E.4 Internal model information. 40
E.5 Non compliance with the Minimum Capital Requirement and significant .....

NON-COMPLIANCE WITH THE SOLVENCY CAPITAL REQUIREMENT. 40
E.6 ANY OTHER INFORMATION 40

Executive Summary

The new, harmonised EU-wide regulatory regime for Insurance Companies, known as Solvency II, came into force with effect from 1 January 2016. The regime requires new reporting and public disclosure arrangements to be put in place by (re)insurers. This document is the second version of the Solvency and Financial Condition Report ("SFCR") that is required to be prepared by Brown Reinsurance dac (''the Company').

This report covers the Business and Performance of the Company, its System of Governance, Risk Profile, Valuation for Solvency Purposes and Capital Management.

Company Background

Brown Reinsurance dac is a company incorporated in Ireland and is authorised by the Central Bank of Ireland as a composite reinsurance undertaking in accordance with the provisions of the European Union (Insurance and Reinsurance) Regulations.

The principal activity of the Company, which is ultimately a wholly owned subsidiary of United Parcel Service of Ireland Limited, is the provision of life, employee benefits, disability and accident and health insurance for the United Parcel Service, Inc. group of companies.

Business and Performance

The Company has a balance on the technical account for life and non-life insurance business of €1.1m for the financial year ended 31 December 2017 (2016: €2.7m). The directors consider both the level of business and the year-end financial position to be satisfactory.

The Company's assets are prudently invested, providing access to funds at short notice taking into account the liquidity requirements of the business and the nature and timing of insurance liabilities.

System of Governance

The Company is subject to the the Central Bank of Ireland's Corporate Governance Requirements for Captive Insurance and Captive Reinsurance Undertakings 2015. The corporate governance principles of the Company are implemented via the following Corporate Governance Framework:

- Board of Directors
- Outsourced Service Providers
- Internal Control Framework
- Risk Management Framework
- Compliance Function
- Audit – Internal & External

Outsourced Activities

The following is a list of the important outsourced operational functions together with the jurisdiction in which the service providers of such functions or activities are located:

Critical Outsourcing Arrangements				
Outsourced Provider	**Service Outsourced**	**Internal/External**	**Jurisdiction**	**Outsourcing Oversight**
Marsh Management Services (Dublin) Limited	Captive Manager	External	EU	Chairman (PCF-3)
	Compliance Function			
	Internal Audit Function			
	Risk Management Function			
KPMG	Head of Actuarial Function	External	EU	

Risk Profile

The following table outlines the material risks to which the Company is exposed as well as the undiversified capital charge associated with the risks.

Risk	Capital Charge € '000 2017	Capital Charge € '000 2016
Market Risk	1,338	1,099
Counterparty Default Risk	2,068	2,017
Health Underwriting Risk	3,786	2,803
Life Underwriting Risk	3,002	3,200

These risks are described in further detail in Section C of this report.

Valuation for Solvency Purposes

The Company assets and liabilities, under Solvency II methodology, are valued at best estimate. This differs in some respects from the GAAP valuations for financial statements. In particular, the technical provisions for the Solvency II balance sheet represent the present value of future claim payments. A risk margin is also included in technical provisions, which represents the cost of holding the solvency capital requirement. Section D of the SFCR shows the comparison between the Solvency II balance sheet and the Financial Statements.

Capital Management

The objective of own funds management is to maintain, at all times, sufficient own funds to cover the SCR and MCR with an appropriate buffer. As part of own funds management, the Company prepares ongoing annual solvency projections and reviews the structure of own funds and future requirements. The business plan, which forms the basis of the ORSA contains a three year projection of funding requirements and helps focus actions for future funding.

The Company is a single shareholder entity whose ordinary shares are fully paid up. It has no debt financing nor does it have plans to raise debt or issue new shares capital over the three year time horizon used for business planning.

At the end of 2017, the Company had a surplus of assets over liabilities of €10.6million (2016: €9.8milliom) on a Solvency II valuation basis. The Company also has a regulatory approved ancillary own fund item which is valued at €3.6million, giving total available own funds to meet the SCR requirement of €14.2million. This compares to an SCR requirement of €7.3million (2016: €6.6million) and indicates a solvency cover ratio of 196% (2016: 148%). The MCR coverage ratio is 521% (2016: 527%).

A BUSINESS and PERFORMANCE

A.1 Business

A.1.1 Name and legal form of the undertaking

Brown Reinsurance dac (hereinafter "the Company") is incorporated in the Republic of Ireland and is a private company limited by shares.

A.1.2 Name of the Supervisory Authority responsible for the financial supervision of the undertaking

The Company is regulated by the Central Bank of Ireland (CBI). The CBI can be contacted at: Central Bank of Ireland, PO BOX 559, New Wapping Street, North Wall Quay, Dublin 1, Ireland.

A.1.3 External auditor of the undertaking

The independent auditors of the Company are:
Deloitte, Chartered Accountants & Statutory Audit Firm, Deloitte & Touche House, Earlsfort Terrace, Dublin 2.

A.1.4 Holders of Qualifying Holdings in the Undertaking

The Company is wholly owned by United Parcel Service of Ireland Limited, a company incorporated in Ireland.

A.1.5 Legal Structure of the Group

The ultimate parent undertaking is United Parcel Service, Inc. Group, a company incorporated in the United States of America.

A.1.6 Material lines of business and geographical areas

The Company is a composite reinsurance captive whose principal activity is the carrying out of reinsurance business for the United Parcel Service, Inc. group.

The Company operates worldwide.

A.1.7 Significant Business events during the reporting period

No material events occurred during the year that would merit disclosure.

A.2 Underwriting Performance

All premium revenue relates to reinsurance acceptance for both life and non-life risks from life, employee benefits, disability and accident and health insurance risks of the United Parcel Service of Ireland Limited Group.

The Company reinsures the following lines of business: private medical insurance and employee benefits. For the purposes of capital reporting these are categorised as:

Class of Business as per Irish GAAP	Solvency II Class of Business
Non-Life : Private Medical Insurance	Health (Non -Similar to Life) – Proportional Reinsurance
Employee Benefit – (Life)	Life Reinsurance
Employee Benefit – (Disability)	Health (Similar to Life) Reinsurance
Employee Benefit – (Accident)	Health (Similar to Life) Reinsurance

The Company has determined that the Euro ("€") is the functional currency.

The tables below show summaries of the technical (underwriting) account for the year ended 31 December 2017 by material Line of Business and Geographical area (based on Irish GAAP):

Underwriting performance by material Line of Business and Geographical areas (including aggregate performance).

Aggregate UW Performance	31/12/2017	31/12/2016
	€'000	€'000
Gross premiums written	16,606	12,127
Gross premiums earned	16,707	14,487
Gross claims incurred	(12,368)	(9,859)
Gross operating expenses	(3,205)	(1,919)

A.3 Investment Performance

A.3.1 Income and expenses arising by asset class

The Company has an investment strategy which complies with the requirements of "the prudent person principle".

As at 31 December 2017 the Company's investment portfolio comprised the following material asset classes:

Asset Class	31/12/2017		31/12/2016	
	Amount €'000	% of portfolio	Amount €'000	% of portfolio
Cash & cash equivalents	10,684	100%	6,891	100%
Total	**10,684**	**100%**	**6,891**	**100%**

The table below sets out the investment returns by asset class:

Asset Class	31/12/2017	31/12/2016
	Total €'000	Total €'000
Cash & cash equivalents	-	-
Total	**-**	**-**

All investments are in Euro and the interest rate return is low due to poor prevailing market rates for short term investments.

A.3.2 Gains and losses recognised directly in equity

No gains and losses have been recognised directly in equity.

A.3.3 Investments in securitisation

There are no investments in securitisation.

A.4 Performance of Other Activities

A.4.1 There have been no other significant activities undertaken by the company other than its reinsurance and related activities.

A.5 Any Other Information

There are no other material matters in respect of the business and performance of the Company.

B SYSTEM of GOVERNANCE

B.1 General information on the system of governance

B.1.1 Role and responsibilities of the administrative, management or supervisory body and key functions

The Company is classified as a Low Risk firm under the Central Bank of Ireland's risk-based framework for the supervision of regulated firms, known as PRISM or Probability Risk and Impact System and is subject to the Central Bank of Ireland's Corporate Governance Requirements for Captive Insurance and Captive Reinsurance Undertakings 2015 ("The Requirements").

Board of Directors:

The Company's Board of Directors carries responsibility for the effective, prudent and ethical oversight of the business and set it business strategy and risk appetite. The Board of Directors is also responsible for ensuring that risk and compliance are properly managed in the company.

The current composition of the Board of Directors is as follows:

Michael Fenlon (Chairperson)

Gary Barth

Patrick Power

Raoul Stewardson

Jochen Mueller

Silvana Osorio

Michael Kenny

Independent Control Functions:

The Company has established the four key control functions in line with Solvency II requirements: risk management, actuarial, compliance and internal audit. These functions, each possessing distinct responsibilities, are tasked with providing oversight of and challenge to the business and for providing assurance to the Board in relation to the Company's control framework.

Risk Management Function

The role of the Company's risk management function is to identify and evaluate the major risks facing The Company and to facilitate the implementation of the risk management system. Having considered the nature scale and complexity of the Company the Board have determined that the role of the Risk Manager can be carried out by a member of the Board.

The roles and responsibilities of the risk management function are set out within the risk management policy.

Compliance Function

In order to effectively monitor and report on The Company's requirement to be in compliance with all applicable laws and regulatory requirements the Board of Directors has outsourced the compliance function to the Captive Manager, Marsh Management Services (Dublin) Limited ("the Manager") and an employee of the Manager has been appointed as Compliance Officer. The Compliance Officer reports to the Board.

Actuarial Function

To ensure compliance with Solvency II obligations, the role of the Head of Actuarial Function ("HoAF") is outsourced to a third party provider. The HoAF reports to the Board.

Internal Audit Function

The internal audit function is outsourced to the Manager. The scope of internal audit activities includes the examination and evaluation of the effectiveness of the internal control, risk management and governance systems and processes of the entire licensed entity, including the Company's outsourced activities. The Internal Audit function reports to the Board.

B.1.2 Material changes in the system of governance that have taken place over the reporting period.

No material changes regarding the system of governance of the Company took place, aside from the fact that certain functions, including actuarial function, internal audit function and risk management functions were finalised and approved by the CBI in line with Solvency II requirements.

B.1.3 Remuneration policy for the administrative, management or supervisory body and employees

B.1.3.1 Remuneration policy for the administrative, management or supervisory body and employees

The Company does not have any employees. Day to day running of the Company is handled by the Manager under a third party administrative agreement.

Hence the Company's remuneration policy refers only to the remuneration of non-group executive directors should circumstances dictate that it is necessary to appoint external Executive Directors to the Board.

The Board of Directors of the Company includes Group Directors who are remunerated via their service agreements with United Parcel Service, Inc. Group companies.

B.1.3.2 Material transactions during the reporting period with shareholders, with persons who exercise a significant influence on the undertaking, and with members of the administrative, management or supervisory body

The Company is a composite reinsurance captive whose principal activity is the carrying out of reinsurance business for the United Parcel Service, Inc.

The Company did not enter into any transactions with key management personnel in the United Parcel Service, Inc. Group during the year ended 31 December 2017.

B.2 Fit and Proper requirements

B.2.1 Requirements for skills, knowledge and expertise

On 1 October 2010, Part 3 of the Central Bank Reform Act 2010 introduced a harmonised statutory system for the regulation by the CBI of persons performing Controlled Functions ('CFs') and Pre-Approval Controlled Functions ('PCFs') in regulated financial service providers.

On 1 December 2011 the CBI issued the Fitness & Probity Standards under Section 50 of the Central Bank Reform Act 2010 which all persons performing Controlled Functions or Pre-Approval Controlled Functions should, at a minimum, comply with.

Guidance for (Re)Insurance Undertakings on the Fitness & Probity Amendments 2015 further assist companies in complying with their obligations brought in by the Solvency II (European Union (Insurance and Reinsurance) Regulations 2015 S.I. 485 of 2015).

The Company has adopted a Fitness and Probity Policy (reviewed by the Board on an annual basis) with the purpose of ensuring that:

- persons holding key positions within the Company are assessed in terms of their fitness and probity in relation to a proposed role and on an ongoing basis;
- effective procedures are in place to undertake this assessment;
- the results of such an assessment are documented;
- the Board is satisfied that it can conclude that persons holding key positions are fit and proper;
- responsibility is assigned to ensure fitness and probity is monitored on a continuous basis;
- approval is sought from the Central Bank of Ireland ('CBI') prior to the appointment of persons performing Pre-Approval Control Functions.

B.2.2 Process for assessing the fitness and the propriety of the persons who effectively run the undertaking or have other key functions

The Policy outlines the procedures that must be followed for assessing the fitness and probity of persons performing CFs and PCFS while also stipulating the requirements for instances when either of these functions are outsourced to a regulated or unregulated entity.

It also focuses on the documentation, controls and governance that are required to be in place to ensure compliance with the abovementioned Regulations.

This is achieved in the main by means of internal checklists, documentary evidence of qualifications proving suitability for the role in question, references, regulatory authority, companies' office and police authority checks and self-certifications from the applicant in the form of Curricula Vitae and the CBI Individual Questionnaires.

B.3 Risk management system including the own risk and solvency assessment

B.3.1 Risk management system

The Company's risk management system is set out as follows:

1. The Board sets the Company Strategy.
2. The Board sets the Risk Strategy. The Risk Strategy describes and addresses the management of all material risks that the Company is exposed to in pursuit of the Company Strategy.
3. The Board sets the Risk Appetite. The Risk Appetite sets out the desired level of risk and the maximum level of variation from its risk appetite that it is willing to accept.
4. The Board has approved a Risk Policy and other individual risk policies necessary for the implementation of it Risk Strategy, consistent with its Risk Appetite.

The Company uses the Standard Formula to assess the solvency and capital requirements.

The Company performs an Own Risk and Solvency Assessment ("ORSA") at least annually. The main purpose of performing the ORSA is to ensure that the Company engages in a process of assessing all risks inherent in the business and determining the corresponding capital needs.

In order to ensure effective risk governance, the system has been designed to identify, assess, manage and monitor and report exposure to risk. This is a continuous process subject to continuous review and development.

Identify

The board reviews the risk profile of the Company at least annually and the Risk Management Function reviews the risk profile on an ongoing basis to ensure that the material risks of the Company are identified and recorded in the risk register.

Assess

Risks identified in the risk register are then quantified by the Board with input from the Risk Management Function and tolerances are established through the development of a risk appetite statement.

Manage

The Board determines the minimum standards to be maintained by the Company in order to manage the risks in a way that is consistent with its risk appetite by developing suitable individual risk policies.

Monitor/Report

Monitoring and reporting to the Board is undertaken at least quarterly from a number of sources including the Risk Management Function, Compliance Officer and the Internal Audit Function.

Findings from the development of the risk register are considered by the Board in the preparation of the annual internal audit plans.

The result is a risk management strategy, which is led by the Board of Directors whilst being embedded in the Company's business systems, strategy and policy setting processes and the activities of the Company.

B.3.2 Implementation of the Risk management system

The Company recognises the need to have appropriate governance, monitoring and reporting processes and procedures which enable the Company to identify, assess, manage, monitor and report the risks it is or might be exposed to.

Responsibility for risk management is spread throughout the Company and the wider UPS group. Appropriate internal reporting procedures and feedback loops ensure that information on the risk management framework is actively monitored and managed by all relevant functions and the Board.

The Company adopts a "3 lines of defence" approach for the overall governance of its risk management system.

The Board of Directors is ultimately responsible for the risk management framework and internal control, including approval of the Company strategy and business planning.

1st Line of Defence – Day to Day:

Operations – the Manager: The Manager provides day to day operations, accounting, financial reporting and administrative support services and company secretarial and regulatory reporting services on an outsourced basis to the Company.

2nd Line of Defence – Oversight:

Risk Management Function ("RMF"): The RMF is responsible for the oversight of the ongoing development, implementation and operation of the risk management framework, strategy, related resource plan and making recommendations to the Board thereon.

Compliance Function: The Compliance Function is recognised as a key part of the Company's internal control system which should identify, assess, monitor and report on the compliance risk exposure of the Company. The Compliance Function also shares its responsibilities with other Company Functions which are responsible for their specific areas.

In order to help achieve its compliance objective the Board has appointed a Compliance Officer. The role of the Compliance Officer is set out in the Company's Board approved Compliance Policy.

3rd Line of Defence – Independent Assessment:

Internal Audit Function: The Board has established an Internal Audit Function that is an independent function within the Company with a remit to examine and evaluate the functioning, effectiveness and efficiency of the internal control system and other elements of the system of governance of the Company.

The responsibilities of the Internal Audit function are set out in the Company's Board approved Internal Audit Policy. The Internal Audit Function reports to the Board.

Actuarial Function: The role of the Actuarial Function is outsourced to third party provider via the terms of a written SLA.

B.3.3 ORSA

B.3.3.1 ORSA process

The Company prepares an ORSA on an annual basis and on an ad-hoc basis, if circumstances materially change. The objective of the ORSA process is to enable the Board to assess its capital adequacy in light of the assessments of its risks and the potential impacts of its risk environment, and to enable the Company to make appropriate strategic decisions.

The ORSA process is a rolling project plan of how the ORSA is completed, the interaction and contributions from different stakeholders, the process timetable, the audit trail and the monitoring and reporting cycle.

The Company has adopted the following approach for the conduction of the ORSA process:

Risk Management System: Board puts in place an effective risk management framework comprising of strategies, tolerances, policies, governance, monitoring and reporting procedures necessary to identify, measure, monitor, manage and report, on a continuous basis, the risks to which the company is or could be exposed in pursuing its Company strategy.

Risk Identification: Board initiates an organised identification of all actual risks as well as emerging risks, taking into account the Company's strategy and business planning horizon.

Risk Appetite: Appetites and tolerance limits for the risks identified are set by the Board, which provide a basis for allocating risk capacity against the Company's exposure to particular risk categories.

Current Business Activities, Risk Profile, Capital and Solvency: Analysis of the current business activities, risk profile (quantitative and qualitative), calculation and analysis of regulatory

and economic capital, analysis of solvency margin cover and description and assessment of risk mitigation techniques.

Forecast Business Activities, Risk Profile, Capital and Solvency: Analysis of the forecast business activities, risk profile (quantitative and qualitative), calculation and analysis of regulatory and economic capital, analysis of solvency margin cover and description and assessment of risk mitigation techniques.

Stress and Scenario Analysis: Board assesses the effect of different stresses (including reverse stress testing) and scenarios.

Impact on Strategy: Output of the ORSA process is reviewed and challenged by the Board and is being continuously embedded into the Company strategy and system of governance.

B.3.3.2 ORSA review and approval process

The risk management process and ORSA is performed on an annual basis, after the SCR calculation or when there is a significant shift in The Company's business plan. The risk monitoring is performed on an on-going basis and the Risk Register is annually reviewed and updated during the ORSA review process.

The Board requires that the ORSA process produces meaningful reports on the adequacy of the Company's capital and that it includes risk sensitivities that can be used in shaping strategy and risk appetite.

The Board reviews the ORSA report and considers appropriate action for the business such as:

- Decisions in relation to capital;
- Reassessment of risk profile and appetite;
- Additional risk mitigation actions;
- Reassessment of investment strategy.

Under the following circumstances, a non-scheduled ORSA shall be performed immediately (in addition to the scheduled ORSA):

- Significant change in the risk profile of the Company which can be defined as a major change to the business strategy/business activity/insurance program etc.
  (i.e. business activities other than the Company's current underwriting activity)
- Significant changes to Non-Financial matters - Operational/Regulatory and Legal/Strategic/Group Risks.
- Significant changes in Other categories - Capital Shortage Risks/quality of capital etc.

B.3.3.3 Statement explaining how the undertaking has determined its own solvency needs given its risk profile and how its capital management activities and its risk management system interact with each other.

The Company determines the solvency capital and assesses the overall solvency needs using the Solvency II standard formula.

A three year base case projection of the Solvency II Balance Sheets and Solvency Capital Requirements position is produced using the standard formula, as well as actuarial assumptions. The results are subjected to a range of scenario testing that is reviewed by management and challenged by the Board and, where appropriate, potential management actions are noted and conclusions drawn.

The Company has sufficient capital to meet its base case SCR for its current and projected business activities over the 3 year business planning horizon. The Company also exceeds its strategic minimum SCR coverage over the period.

The results of the ORSA show that the Company has sufficient eligible capital own funds to:

• Maintain a comfortable margin over its Overall Solvency Needs for its current and projected business activities over the business planning horizon;
• Continue to meet internal and regulatory solvency targets for capital management;
• Continue its business on a going concern basis over the business planning horizon.

B.4 Internal Control System

B.4.1 Description of the internal control system

The Board of Directors is ultimately responsible for the internal control framework, including approval of the Company strategy and business planning. Board level controls include the Board charter, Company policies, reports and minutes of Board meetings.

The Internal Control Framework of the Company has three other elements, as previously detailed in section B3.2:

First line of defence: “Day to day” operations and associated controls/
Second Line of defence: oversight from Compliance, Risk Management functions
Third Line of Defence – Independent Assessment, internal audit and actuarial functions (and also external audit).

B.4.2 Implementation of the compliance function

The Board of the Company has ultimate responsibility for its compliance objective.

To help achieve this aim the Board has established a Compliance Function, staffed by an appointed Compliance Officer, to supplement not supplant, the responsibilities of the Board to ensure compliance with legislation and applicable requirements.

The role of the Board appointed Compliance Officer is to:

- assist the Board with ensuring ongoing compliance with legislation and applicable requirements;
- enhancing the Company's awareness of compliance matters;
- monitor the Company's compliance with (re)insurance legislation and applicable requirements and guidelines;
- document any breaches identified, how they were addressed and whether any third party reporting of the breach is required;
- ensure that the Board is kept informed of any amendment to the applicable regulations, legislation and guidelines or the addition of any new requirements and the potential impact on the Company;
- provide opinions, recommendations, supervision and independent controls;
- provide reasonable assessment of the effectiveness and consistency of the internal processes used to control the compliance of the Company's operations and protect its reputation.

The Compliance Officer presents a Compliance Officer report to the Board at each board meeting which outlines the following:

- Details of regulatory correspondence with the Company
- Details of regulatory developments
- Details of which controls were tested since the last report and the results of the tests
- Conclusions and recommendations on the Company's compliance with reinsurance legislation and guidelines.

B.5 Internal audit function

B.5.1 Implementation of the internal audit function

The Company has outsourced its Internal Audit Function to the Manager. The internal audit function possesses a remit to examine and evaluate the functioning, effectiveness and efficiency of the internal control system and all other elements of the system of governance.

To this end, the Internal Audit Function is mandated to:

- establish, implement and maintain an audit plan setting out the audit work to be undertaken in the upcoming years, taking into account all activities and the complete system of governance of the Company;
- take a risk-based approach in deciding its priorities;
- report the audit plan to Board of Directors;
- issue recommendations based on the result of work carried out in accordance with the audit plan and submit a written report on its findings and recommendations to the Board of Directors on at least an annual basis.

B.5.2 Independence of the internal audit function

The internal audit function provides independent and objective assurance services, via an Internal Audit Agreement between the Company and the Manager.

B.6 Actuarial function

The role of the Actuarial Function is outsourced to third party provider, KPMG, via the terms of a written SLA.

The key role of the Head of Actuarial Function (HoAF) is to provide the following services:

- Opinion on Underwriting Policy
- Opinion on Technical Provisions
- Opinion on Reinsurance Arrangements
- Contribution to the Risk Management System
- Contribution to calculation of capital requirements
- Opinion on the ORSA process

B.7 Outsourcing

The Company has established an Outsourcing Policy which sets out the requirements for identifying, justifying and implementing material outsourcing arrangements. This Policy has been adopted by the Company and includes following:

- Definition of outsourcing and critical outsourcing;
- Risk Mitigation strategies;
- Board and Management responsibility;
- Due Diligence;
- Business Continuity Management (BCM);
- Contractual Arrangements;
- Management and control of the Outsourcing Relationship;
- Intra-Group Outsourcing;
- Final approval

The Company's outsourcing arrangements are subject to annual review and the findings of the report, along with the Outsourcing Policy are reviewed by the Board.

The following is a list of the important outsourced operational functions together with the jurisdiction in which the service providers of such functions or activities are located:

Critical Outsourcing Arrangements				
Outsourced Provider	**Service Outsourced**	**Internal/External**	**Jurisdiction**	**Outsourcing Oversight**
Marsh Management Services (Dublin) Limited	Captive Manager	External	EU	Chairman (PCF-3)
	Compliance Function			
	Internal Audit Function			
	Risk Management Function			
KPMG	Head of Actuarial Function	External	EU	

B.8 Assessment of the adequacy of the system of governance of the insurance or reinsurance undertaking to the nature, scale and complexity of the risks

The Company has assessed its corporate governance system and has concluded that it effectively provides for the sound and prudent management of the business, which is proportionate to the nature, scale and complexity of operations of the Company.

B.9 Any other material information regarding the system of governance of the Company

No material changes regarding the system of governance of the Company took place, aside from the fact that certain functions, including actuarial function, internal audit function and risk management functions were finalised and approved by the CBI in line with Solvency II requirements.

C RISK PROFILE

C.1 Underwriting risk

C.1.1 Key underwriting risks

The table below outlines the material components of the underwriting risk modules as at 31 December 2017.

Underwriting Risk	% of undiversified basic SCR	% of undiversified basic SCR
Health	37%	30%
Life	29%	35%

Underwriting risk arises from two sources – premium risk (pricing) and adverse claims development (reserve risk).There are a number of material risks that are considered as a result of the Company's (re)insurance underwriting.

The company accepts reinsurance risk through its reinsurance contracts whereby it assumes various risks of United Parcel Service, Inc. group of companies. The company is exposed to the uncertainty surrounding the timing, frequency and severity of claims under these contracts.

The Life Underwriting Risk is in respect of the Life, Accident and Disability (Health Similar to Life) lines of business.

The loss ratio approach is used to calculate the Life SCR risk charges; shocks are applied to the loss ratio assumptions which are then applied to the BEL to calculate a stressed BEL.

Similar to the Life Underwriting module a loss ratio approach is used to calculate the Health SLT Underwriting Risk charges, shocks are applied to the ULR assumptions which are then applied to the BEL to calculate a stressed BEL.

The Non-Life (Health Underwriting) Risk is in respect of the Medical Expenses line of business.

For premium risk, the Company has considered the risk of under-pricing of premiums resulting in higher loss ratios than expected. Pricing is determined by negotiation with the fronting insurers and is based on the performance of the business.

For reserve risk, the Company has considered the risk of over- and under-reserving of actual and expected claims. In this case the UPS Group has sufficient historical premium and claims data to demonstrate a stable insurance business and has determined the appropriate loss ratio for the risks written. Pricing is determined by negotiation with the fronting insurers, and is based on the performance of the business.

The Company has no appetite for the underwriting of risks outside of its approved underwriting policy.

Catastrophe Risk

The risk of a major natural or man-made catastrophe event occurring while not listed in the Company's risk register has been considered but has been determined as highly unlikely given the nature and execution of the business.

C.1.2 Assessment and risk mitigation techniques used for underwriting risks

The Company monitors and controls risks via various methods, including:

- Having in place clear underwriting and reserving philosophies and procedures and controls in relation to pricing and reserving;
- Assessing reinsurance risks with quality underwriting and claims expertise and information;
- Retaining risk within an approved risk appetite and solvency requirements;
- Transferring risk if required, through retrocession with high credit quality entities;
- Diversifying and limiting reinsurance risk through ongoing review and management;
- Monitoring changing environment and market conditions that affect risk;
- Reporting of actual positions against the Company's risk appetite metrics takes place on a quarterly basis as part of the Company's regulatory reporting process;
- The ORSA includes stress and scenario testing which is used to assess the risks under stressed conditions;
- Independent opinion on the reasonableness and adequacy of the overall underwriting policy is provided by the Head of Actuarial Function on an annual basis.

C.1.3 Material risk concentrations

The Company seeks to avoid concentration of risks by accepting reinsurance of risks which are sourced across several countries worldwide and across a number of lines of business.

C.2 Market risk

C.2.1 Material market risks

Market risk is the risk arising from the level of volatility of market prices of financial instruments. Exposure to market risk is measured by the impact of movements in the level of financial variables such as stock prices, interest rates, real estate prices and exchange rates. Market risk is arrived at using the assumptions and calculations methods contained in the Standard Formula.

Investment objectives are outlined in the Company's Investment and Asset Liability Policy.

The table below outlines the material components of the market risk module as at 31 December 2017.

Market Risk sub-module	€'000 2017	€'000 2016
Currency	1,329	1,093

Concentration Risk: the risk that excessive exposure to counterparty will impact on the solvency of Company.

Concentration risk is not applicable for the Company.

Spread Risk: the sensitivity of the value of investments, primarily bonds and deposits in respect of the Company, to changes in the level or in the volatility of credit spreads.

Spread risk is not applicable for the Company

Interest rate risk: the risk that the Company is exposed to lower returns or loss as a direct or indirect result of fluctuations in the value of, or income from, specific assets arising from changes in underlying interest rates.

Interest rate risk is not applicable for the Company.

Currency risk: the risk that the Company is exposed to higher or lower returns as a direct or indirect result of fluctuations in the value of, or income from, specific assets or liabilities arising from changes in underlying exchange rates.

The local currency for the Company is the Euro which is the currency. The Company holds assets in Euro only; liabilities are also paid out in Euro. However, it has been assumed there is currency exposure to movements in the exchange rate between Euro and each regional currency to allow for potential exposure to the size of the Euro claim payable in each region increasing/decreasing as underlying exchange rates fluctuate.

C.2.2 Prudent person principle applied to market risks

Not applicable for market risk.

C.2.3 Assessment and risk mitigation techniques used for market risks

The Company monitors and controls market risks via various methods, including:

- Compliance with the Investment and Asset Liability Policy as approved by the Company's Board of Directors;
- Retaining risk within an approved risk appetite and solvency requirements;
- Diversifying and limiting investment risk through ongoing review and management;
- Monitoring changing environment and market conditions that affect risk;
- Reporting of actual positions against the Company's risk appetite metrics takes place on a quarterly basis as part of the Company's regulatory reporting process;
- The ORSA includes stress and scenario testing which is used to assess the risks under stressed conditions.

C.2.4 Material risk concentrations

There are no material market risk concentrations.

C.3 Credit risk

C.3.1 Material credit risks

Credit risk at 31 December comprises 20% (2016: 22%) of the undiversified basic SCR.

Credit risk is the risk that the Company is exposed to lower returns or loss if another party fails to perform its financial obligations towards the Company.

The counterparty default risk module in the Standard Formula is driven by cash at bank, and reinsurance balances receivable.

C.3.2 Prudent person principle applied to credit risks

Counterparties are selected by taking into account the credit rating and reputation of each entity. Credit ratings are used as a way of properly identifying and managing the risk attached to a counterparty.

C.3.3 Assessment and risk mitigation techniques used for credit risks

The Company monitors and controls credit risks via various methods, including:

- Minimum rating criteria for the placing of deposits and opening of bank accounts, in line with the Investment and Asset Liability Policy.
- Monitoring the credit ratings of counterparties;
- Reporting of cash, investment and liquidity positions takes place monthly as part of the Company's management accounts reporting process;
- Reporting of actual positions against the Company's risk appetite metrics takes place on a quarterly basis as part of the Company's regulatory reporting process;
- Retaining risk within an approved risk appetite and solvency requirements;
- The ORSA includes stress and scenario testing which is used to assess the risks under stressed conditions.

C.3.4 Material risk concentrations

The credit risk exposure is concentrated in that all of the cash at bank is held with one institution. Reinsurance receivables are spread amongst a number of fronting companies.

C.4 Liquidity risk

C.4.1 Material liquidity risks

Liquidity risk refers to the risk that undertakings are unable to realise investments and other assets in order to settle their financial obligations when they fall due.

It is the Company's policy that liquidity and concentration risk is minimised as much as possible

The Company has considered the risk of a lack of liquidity available to pay reinsurance liabilities in its risk register. No specific allocation of capital is considered necessary for this risk.

The Company's cash in-flow is generated from premium income. Its cash out-flow consists mainly of claims payments and a small volume of administration expenses

C.4.2 Prudent person principle applied to liquidity risks

The investment assets are prudently invested taking into account the liquidity requirements of the business and the nature and timing of the insurance liabilities.

C.4.3 Assessment and risk mitigation techniques used for liquidity risks

The Company monitors and controls risks via various methods, including:

- Compliance with the Liquidity and Concentration Policy as approved by the Company's Board of Directors;
- Retaining risk within an approved risk appetite and solvency requirements;
- The Manager monitors cash movements and performs cash flow forecasting which are regularly reported to the Company;
- Reporting of cash, investment and liquidity positions takes place monthly as part of the Company's management accounts reporting process.

C.5 Operational risk

C.5.1 Material operational risks

Operational risk is the risk of loss resulting from failed internal processes, people and systems or from external events. Operational risks which can result in losses include internal fraud. External fraud, employments practices, system failures and disregard of company policies.

The Company has considered a number of operational risks arising out of its activities in its risk register. For example, the Company has considered the risk of the loss of key personnel involved in the business. This is mitigated by the team approach to servicing adopted by the Captive Managers, Marsh Management Services (Dublin) Limited, which sees four experienced staff involved in the business.

This ensures continuity of service and spread of knowledge. Operational risks are addressed in the capital requirement as an addition to the BSCR to the extent that they have not been explicitly covered in other risk modules.

C.5.2 Assessment and risk mitigation techniques used for operational risks

The Company monitors and controls operational risks via various methods, including:

- Identifying and analysing risk through a disciplined risk assessment process;
- Mitigating or avoiding risks that do not fit within the Company's business objectives;
- Implementing a robust system of internal controls and procedures;
- Segregation of duties;
- Monitoring and internal reporting;
- Outsourcing its management to an experienced management company;
- Setting a strategic surplus target of 15% (2016: 15%) above the SCR;
- Commitment of effective corporate governance.

C.6 Other material risks

The Company has included a range of non-quantifiable risks in its ORSA process. Documented associated actions exist for each of these risks and they are reviewed on a quarterly basis by the Board of Directors.

Sample risks include:

- Regulatory and Compliance;
- Loss of key personnel/director's resignation;
- Outsourcing.

The Company has no appetite for regulatory risk. It is the objective of the Company to be at all times in compliance with Insurance Acts and Regulations, and with Guidelines issued by the insurance supervisory authority and other applicable legislation in accordance with good corporate governance and codes of conduct.

The Board is satisfied that the Company has a succession plan in place and in the event that a director resigns or intends to resign the parent Company will provide a replacement nominee for that position as soon as possible.

The Board recognises that the Company operates on a basis of an outsourced model, whereby the day to day operations and number of key functions are outsourced; the Board is satisfied that all outsourcing agreements include an appropriate period notice.

This would provide the Company with sufficient time to find an alternative professional services provider. Additionally, performance of outsourced providers is reviewed on an annual basis and such review would flag any potential deficiencies of the individual service provider.

The Board considers that these non-quantifiable risks that are not captured by the standard model are covered by the application of a specified strategic solvency target.

C.7 Amount of expected profit included in future premiums as calculated in accordance with Article 260(2)

NIL

C.8 Stress and sensitivity tests

The Company's ORSA contains 4 scenarios. Stress testing is based on the largest risks per the Company's risk register, which have been determined to be:

1. Impact of an increase in loss ration;
2. Impact of a severe market crash;
3. Impact of incorrect data used in modelling the SCR results of the Company.

Robust risk mitigation practices and remediation plans are in place to address these risks.

As a part of 2017 ORSA the Company considered a reverse stress test. This can be defined as a stress test that requires assessment of scenarios and circumstances that would render its business model unviable, thereby identifying potential business vulnerabilities.

In this scenario, a combination of the following stresses was tested:

- Increase in loss ratios as per Scenario 1
- 50% default in the cash pool account

This combination of stresses would cause a breach in the SCR of the Company. This is managed through the capital management policy which recognises the continued support required from the shareholder for any future capital needs the Company may have.

The results of the stress testing evidence that the Company is well capitalised at present and will have sufficient own funds to meet its overall solvency needs throughout the projection period. No further general management actions are required outside of the existing reporting and monitoring controls are in place.

C.9 Any Other Information

The Company has identified all material risks through its risk register and there is no other material information regarding the risk profile of the Company that warrants disclosure.

D VALUATION for SOLVENCY PURPOSES

D.1 Assets

D.1.1-2 Irish GAAP and Solvency II Valuations

The table below sets out the value of the Company's material assets as at 31 December 2017:

	31/12/2017		31/12/2016	
	Assets per GAAP	Assets per Solvency II	Assets per GAAP	Assets per Solvency II
	Total €'000	Total€'000	Total €'000	Total €'000
Cash and Cash Equivalents	10,684	10,684	6,891	6,891
Insurance and intermediaries receivables	9,835	9,835	11,079	10,978
Other Assets	27	27	-	-
Deferred Acquisition Costs	-	-	14	-
Total assets	**20,546**	**20,546**	**17,984**	**17,869**

The Company's assets are recognised and valued using the following principles:

Cash and cash equivalents

Cash and cash equivalents are comprised of one deposit held at call in a UPS treasury account and a small balance held with Citibank. Cash and cash equivalents are measured at fair value.

Insurance and intermediaries receivables

The Solvency II Balance Sheet is presented net of the premium receivable in respect of unexpired risks e.g. asset and liability side of the balance sheet are reduced by this amount. These are valued at fair value as per Solvency II principles.

Deferred acquisition costs

Commissions, which are related to the acquisition of new insurance contracts and the renewal of existing insurance contracts, are deferred in the balance sheet to the extent that they are attributable to premiums unearned at the balance sheet date.

Adjustment for solvency purposes relates to the removal these deferred acquisition costs as there is no concept of deferred acquisition costs in Solvency II; future acquisition cost cash flows are valued in Solvency II technical provisions.

D.2 Technical Provisions

D.2.1 Irish GAAP and Solvency II Valuations

The valuation of liabilities for Solvency II has been determined in accordance with Articles 75 to 86 of the Solvency II Directive 2009/138/EC and related guidance.

The table below shows an analysis of the technical provisions as at 31 December 2017:

Insurance Class	31/12/2017	
	TPs per GAAP	TPs per Solvency II
	€'000	€'000
Non-Life : Health		
Best estimate of liabilities (BEL)	3,776	3,970
Risk margin	-	425
Life : Health		
Best estimate of liabilities (BEL)	4,598	3,750
Risk margin	-	401
Life (excluding health)		
Best estimate of liabilities (BEL)	1,202	84
Risk margin	-	9
Total technical provisions	**9,576**	**8,639**

Solvency II classes of business: Classes of business have been allocated to Solvency II line of business on the following basis:

Class of Business as per Irish GAAP	Solvency II Class of Business
Non-Life : Private Medical Insurance	Health (Non -Similar to Life) – Proportional Reinsurance
Employee Benefit – (Life)	Life Reinsurance
Employee Benefit – (Disability)	Health (Similar to Life) Reinsurance
Employee Benefit – (Accident)	Health (Similar to Life) Reinsurance

The Irish GAAP accounts of the Company include provisions for claims incurred and claims incurred but not reported, which consider all reasonably foreseeable best estimates. An unearned premium reserve ("UPR") is also included, relating to gross premiums written that have not yet expired by the end of the financial period by reference to the full term of the insurance policies to which such premiums written relate.

A number of adjustments were made to the Irish GAAP provisions in order to obtain the Solvency II technical provisions. Key points to note are as follows:

Under Solvency II, the Irish GAAP UPR is replaced by the SII premium provision. The premium provision relating to the unexpired period of risk is estimated by applying a loss ratio to future premium reserve. Loss ratio assumptions (which include acquisition expenses) are based on historic loss ratio experience which are and monitored quarterly for emerging claims experience during the year.

Next the Premium Provision is reduced in respect of the amount of premium receivable, the Solvency II Balance Sheet is presented net of the premium receivable in respect of unexpired risks e.g. asset and liability side of the Balance Sheet are reduced by this amount.

In addition an allowance is made for expected profits in future premiums by reflecting an allowance for expected future profits for business which is bound as at the valuation date and hence should be 'recognised' within the technical provisions in line with Article 17 of the Delegated Acts.

Under Solvency II, the Irish GAAP IBNR and OSLR are transformed into Solvency II Claims Provisions. The Claims Provision is estimated as follows:

- Under Solvency II, the Irish GAAP IBNR and OSLR are transformed into Solvency II Claims Provisions. The Claims Provision is set equal to the Irish GAAP IBNR and OSLR which are based on best estimate ULR assumptions.

ENIDs ("Events not in Data" – allowance for possible events that have not historically occurred, but could impact the claims experience) are implicitly allowed for within the best estimate ULR assumptions for each risk segment. Based on expert judgement and historical experience where available there is sufficient allowance for ENIDs within the best estimate ULR assumptions. The ENIDs reflect the uncertainties in the data (i.e. emerging trends or events which are not present in the historic claim data). This will be refined as experience develops.

The Standard Model then applies half a year of discounting using the relevant EIOPA yield curves and includes an allowance for ongoing maintenance expenses.

Risk Margin

The risk margin is calculated without simplification.

All market risk is assumed to be hedgable.

For each line of business the exposure to risk is expected to run off over two year post inception of the contract. As the majority of the business incepts on 1 January we have assumed all business will be inforce for 2 years post the valuation date (to allow for bound but not yet incepted business), running off by year three.

Each component of the SCR is calculated at each future date assuming no future business is written.

This is discounted using the Euro yield curve as at the valuation date and a 6% cost of capital is applied.

D.2.2 Uncertainty associated with the value of Technical Provisions

All estimates of unpaid loss reserves are inherently uncertain. The key areas of uncertainty of the technical provisions are driven by the uncertainty of the underlying booked reserves. The valuation of technical provisions is generally based on estimates of future experience, including claims, lapses,

investment returns, interest rates and expenses. In some cases, the available experience on which to base these estimates is limited, and thus there is uncertainty in relation to them. In others, previous experience is not an appropriate guide to the future. Future experience will always differ from estimates for a range of reasons including, but not limited to, inherent randomness, the prevailing economic and commercial environment, changes in regulation and the conduct of operations.

D.2.3 Solvency II and Irish GAAP valuation differences of Technical Provisions by material line of business

See analysis in Section D2.1.

D.2.4 The Company does not apply the matching adjustment referred to in Article 77b of Directive 2009/138/EC.

D.2.5 The Company does not use the volatility adjustment referred to in Article 77d of Directive 2009/138/EC.

D.2.6 The Company does not apply the transitional risk-free interest rate-term structure referred to Article 308c of Directive 2009/138/EC.

D.2.7 The Company does not apply the transitional deduction referred to in Article 308d of Directive 2009/138/EC.

D.2.8 Recoverables from reinsurance and special purpose vehicles

There were no recoverables from reinsurance or special purpose vehicles at 31 December 2017 (2016: € Nil).

D.2.9 Material changes in relevant assumptions made in the calculation of technical provisions

Key assumption changes in the period include an update to the best estimate loss ratio for the disability (78% to 80%) line of business to reflect the latest view of best estimate experience. Expense assumptions were also updated in the period in line with the expenses set out in the year end 2017 financial statements.

D.3 Other liabilities

Other liabilities at 31 December 2017 were €1,289k (2016: €285k) and are composed of losses payable, accrued expenses and deferred tax liabilities. These are valued at fair value as per Solvency II principles.

Difference between the Irish GAAP and Solvency II valuation is due to the inclusion of a deferred tax liability of €244k that arose on the Solvency II valuation of the technical provisions.

D.4 Alternative Methods for Valuation for other liabilities

The Company does not use any alternative methods for valuation.

D.5 Any Other Information

There are no other material matters in respect of the valuation of assets and liabilities.

E CAPITAL MANAGEMENT

E.1 Own funds

E.1.1 Objective, policies and processes for managing own funds

The objective of own funds management is to maintain, at all times, sufficient own funds to cover the SCR and MCR with an appropriate buffer. As part of own funds management, the Company prepares ongoing annual solvency projections and reviews the structure of own funds and future requirements. The business plan, which forms the basis of the ORSA contains a three year projection of funding requirements and helps focus actions for future funding.

The Company is a single shareholder entity whose ordinary shares are fully paid up. It has no debt financing nor does it have plans to raise debt or issue new shares capital over the three year time horizon used for business planning.

The medium-term capital management plan set by the Board is as follows:

- Own funds to be maintained at an agreed level in excess of the SCR, target solvency margin cover is currently set at 115% of the SCR;
- Dividends will not be paid or will be deferred if doing so would cause the Company to breach its legal and regulatory requirements or fall below the abovementioned target SCR cover;
- The Company's own funds are primarily invested in in cash at bank in line with the Board approved Investment and Asset Liability Policy.

E.1.2 Own funds analysed by tiers

An analysis of own funds is shown below:

Date	Description	Tier 1 €'000	Tier 2 €'000	Total €'000
1 January 2017	Opening balance comprising: Ordinary share capital Reconciliation Reserve	 635 9,213	 - -	 **635** **9,213**
	Movement in the Reconciliation reserve for the year ended 31 December 2017	770	-	**770**
	Ancillary own funds	-	3,639	**3,639**
31 December 2017	Closing balance	10,618	3,639	**14,257**
	Represented by:			
	Ordinary share capital	635	-	**635**
	Reconciliation reserve (comprising retained earnings and Solvency II adjustments)	9,983	-	**9,983**
	Ancillary own funds	-	3,639	**3,639**
	Total Basic own funds after deductions	10,618	3,639	**14,257**

The Company's ordinary share capital and reconciliation reserve are all available as tier 1 unrestricted own funds as per Article 69 (a)(1) of the Delegated Regulation. The positive reconciliation reserve equals the excess of assets over liabilities less other basic own fund items, as at the reporting date. There are no foreseeable dividends or own shares held.

The Company has no tier 1 restricted own funds and no tier 2 own funds. The Company has a tier 2 ancillary own fund item which was approved by the Central Bank of Ireland in 2017.

E.1.3 Eligible amount of own funds to cover the Solvency Capital Requirement, classified by tiers

The eligible amount of own funds to cover the Solvency Capital Requirement is €14.2m. This is comprised of Tier 1 unrestricted basic own funds of €10.6m (2016: €9.8m) and Tier 2 ancillary own funds of €3.6m (2016: NIL).

E.1.4 Eligible amount of own funds to cover the Minimum Capital Requirement, classified by tiers

The eligible amount of own funds to cover the Minimum Capital Requirement is €10.6m (2016: €9.8m). This is comprised of Tier 1 unrestricted basic own funds of €10.6m (2016: €9.8m).

E.1.5 Difference between equity as shown in the financial statements and the Solvency II value excess of assets over liabilities

Reconciliation of Basic Own Funds to Equity as per financial statements as at 31 December 2017	
	€'000
Solvency II - Basic Own Funds	10,618
Total Equity as per financial statements	9,925
Difference:	**693**
Represented by:	
Difference between Net Technical Provisions and BEL	1,772
Risk Margin	(835)
Adjustment to Insurance and intermediaries receivables	-
Deferred Acquisition Costs	-
Deferred Tax Liability	(244)
Difference:	**693**

E.1.6 None of the Company's own funds are subject to the transitional arrangements referred to in Articles 308b(9) and 308b(10) of Directive 2009/138/EC.

E.1.7 The Company has ancillary own funds in the form of a capital commitment deed between the Company and United Parcel Service of America, Inc. This is valued at 50% of the SCR.

E.1.8 No deductions are applied to own funds and there are no material restrictions affecting their availability and transferability.

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.1 Amount of Solvency Capital Requirement and Minimum Capital Requirement

The table below shows the total SCR and MCR at 31 December 2017:

	€'000 2017	**€'000 2016**
SCR	7,277	6,646
MCR	2,037	1,869

The final amount of the SCR remains subject to supervisory assessment.

E.2.2 Solvency Capital Requirement split by risk modules

The table below shows the SCR components by risk module (using the Standard Formula) at 31 December 2017.

	€'000 2017	€'000 2016
Market Risk	1,338	1,099
Health Underwriting Risk	3,786	2,803
Life Underwriting Risk	3,002	3,200
Default Risk	2,068	2,017
BSCR pre Diversification	**10,194**	**9,119**
Overall Diversification Benefit	-3,263	-2,929
Basic Solvency Requirements ('BSCR')	**6,931**	**6,190**
Operational Risk	590	587
Deferred Tax Adjustment	-244	-131
SCR	**7,277**	**6,646**

E.2.3 Simplified calculations are not used for any of the risk modules or sub-modules.

E.2.4 The Company does not use undertaking specific parameters in its computation.

E.2.5 The Minimum Capital Requirement is calculated using the Standard Formula specifications.

The table below shows the inputs into the MCR calculation as at 31 December 2017.

MCR Overview	EUR'000 2017	EUR'000 2016
Linear MCR	2,037	1,869
SCR	7,277	6,646
MCR cap	3,275	2,991
MCR floor	1,819	1,661
Combined MCR	2,037	1,869
Absolute floor of the MCR	1,200	1,200
Minimum Capital Requirement	**2,037**	**1,869**

E.2.6 There were no material changes to the Solvency Capital Requirement and to the Minimum Capital Requirement over the reporting period.

E.3 Any use of the equity risk sub-module in the calculation of the Solvency Capital Requirement.

The Company has not opted to use the duration-based equity risk sub-module set out in Article 304 of Directive 2009/138/EC.

E.4 Internal model information.

The Company applies the Standard Formula model and does not use an internal model to calculate the Solvency Capital Requirement.

E.5 Non compliance with the Minimum Capital Requirement and significant non-compliance with the Solvency Capital Requirement.

There were no breaches of the Solvency Capital Requirement (and hence the Minimum Capital Requirement) over the reporting period.

E.6 Any other information.

There are no other material matters in respect of the valuation of capital management.
