilst for ACGI the valuation is based on their economic balance sheet prepared on a solvency II equivalent basis for Bermuda Monetary Authority ("BMA") statutory reporting purposes. The BMA regime has been accepted as Solvency II equivalent by EIOPA.

D.1.3 Investments (other than holdings in related undertakings)

Investments have been valued in accordance with Irish GAAP's fair value model. The Company's investments are managed by Arch Investment Management Limited. The Company receives quarterly report detailing the underlying securities held in the fund. The quarterly reports are reviewed to ensure average financial strength ratings and durations have not moved significantly since the previous quarter. Any unusual movements or discrepancies are discussed with the fund managers. This information is presented to the Group Investment Committee every quarter.

The investments are valued at fair value under Irish GAAP and Solvency II based on market prices at the reporting date, which are quoted prices in active markets for identical assets. Where there are no quoted prices available, the fair value is determined using inputs that are observable for the assets.

There is an amount of €10.2m for an unlisted equity that has been valued using the alternative valuation method in accordance with Solvency II. The Directors have used the equity valuation method, being the closest to the fair value of this equity.

The valuation of investments is consistent with the accounting valuation under Irish GAAP.

D.1.4 Deposits to Cedants

These balances are valued at fair value reflecting the amount held at 31 December 2017, translated at the closing exchange rate for balances not denominated in the reporting currency. No estimates or judgements are required in the valuation.

There has been no change in the recognition and valuation basis during the period and there are no differences between the valuation for Solvency II and the GAAP valuation.

D.1.5 Insurance and intermediaries receivables

Insurance and intermediaries receivables balance represents premiums owed by cedants. Outstanding premiums are valued at fair value and due to the short-term nature of the receivable no adjustments to valuation are required. The valuation of insurance and intermediaries receivables is consistent with the accounting valuation under Irish GAAP except that the share of insurance and intermediaries balances which are not yet due at the valuation date are deducted from the balance and included in the technical provisions cashflow.

D.1.6 Cash and cash equivalents

The Company's cash holdings are held in major currencies, which are EUR, GBP, USD and CHF, comprising a mix of bank deposits and cash funds. The non-EUR balances are translated into EUR at the balance sheet closing rate.

Cash and cash equivalents are valued at fair value by the relevant financial institution, and the Company receives monthly statements at the period end to confirm the balances held. There are no significant estimates or judgements used in valuing cash holdings due to the nature of the asset.

There has been no change in the recognition and valuation basis during the period and the valuation of cash and cash equivalents under Solvency II is consistent with the accounting valuation under Irish GAAP.

D.1.7 Other assets and non-insurance receivables

Other assets and non-insurance receivables have been valued using the alternative valuation method in accordance with Solvency II. The Directors have used the cost approach or current replacement cost approach, being the closest to the fair value of these assets.

The valuation of other assets and non-insurance receivables is consistent with the accounting valuation under Irish GAAP, apart from goodwill which is recognised on an Irish GAAP basis, but not on a Solvency II basis.

The following are the material differences in valuation of assets between Solvency II and financial statements prepared in accordance with Irish GAAP that are not already explained in the previous sections.

D.1.8 Deferred acquisition costs / Goodwill

In the financial statements, acquisition costs which represent commission and other related expenses are deferred over the year in which the related premiums are earned. To the extent that acquisition costs are deferred and considered irrecoverable against the related unearned premiums, they are written off to net operating expenses as incurred.

Solvency II balance sheet is prepared based on the best estimate of future cash flow basis. Therefore, deferred acquisition costs are being excluded from the Solvency II balance sheet.

Goodwill recognized under Irish GAAP is similarly excluded from the Solvency II balance sheet.

D.2 Technical provisions

D.2.1 Results summary

The following table sets out the Solvency II technical provisions by grouping as at 31 December 2017.

31 December 2017 Net of Retrocession and inter-company Quota Share	Claims Provisions (€'000)	Premium Provisions (€'000)	Risk Margin (€'000)	Solvency II Technical Provisions (€'000)
Accident & Health Reinsurance	1,854	(1,697)	8,967	**9,123**
Property Reinsurance	6,448	(11,921)	14,107	**8,635**
Liability Reinsurance	7,117	(177)	1,240	**8,180**
Credit & Surety Reinsurance	9,272	254	5,415	**14,941**
Non-Proportional Reinsurance	46,521	(23,222)	30,359	**53,658**
Grand Total	71,212	(36,763)	60,088	**94,537**

For comparison purposes, the following table sets out the Solvency II technical provisions by grouping as at 31 December 2016.

31 December 2016 Net of Retrocession and inter-company Quota Share	Claims Provisions (€'000)	Premium Provisions (€'000)	Risk Margin (€'000)	Solvency II Technical Provisions (€'000)
Accident & Health Reinsurance	2,186	(3,486)	18,306	**17,006**
Property Reinsurance	5,451	(5,192)	11,361	**11,620**
Liability Reinsurance	9,072	(7,921)	3,809	**4,960**
Credit & Surety Reinsurance	11,390	162	10,201	**21,753**
Non-Proportional Reinsurance	42,366	(25,255)	48,545	**65,656**
Grand Total	70,465	(41,691)	92,222	**120,995**

The groupings above are made up of the following Solvency II Lines of Business:

LoB Grouping	Solvency II Line of Business
Accident & Health Reinsurance	Medical Expense Income Protection
Property Reinsurance	Other Motor Fire and other damage to property Marine, Aviation & Transport
Liability Reinsurance	Motor Vehicle Liability General Liability
Credit & Surety Reinsurance	Credit & Suretyship
Non-Proportional Reinsurance	NP Health reinsurance NP Casualty Reinsurance NP Property Reinsurance

D.2.2 Calculation Methodology

Under Solvency II an economic balance sheet is required – which requires a market valuation of technical provisions. The overarching principle for valuing technical provisions under Solvency II is the current amount undertakings would have to pay if they were to transfer their (re)insurance obligations immediately to another undertaking.

The starting point for valuing the Company's Technical Provisions (TPs) is the Company's Irish GAAP basis reserves for loss and allocated loss adjustment expenses (Loss Reserves). Cash flows associated with those Loss Reserves, along with unearned premium reserves and provisions for other components of economic basis TPs, are calculated for each homogenous risk group using the approach outlined below.

(a) Best Estimate Liability

The best estimate liability ("BEL") is calculated from the cashflows in respect of the claims provisions and premium provisions. The best estimate liability represents the present value of future cashflows. The present value is calculated based on the timing of cashflows and on yield curves provided by EIOPA. The best estimate liability is determined on a gross, ceded and net basis for both the claims provisions and the premium provisions.

(b) Premium Receivable

Premium receivable in respect of the portion of the GAAP premium receivable not yet due on the valuation date is included in the premium provisions cashflows. A consistent approach is applied to calculation of ceded premium payable.

(c) Premium in respect of Bound But Not Yet Incepted Business

The Company's technical provision calculation allow for business that is bound but not yet incepted ("BBNI") at the valuation date.

The premium provisions include the future premium cashflows in respect of the BBNI business up to the relevant contract boundary.

(d) Future loss and allocated loss adjustment expense

Future loss and allocated loss adjustment expense cashflows are projected in respect of the GAAP Loss Reserves in order to calculate claims provisions. The Company does not consider that there are any implicit or explicit margins in the GAAP Loss Reserves.

Future loss and allocated loss adjustment expense cashflows are projected in respect of the GAAP unearned premium reserves and BBNI premium in order to calculate premium provisions. The projection uses business planning assumptions in respect of future loss ratios on unearned premium reserves and not yet incepted business.

(e) ENIDs

The Solvency II technical provisions must allow for events not in data ("ENIDs"). An ENID loading has been derived by the Company using a truncated distribution approach and is applied to future claim cashflows in both the claims provisions and premium provisions.

(f) Expenses

Acquisition costs directly attributable to the future premium receivable are determined based on the terms of the contracts which generate the premium receivable.

In addition, an allowance for unallocated loss adjustment expenses, administrative expenses and investment management expenses associated with the settlement of the best estimate liabilities is included in the technical provisions.

(g) Adjustment for counterparty default

An adjustment for counterparty default is applied to the ceded technical provisions. The adjustment for counterparty default uses the Probability of Default ("PD") consistent with the Credit Quality Steps specified in EIOPA guidance in respect of the AM Best financial strength rating for reinsurance counterparties.

(h) Risk Margin

The Risk Margin is calculated based on the Level 3 of Simplifications in the EIOPA guidance which projects future SCR values based on the assumption that the SCR to Net BEL ratio is constant through time. A ratio of SCR to Net BEL is determined as of the valuation date. This ratio is applied to future BEL estimates at each 1 year interval until liabilities are fully runoff to estimate future SCR requirements. A 6% cost of capital is applied to all SCR estimates though time to estimate the cost of capital to support the liabilities. The resulting series of costs of capital requirements are present valued to the valuation date using the yield curve for the reporting currency of the company with a 1-year lag per the EIOPA guidance material.

D.2.3 Material Changes since Last Reporting Period

There has been no change in the calculation methodology for technical provisions since the last reporting period.

D.2.4 Impact of Reinsurance

The held provisions for Solvency II correspond to the probability-weighted average of all future cash flows including cash flows recoverable from reinsurance contracts and special purpose vehicles. This takes account of the time value of money, using the relevant risk-free interest rate, and the adjustment for the expected losses due to the default of the counterparty (i.e. bad debt).

Recoverables from reinsurance contracts are shown separately on the asset side of the balance sheet (as "recoverables from reinsurance contracts"). Recoveries due on settled claims do not sit within the technical provisions, i.e. those where collection notes have been sent out but not received – reinsurance receivables.

Calculation of amounts recoverable from reinsurance contracts are performed under the same principles as for calculation of the gross best estimate. Risk margins are not required in respect of reinsurance and special purpose vehicle recoverables, as risk margins are calculated at a net level.

Gross and net best estimate reserves are estimated separately for each underwriting year. Reinsurance cash flows are then derived as the difference between gross and net cash flows.

Reserves are calculated on both gross and net (post internal quota share) bases. The net figures are produced in two stages:

- Firstly applying all external reinsurance; and
- Secondly applying the intercompany quota share (85% placement).

Cash inflows stemming from ceded reinsurance income are calculated as a factor of net premiums.

In addition, the principle of correspondence underlying the calculation of reinsurance recoveries is also considered, as set out in the next section.

D.2.5 Level of Uncertainty

Uncertainty in technical provisions arises from a number of sources:

- The estimates for outstanding losses are based on known information at the balance sheet date. Ultimate settlement of these claims may differ from these estimates
- The estimates for future losses on both expired and unexpired business are based on actuarial assumptions reflecting past performance and anticipated future changes. These assumptions may ultimately prove to differ from actual experience
- The estimates for expenses are based on reasonable judgement reflecting past experience and on assumptions as to the run-off period. Either of these factors may differ from ultimate experience
- Events not in data are, by their nature unpredictable and any allowance made could prove to be over-prudent or insufficient

The Company follows a robust process in setting appropriate assumptions underlying the calculation of technical provisions. Actual performance is monitored against expectations on an ongoing basis to ensure assumptions are updated as required.

Stress testing was performed on the Solvency II Technical Provisions as at 31st December 2017 in order to give an indication of sensitivity around loss ratio assumptions.

The following table shows net Best Estimate of Liabilities (ie the claims provision and premium provision, but not including the Risk Margin) in stressed scenarios (losses 5% and 10% higher than expected).

	Base Case (€'000)	Losses +5% (€'000)	Losses +10% (€'000)
Net Best Estimate Liabilities	34,449	38,757	47,603
Impact		4,309	13,155

The above results of sensitivity testing should be considered in the context of the Company's solvency profile. As at December 31st 2017, the Company's SCR was €215.4m, against which it held eligible own funds of €446.7m, equating to SCR coverage of 207%. Without considering the impact on SCR, the more extreme of the scenarios above (losses 10% higher than expected), would reduce the SCR coverage ratio to 201%.

D.2.6 Material Differences between Irish GAAP and Solvency II

Whilst some of the approaches and techniques applied under Solvency II are similar to those followed under the existing Irish GAAP rules, there are other rules where there will be significant changes. These include:

- Movement to a cash flow basis for valuation of both gross business and reinsurance;
- Removal of any implicit or explicit margins within technical provisions to give a "true best estimate" for solvency purposes, defined as the mean of the full range of possible future outcomes;

- Introduction of the valuation of very low probability extreme events including latent claims, referred to as an allowance for "events not in data" or ENIDs;
- Removal of the requirements to hold an unearned premium reserve and to allow for other non-monetary items. These are replaced by "premium provisions", valued on a best estimate basis. This also includes a requirement to take account of all future premium cash inflows;
- Movement to recognising contracts on a "legal obligation basis". This will mean the inclusion of business currently not valued as part of technical provisions – for example 1 January renewals entered into prior to a 31 December valuation;
- Introduction of discounting of cash flows, leading to increased volatility in reserves;
- Introduction of the principle of a market consistent basis and calculation of a "risk margin"; and
- Valuation of liabilities segmented by at least Solvency II lines of business.

D.2.7 Other Comments

The Company does not apply the matching adjustment referred to in Article 77 b of Directive 2009/138/EC, the volatility adjustment referred to in Article 77 d of Directive 2009/138/EC, the transitional adjustment to the risk-free interest rate term structure referred to in Article 308 c of Directive 2009/138/EC, or the transitional deduction referred to in Article 308 d of Directive 2009/138/EC.

Due to the nature of the business and the low level of materiality in respect of policyholders opting to lapse, no lapse assumption has been applied to future premium in the calculation of technical provisions.

Future management actions are not considered relevant for this business.

D.2.8 Irish GAAP to Solvency II Comparison

The table below sets out the movement analysis between Irish GAAP and Solvency II for the Company as at 31 December 2017:

2017 Technical Provisions GAAP to Solvency II	Gross €'000	Ceded €'000	Net €'000
Claims Provisions	574,424	503,212	71,212
Premium Provisions	(33,212)	3,551	(36,763)
Risk Margin	60,088	-	60,088
Solvency II Technical Provisions	**601,301**	**506,763**	**94,537**
GAAP Reserves (including ULAE)	586,163	523,897	62,267
Remove margins	-	-	-
Allowance for ENID	7,572	6,798	773
Change of Expense Basis	11,677	-	11,677
Adjustment for Counterparty Default	-	(234)	234
Reinsurance Receivables/Payables	-	-	-
Discounting impact	(30,988)	(27,250)	(3,738)
Currency Revaluation	-	-	-
Solvency II Claims Provisions	**574,424**	**503,212**	**71,212**
GAAP Reserves (Unearned Premium)	153,341	139,094	14,247
Remove Unearned Premium Reserve	(153,341)	(139,094)	(14,247)
Future Premium (net of Acquisition Costs)	(165,044)	(113,950)	(51,094)
Future Losses and ALAE	242,018	212,130	29,889
Remove margins	-	-	-
Allowance for ENID	3,360	2,936	422
Change of Expense Basis	4,840	-	4,840
Adjustment for Counterparty Default	-	(73)	73
Premium Receivables	(107,798)	(86,876)	(20,920)
Reinsurance Receivables/Payables	-	-	-
Discounting impact	(10,588)	(10,616)	28
Solvency II Premium Provision	**(33,212)**	**3,551**	**(36,763)**

The movement from Irish GAAP basis reserves and Solvency II Technical Provisions applies in the same manner for each Line of Business.

For comparison purpose, the table below sets out the GAAP to Solvency II movement as at 31 December 2016:

2016 Technical Provisions GAAP to Solvency II	Gross €'000	Ceded €'000	Net €'000
Claims Provisions	449,901	379,436	70,465
Premium Provisions	(53,368)	11,677	(41,692)
Risk Margin	92,222	-	92,222
Solvency II Technical Provisions	**488,755**	**367,760**	**120,995**
GAAP Reserves (Losses and ALAE)	466,387	406,263	60,124
Remove margins	-	-	-
Allowance for ENID	6,018	5,203	815
Change of Expense Basis	11,035	0	11,035
Adjustment for Counterparty Default	-	(214)	214
Reinsurance Receivables/Payables	-	-	-
Discounting impact	(31,797)	(26,742)	(5,055)
Currency Revaluation	-	(3,583)	3,583
Remove booked ULAE	(1,742)	(1,491)	(251)
Solvency II Claims Provisions	**449,901**	**379,436**	**70,465**
GAAP Reserves (Unearned Premium)	132,029	(115,128)	16,901
Remove Unearned Premium Reserve	(132,029)	115,128	(16,901)
Future Premium (net of Acquisition Costs)	(198,757)	139,861	(58,896)
Future Losses and ALAE	250,563	(219,072)	31,491
Remove margins	-	-	-
Allowance for ENID	3,379	(2,949)	430
Change of Expense Basis	5,011	-	5,011
Adjustment for Counterparty Default	-	103	103
Premium Receivables	(88,044)	70,708	(17,336)
Reinsurance Receivables/Payables	-	-	-
Discounting impact	(25,520)	23,026	(2,494)
Solvency II Premium Provision	**(53,368)**	**11,677**	**(41,691)**

D.3 Other liabilities

The table below sets out liabilities other than technical provisions on the Solvency II balance sheet as at year-end 2017 and 2016:

Other Liabilities	2017 Solvency II €'000	2017 Irish GAAP €'000	2016 Solvency II €'000	2016 Irish GAAP €'000
Deposits from Reinsurers	4	4	169	4
Insurance & intermediaries payables	10,217	10,217	14,923	14,923
Reinsurance payables	187,494	280,312	152,898	225,199
Payables (trade, not insurance)	3,327	3,328	4,216	4,217
Ceded deferred excess commission	-	14,879	-	11,786
Ceded deferred acquisition costs	-	30,452	-	25,648
Payables (securities)	22,797	22,797	-	-
Any Other Liabilities, not elsewhere shown	172	-	0	-
Total Other Liabilities	224,012	361,990	172,206	281,777

Note that 'Any Other Liabilities, not elsewhere shown' as at year-end 2017 comprises negative withheld funds, as discussed in Section D.1 above.

The following are the bases, methods and main assumptions used for valuation of each material class of other liabilities for Solvency II purpose.

D.3.1 Reinsurance payables

Reinsurance payables balance represents amounts payable to reinsurers in respect of ceded premiums. Reinsurance payables are valued at fair value. The valuation of reinsurance payables is consistent with the accounting valuation under Irish GAAP except that the share of reinsurance balances which are not yet due at the valuation date are deducted from the balance and included in the technical provisions cashflow.

D.3.2 Payables (trade, not insurance)

The valuation of payables (trade, not insurance) is consistent with the accounting valuation under Irish GAAP.

D.3.3 Deferred ceded acquisition costs

In the financial statements, ceded acquisition costs which represent commission and other related expenses are deferred over the year in which the related reinsurers' share of premiums are earned. To the extent that ceded acquisition costs are deferred and considered irrecoverable against the related reinsurers' share of unearned premiums, they are written off to net operating expenses as incurred.

Solvency II balance sheet is prepared based on the best estimate of future cash flow basis. Therefore, deferred ceded acquisition costs are being excluded from the Solvency II balance sheet.

D.3.4 Insurance and Intermediaries Payables

The valuation of Insurance and Intermediaries payables is consistent with the accounting valuation under Irish GAAP.

D.4 Alternative methods for valuation

As previously stated, (i) unlisted equities in the investment portfolio and (ii) other assets and non-insurance receivables have been valued using the alternative valuation method in accordance with Solvency II.

D.5 Any other information

The Company has a number of risk management policies in place that aim to protect the balance sheet against various risks. These include the investment risk policy and underwriting and reserving risk policy. Further information on the Company's risk management is provided in Section B above.

No other material information to report as of 31 December 2017.

E.1 Own Funds

E.1.1 Management of Own Funds

The Company has adopted a capital management policy setting out the methodology and procedures to provide oversight of the Company's own funds. The strategic objectives articulated in the capital management policy are (i) to ensure compliance with the Company's regulatory capital requirements, (ii) to manage and allocate capital efficiently to achieve sustainable returns and facilitate growth objectives as articulated in the Company's business plans; and (iii) to ensure access to capital markets on competitive terms, so that the Company's overall cost of capital is minimised. To achieve these objectives, the Company strives to maintain capital levels that are consistent with its risk appetite, corporate strategy and statutory minimum requirements, at both a point in time and on a forward looking basis. The Company's time horizon for business planning is one year, however the capital planning horizon spans three years.

The Company has adopted a capital management plan which is reviewed annually and sets out the methodology and procedures to provide oversight of the Company's own funds. The capital management plan articulates solvency capital thresholds, corrective actions to be taken if the thresholds are reached and potential sources of capital for the Company and their estimated timeframe of realisation.

High level roles and responsibilities in relation to capital management activities are outlined below.

- Board: Sole responsibility for approving the capital management policy and plan. Overall responsibility for monitoring capital management.
- Risk Committee: Reviews the capital management policy and plan and makes recommendations to the Board. Reviews and monitors the key capital management metrics and tolerances and presents key capital management information to the Board on an ongoing basis.
- Audit Committee: Responsible for aligning the investment strategy with the capital management policy and plan, and ensuring an appropriate level of funds are available to meet the Company's obligations in a timely manner and at a reasonable cost.
- Finance Function: Responsible for producing the reports necessary for appropriate monitoring that the capital management policy is being followed and monitoring execution of the capital management plan.
- Risk Management Function. Responsible for maintaining and developing the capital management policy and plan, and for maintaining the SCR and MCR calculations.

In the event that the ongoing monitoring indicates that Company's capital position is outside of risk appetite, corrective actions shall, as deemed appropriate, be taken. Proposed corrective actions shall be initiated by the Finance Function, after receiving approval from the Board on the appropriate corrective action to be taken.

The Company has identified management actions which would provide capital relief if required:

- Restricting line sizes / product redesign / repricing
- Discontinue / Run off certain lines of business

Estimated timeframe for realization of relief from the management actions is six months.
Other potential sources of capital which the Company has identified are:

- Additional capital sourced from Group through contributed capital, capital loan or additional reinsurance arrangements.
- Capital sourced from outside parties, e.g. merger, private equity.

Estimated timeframe for realization of relief from the potential sources of capital from the Group is 1 month. Estimated timeframe for realization of relief from outside parties is three months to one year.

There have been no material changes to capital management during 2017.

E.1.2 Classification of Own Funds

The Company's own funds consist mostly of Tier 1 own funds, along with a small amount of Tier 3 own funds (deferred tax asset). Tier 1 funds are comprised of paid-in ordinary share capital, share premium account related to ordinary share capital, reconciliation reserve and other own funds (investments in related undertakings).

Composition of Own Funds	Year Ended 31/12/2017				Year Ended 31/12/2016			
Own Funds (€'000)	**Total**	**Tier 1**	**Tier 2**	**Tier 3**	**Total**	**Tier 1**	**Tier 2**	**Tier 3**
Paid-in ordinary share capital	50,000	50,000			50,000	50,000		
Share premium account related to ordinary share capital	24,341	24,341			24,341	24,341		
Reconciliation Reserve:	235,202	235,202			206,940	206,940		
Net Deferred Tax Assets	6,040			6,040	11,948			11,948
Other Own Fund items approved by the CBI	131,070	131,070			131,070	131,070		
Total Own Funds	**446,653**	**440,613**		**6,040**	**424,299**	**412,351**		**11,948**

The reconciliation reserve equals the excess of assets over liabilities less other own funds items as at the reporting date and represents retained earnings less adjustments from GAAP to Solvency II valuation.

The difference between the equity shown in the Company's financial statements and the excess of the assets over liabilities as calculated for solvency purposes arises due to differences in valuation of technical provisions and other items outlined in the subsections below.

E.1.3 Terms and Conditions of Own Funds

There is no restriction on the availability or transferability of the own funds.

E.1.4 Differences in Own Funds between Financial Statements and Solvency II Valuation

The difference between the equity shown in the Company's financial statements and the excess of the assets over liabilities as calculated for solvency purposes arises due to the valuation of technical provisions, the ineligibility of the deferred acquisition costs (and deferred ceded acquisition costs) and goodwill, the adjustment to the deferred tax asset, the valuation of payables and receivables and differences in the valuation of investments in related undertakings.

Differences in Own Funds (Euro in thousands)	**Year Ended 31/12/2017**	**Year Ended 31/12/2016**
Equity shown in Financial Statements	488,733	507,870
Technical Provisions Valuation	(18,024)	(43,970)
Payables & Receivables	(20,921)	(17,336)
Economic Valuation of Investments in Subsidiaries	(18,529)	(39,556)
Goodwill	(136)	(668)
Deferred Acquisition Costs Eligibility	9,514	6,026
Deferred Tax Asset Adjustment	6,015	11,939
Other	0	(6)
Excess of Assets over Liabilities for solvency purposes	**446,653**	**424,299**

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.1 Calculation of SCR and MCR

In respect of the calculation of the SCR and MCR:

- The Company uses the Standard Formula.
- Undertaking specific parameters are not used.
- No capital add-ons are applied to the SCR figures.
- The simplifications outlined in Articles 107, 108, 110, 111 and 112 Commission Delegated Regulation (EU) 2015/35 apply to the Counterparty default risk sub-module.
- No simplifications have been used in the other risk sub-modules.
- The MCR is calculated based on the Linear MCR based on the net of reinsurance best estimate technical provisions and the net written premiums in the last 12 months. Then a floor of 25% of the SCR and a cap of 45% of the SCR is applied with an absolute floor of €3.6m also applied to derive the final MCR requirement.

As at 31 December 2017, the SCR is €215.4m. A breakdown of SCR by risk category is set out in the following table:

Risk Category	2017 SCR (€'000)	2016 SCR (€'000)
Market risk	195,917	182,863
Counterparty default risk	24,612	26,569
Life underwriting risk	-	-
Health underwriting risk	8,854	10,689
Non-life underwriting risk	57,857	51,862
Diversification	(57,253)	(56,073)
Basic Solvency Capital Requirement	**229,986**	**215,910**
Operational risk	16,236	11,896
Loss-absorbing capacity of deferred taxes	(30,778)	(28,476)
Solvency Capital Requirement	215,445	199,330

There has been no material change to the Company's SCR and MCR during 2017.

As at 31 December 2017, the MCR is €53.9m. The calculation of MCR is set out in the following table:

MCR Calculation		
Line of Business	**Net of Reinsurance Best Estimate TPs**	**Net written premiums last 12 months**
Medical expense	156	3,801
Income protection	0	2
Motor vehicle liability	214	115
Other motor	-	3,108
Marine, aviation and transport	100	68
Fire and other damage to property	1,270	6,347
General liability	6,726	340
Credit and suretyship	9,526	7,876
Non-proportional health reinsurance	5,488	3,948
Non-proportional casualty reinsurance	16,418	10,610
Non-proportional property reinsurance	1,393	3,682
Linear MCR		11,611
SCR		215,445
Combined MCR		53,861
Absolute Floor of the MCR		3,600
Minimum Capital Requirement		**53,861**

E.2.2 SCR ratio and MCR ratio

As at 31 December 2017, the ratio of eligible own funds to SCR and MCR are outlined in the table below.

Solvency Coverage	2017 (€'000)	2016 (€'000)
Total eligible own funds to meet the SCR	446,653	424,299
Total eligible own funds to meet the MCR	440,613	412,351
SCR	215,445	199,330
MCR	53,861	49,832
Ratio of Eligible own funds to SCR	**207%**	**213%**
Ratio of Eligible own funds to MCR	**818%**	**827%**

E.3 Use of the duration-based equity risk sub-module in the calculation of the SCR

The duration-based equity risk sub-module is not used in the calculation of the SCR.

E.4 Differences between the standard formula and any internal model used

Not applicable.

E.5 Non-compliance with the MCR and non-compliance with the SCR

The Company complies with the Solvency Capital Requirement and Minimum Capital Requirement during 2017.

E.6 Any other information

No other material information to report as of 31 December 2017.

Attached are the public QRTs required as part of the report. We note in some cases totals do not match the sum of individual fields due to rounding.

There are nominal differences between Paid claims in S.19.01 and paid claims under GAAP due to difference in the recognition of the effect of exchange rates.
