Summary

This Solvency and Financial Condition Report ("SFCR") has been drafted in line with articles 290 through 299 of the Commission Delegation Regulation (EU) 2015/35 of 10 October 2014.

The objective of this report is to consolidate all material and key information relating to Sofinsod Insurance DAC ('SIDAC' or 'the Company') over the reporting period of 1 September 2017 through 31 August 2018, in respect of the following categories:

- Business and performance
- System of governance
- Risk profile
- Valuation for solvency purposes
- Capital management

The following summarises the information and findings in the subsequent sections of this report:

- The Company's business remained unchanged from the prior year with no adjustments to the lines of business licensed to be underwritten. While the Company incurred a net loss after tax for the current financial year, the reason for the loss has been identified and is not expected to be repeated in the near future. The net loss after tax was EUR 1.1M (2017: Profit EUR 75K).
- The Company's System of Governance is robust and fit for purpose with the appointed Board of Directors together with the respective Heads of Functions, adequately fulfilling their requirements over the reporting period.
- The risk profile of the Company has remained unchanged from the prior year with all insurance coverage being provided to Group entities. The levels of risk and retention for the various lines of business remain unchanged.
- The Company has calculated its solvency capital requirement ("SCR") using the standard formula. As at 31 August 2018 the Company's gross technical provisions as calculated under Solvency II valuation principles were EUR 3.0M (2017: EUR 2.8M) compared to GAAP technical provisions of EUR 4.0M (2017: EUR 2.4M), as booked in the audited financial statements.
- With eligible capital of EUR 6.6M (2017: EUR 5.8M) in place, the Company achieved SCR coverage of 160.1% (2017: 140.4%) and Minimum Capital Requirement ("MCR") coverage of 177.3% (2017: 156.0%) as at 31 August 2018.

A. Business Performance: Year Ended 31st August 2018

This Solvency and Financial Condition Report ("SFCR") has been prepared to allow Sofinsod Insurance DAC ('SIDAC' or 'the Company') to comply with the Pillar III reporting requirements under Directive 2009/138/EC and associated Regulations ('the Solvency II Directive')

The Company has set a target Solvency Capital Requirement (SCR) cover ratio of 120%.

A.1 General Information about the Business

Legal Form

The Company was licensed in Ireland on 10th October 2016 and is a wholly owned subsidiary of Sodexo S.A. The Company is authorised by the Central Bank of Ireland (CBI) to carry on the business of insurance in accordance with the regulations as defined in European Union (Insurance and Reinsurance) Regulations 2015 (S.I. 485 of 2015).

Shareholder

Sodexo S.A., a French incorporated entity.

Supervisory Authority

The Central Bank of Ireland

Registered Office and Registered Number

Registered Office: Elm Park, Merrion Road, Dublin 4, Ireland

Registered Number: 587356

Auditor

KPMG

Risk Profile

A.4 Investment Performance

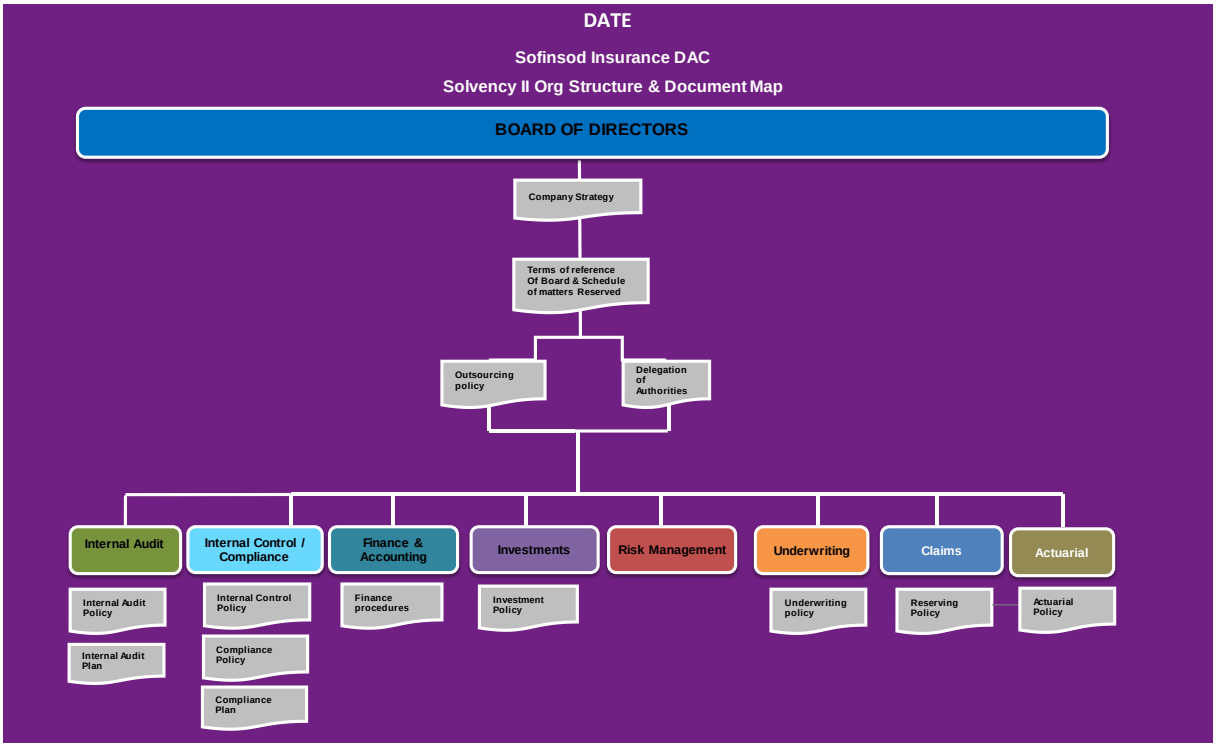

Investment income for the financial year ended 31 August 2018 was negative in the amount of EUR 40,997 (2017: EUR 18,987) owing to the negative interest rates being charged by BNP Paribas (the Company's only financial counterparty at present). The table below outlines a breakdown of the investment performance by asset class:

Asset Class	2018 EUR	2017 EUR
Cash and Deposits Interest	(40,997)	(18,987)

B. Systems of Governance

B.1 General Information

The Organisational Structure of the Company is as follows:

Board of Directors

The Board of Sofinsod Insurance DAC as at 31st August 2018 comprised as follows:

Name	PCF	Date Appointed by the Board	Date Resigned
Christophe Doray	Executive Director (PCF1)	10th October 2016	N/A
Philippe Gouraud	Non-Executive Director (PCF2) & Chairman of the Board (PCF3)	10th October 2016	N/A
Peter Rosiere	Non-Executive Director (PCF2)	10th October 2016	N/A
Laurent Arnaudo	Non-Executive Director (PCF2)	10th October 2016	N/A
Margot Slattery	Non-Executive Director (PCF2)	20th December 2017	N/A

The following roles and decisions are the sole responsibility of the Board and it is their role to ensure:

- The effective, prudent and ethical oversight of the Company
- Setting the business strategy for the Company
- Establishing Banking mandate/s
- Determining Investment Policy (to be reviewed by the Board annually)
- Insurance policy terms and conditions (including Reinsurance)
- Insurance pricing
- Loss Reserve strategy
- Appointment of Reinsurers
- Capital and calling-up of capital
- Appointment of Auditors
- Appointment of Head of Actuarial Function
- Appointment of Corporate Secretary
- Appointment of Insurance Managers
- Appointment of Investment Managers
- Appointment of Bankers
- Appointment of Lawyers
- Appointment of Directors/Compliance Officer
- Dividend Recommendations
- Setting the Risk Appetite of the Company
- Overall Responsibility for the Company's Risk
- Establishing and maintaining the Company's Internal Control Framework

- Identification and appointment of the Key Functions within the Company
- Removal of the Head of a Pre-Approval Control Function ("PCF") and consequent notification of such decision to CBI within 5 working days
- Own Risk and Solvency Assessment ("ORSA") and related activities
- Own Risk and Solvency Assessment ("ORSA") approval procedures
- Review of the Company's Policies and Procedures (annually)
- Establishment (if appropriate) of various Committees and related delegation of duties
- Sign-off various Committees' Terms of Reference (if appropriate)
- Fit and Proper Procedures and approval process
- To monitor the financial reporting process.
- To monitor the effectiveness of the entity's systems of internal control, internal audit and risk management.
- Decide on the appointment of statutory auditor or audit firm.
- To monitor the statutory audit of the annual accounts.
- To monitor the Internal Audit Function and consider the recommendations of the internal audit reports.

Information on Remuneration Policies and Practices

As the Company has been classified as a captive insurance undertaking, there is no requirement to have Independent Non-Executive Directors (INED) serve on the Board thus the majority of director positions are held by Group employees. One INED currently sits on the Board and is individually remunerated for their expertise and time spent preparing and participating in biannual meetings. Remuneration is commensurate to the individual's experience and level of input into the activities of the Board, based on market rates for their role. The Company did not have any employees at any time during the year.

Overview of Year Ended 31st August 2018

Two Board Meetings took place in Dublin, Ireland within the reporting period. These took place on the following dates:

- 6th December 2017
- 20th June 2018

There were no changes to the composition of the board of directors during the period.

Key Functions

The Company complies with the requirements under Solvency II and the Fitness & Probity Standards to ensure that key functions are held by persons with the appropriate knowledge, experience and competence. The Company has nominated Mr. Christophe Doray, CEO, as the designated person, with the overall responsibility for the outsourced functions. Mr. Doray has sufficient knowledge and experience with regard the outsourced key functions and has the ability to challenge the performance and results of the respective service providers. The following key functions are outsourced by the Company:

Risk Management Function

The Company's Risk Management Function is outsourced to Willis Towers Watson Management (Dublin) Limited (WTWMDL), subject to the conditions outlined in the Company's Outsourcing Policy.

The Board will review the composition of its Risk Management Function at least annually.

The Board is responsible for ensuring the effectiveness of the Company's Risk Management System, for setting the risk appetite and tolerance levels as well as approving all related risk management strategies and policies.

The Company's Risk Management Function is responsible for the implementation of the Company's Risk Management arrangements within the operations of the Company on an ongoing basis.

The Risk Management Function is also responsible for effective reporting to the Board on the material risks to which the Company is exposed and on other specific areas of risks both on its own initiative and following direction from the Board.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Chief Risk Officer (PCF14). This function holder is provided to the Company by WTWMDL in line with the terms and conditions of the Management Services Agreement.

Compliance Function

The Company's Compliance Function is responsible for implementing an appropriate compliance framework within the Company and monitoring the Company's adherence to legal and regulatory requirements on an ongoing basis.

The Compliance Function reports to the Board periodically on all key compliance matters, such as implementation of the annual Compliance Plan, regulatory engagement and correspondence, upstream regulatory developments and any compliance breaches that may have occurred in the period and corrective actions undertaken.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Head of Compliance (PCF12). This function holder is provided to the Company by WTWMDL in line with the terms and conditions of the Management Services Agreement.

Actuarial Function

The Board has ensured that an appropriately resourced Actuarial Function is established and maintained within the Company. The activities of the Company's Actuarial Function are currently outsourced to Willis Towers Watson, Strategic Risk Consulting. .

The Actuarial Function is carried out by persons who have an appropriate knowledge of actuarial and financial mathematics, commensurate with the nature, scale and complexity of the risks inherent in the Company, and who are able to demonstrate their relevant experience with applicable professional and other standards in line with the Company's Fitness and Probity Policy and the Central Bank of Ireland's Fitness & Probity Standards.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Head of Actuarial Function (PCF48). This function is provided to the Company by Willis Towers Watson, Strategic Risk Consulting in line with the terms and conditions of the Head of Actuarial Function (Addendum 1) dated 10th May 2018.

The Actuarial Function's role can be summarised as providing the Company with the following:

- Contribution to the effective implementation of the risk management system, in particular, the Own Risk and Solvency Assessment (ORSA) and SCR (Solvency Capital Requirement) calculations.
- Co-ordinating the calculation of the Technical Provisions.
- Provision of an opinion on the underwriting and reinsurance policy of the Company.
- Production of a written report to be submitted to the Board, at least annually (Actuarial Function Report). The report documents all tasks that have been undertaken by the Actuarial Functions and their results, and clearly identifies any deficiencies and gives recommendations as to how such deficiencies should be remedied.
- Assess the sufficiency and quality of the data used in the calculation of technical provisions.
- Comparison of best estimates against experience.

Internal Audit Function

The Board has ensured that an appropriately resourced Internal Audit Function is established and maintained within the Company. The Internal Audit Function is an outsourced service provided by a Sodexo Group Internal Audit with the Board acting as oversight. The Internal Audit mission is to independently examine and evaluate the adequacy and subsequent functioning effectiveness and efficiency of the Company's internal control system and all other elements of governance.

The activities of the Internal Audit function are designed to provide advice to management in improving the internal control environment, monitoring the implementation of strategic control initiatives and managements remediation activity. The Internal Audit Function has a formal reporting line to the Board at least annually. The findings of Internal Audit reviews conducted are discussed with and challenged by the Board and an action plan is agreed upon to remediate any issues identified, along with a timeline for completion.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Head of Internal Audit Function (PCF13).

B.2 Fit and Proper Requirements

Sofinsod Insurance DAC deems the following personnel to hold Pre Approval Controlled Functions and therefore be defined as 'Relevant Persons' subject to the Fitness and Probity Standards:

- The Board of Directors
- The Chief Risk Officer
- The Head of Internal Audit
- The Head of Actuarial Function
- The Head of Compliance

Fitness:

The members of the Board of the Company collectively possess the required qualification, experience and knowledge:

- Of insurance and financial markets relevant to the operations of the Company;
- Of the business strategy and business model of the Company;
- Of the Company's system of governance;

- To perform required financial and actuarial analysis in respect of the Company;
- Of the regulatory framework and requirements applicable to the Company; and
- Generally to be able to provide for the sound and prudent management of the Company.

The persons holding the key functions outlined above must hold the appropriate qualifications, knowledge and sufficient experience in their relevant disciplines, in compliance with the Fitness and Probity Standards ("The Standards").

Probity:

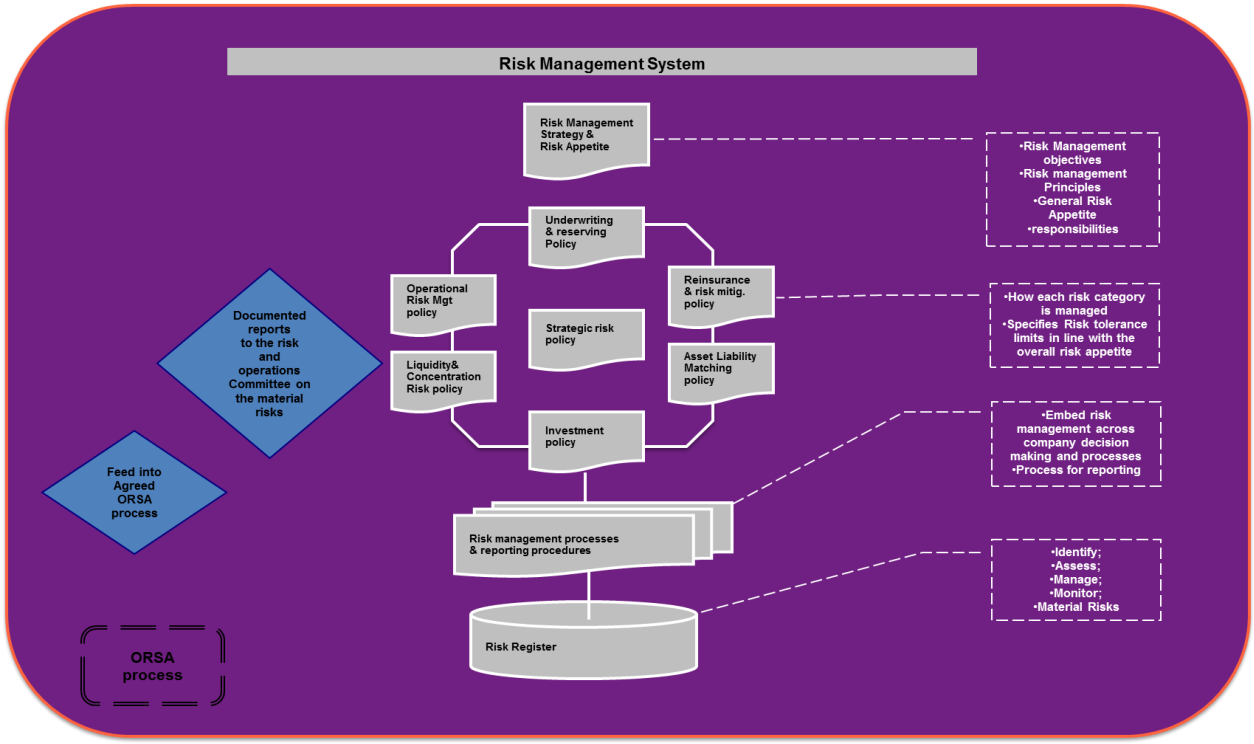

The honesty, financial soundness and reputation of every Relevant Person as defined above has been assessed by the Company in order to determine that they are of good repute and integrity. This assessment has been based on relevant evidence regarding their character, personal behaviour and business conduct including any criminal, financial and supervisory aspects, regardless of location.

In line with The Standards, the Company submits a PCF Confirmation to the Central Bank on an annual basis confirming all PCF holders remain in compliance with the fitness and probity requirements.

B.3 Risk Management System

The Company's Risk Management System is comprised of the following elements;

- Risk Appetite Statement (RAS)
- Risk Register
- Formal Policy Documents for all key risks
- Own Risk and Solvency Assessment (ORSA)
- Formalised Risk Reporting

Each of the elements of the Risk Management System detailed above contribute to the identification, measurement, monitoring, management and reporting of risks and is intended to work as an integrated system, and therefore each should be considered in both in terms of the specific function of the respective element, and in terms of its function within the overall system.

Each element of the system is embedded effectively within the Company and managed by the Risk Management Function with appropriate oversight from and reporting to the Board.

Risk Management Approach

The Company's risk management approach is centred on ensuring the inherent risks which the Company faces in the course of its business are appropriately managed to ensure the strategic objectives of the Company are achieved.

This approach also ensures that risk management is appropriately included in the Company's decision making process.

Risk Profile

The Company, in considering its risk profile, has regard to the following factors;

Nature:

The nature of the Company's risk is confined within the Sodexo Group only with no third party policy holders and therefore represents limited systemic risk.

Scale:

The scale of the risk assumed by the Company can be considered low based on the residual 'Values at Risk' and the Company's organisational structure, relative to the general insurance market.

Complexity:

The Company assumes standard underwriting risk only, holds a simplistic and conservative investment portfolio, employs traditional risk mitigation techniques and utilises reputable counterparties, and therefore the risk assumed can be considered to be of limited complexity.

The Company's risk profile is formally reviewed at least annually as part of the Company's ORSA exercise. The Risk Management Function monitors the Company's risk profile and the corresponding risk management arrangements in place on an ongoing basis and reports to the Board on any observed material changes.

Risk Function

The Risk Management Function of the Company is responsible for the operational coordination and application of all Risk Management activities throughout the Company on an ongoing basis.

The Risk Management Function reports directly to the Board on a quarterly basis or upon occurrence of an event which could materially impact the Company's risk profile.

The Risk Management Function is responsible for the coordination of all risk management activities throughout the Company.

The Risk Management Function is also responsible for providing the Board with assistance and support in the development and implementation of the various risk management arrangements within the Company.

The Board has outsourced the activities of the Risk Management Function to Willis Towers Watson Management (Dublin) Limited in accordance with the Company's Outsourcing Policy and the terms and conditions of the Management Services Agreement.

Risk Categories & Key Risks

Key risks are considered to be the six risk categories detailed in the Solvency II Directive, together with any other risks evaluated as being key risks by the Risk Management Function and the Board of Directors.

Any of the other identified risks, outside of those prescribed risk categories in the Solvency II Directive, shall be considered to be a key risk if, on a residual basis, a material level of capital is deemed to be required in order to accept the risk, or if particular controls or risk mitigation techniques specific for the risk in question must be employed in order to bring the risk within the appropriate thresholds as defined in the Risk Appetite Statement.

All key risks are documented in the Risk Appetite Statement and are subject to a specific policy document which addresses how the risk is to be managed in line with the hierarchy outlined previously.

The key risk categories for the Company are;

- Underwriting and Reserving Risk
- Reinsurance and Other Risk Mitigation Techniques
- Operational Risk
- Investment Risk
- Asset-Liability Management Risk
- Liquidity Risk

The risk categories and key risks to which the Company is exposed are reviewed periodically by the Risk Management Function and at least;

- Quarterly
- On occurrence of an event which could materially affect the Company's risk profile
- On the introduction of material new business
- At the discretion or order of the Board

Risk Appetite Statement

The Company has in place a Risk Appetite Statement (RAS). The RAS sets out the risk appetite and tolerance levels for all key risks over the planning period of the Company.

The Company considers the RAS to be the primary element of the Risk Management System, directly linking to the overall Company Strategy and determining the levels retained for each key risk, and also influencing the nature of the controls and mitigation techniques employed to ensure that the risk remains within the tolerable range.

The Board is responsible for setting the Company's RAS. The Board periodically reviews the appropriateness and effectiveness of the RAS and performs a formal review of the RAS at least annually or upon a material change in the Company's risk profile.

The RAS includes both qualitative and quantitative aspects for each key risk and is aligned to the planning period of the Company.

The RAS is embedded within the decision making processes of the Company. The Board of Directors, prior to finalising any material decision which could impact the risk profile of the Company, refers to the RAS for guidance as to the likely effect of the decision on the risk appetite and tolerance levels of the Company.

The RAS is also used to track actual performance against the metrics detailed in the RAS to ensure that no breach in the agreed tolerance levels has occurred that would require the submission of a report to the Central Bank of Ireland.

Monitoring of the actual performance against the metrics identified in the RAS is performed periodically by the Risk Management Function and reported to the Board in line with the reporting trigger system included in the RAS.

The Company's qualitative risk appetite principles and quantitative appetite and tolerance levels for each key risk are detailed in the RAS.

Risk Policies

The Company has documented a formal policy for each key risk included in the RAS. The policies for each specific risk are consistent with the details contained in the RAS relating to the risk in question. The controls, reporting triggers and any other relevant aspects of the management of the risk are appropriately reflected in the policy for the risk.

Risk Register

The Company has in place a comprehensive Risk Register to evaluate and assess the risks to which the Company is exposed.

The Risk Register initially assesses the risk universe of the Company on an inherent basis. The controls and risk mitigating techniques employed by the Company, as documented in the Company's policies and procedures allow for an evaluation of the risk on a residual basis.

If the risk on a residual basis is deemed to potentially require a material level of capital or the implementation of significant additional controls to accommodate the risk to bring the risk within the appropriate thresholds, this risk should be considered a key risk. Any risk deemed to be a key risk shall be considered for inclusion in the RAS by the Board and a specific policy developed which outlines the process for the identification, management, monitoring and reporting on the risk in question.

The Risk Management Function is responsible for the ongoing maintenance of the Risk Register.

The Risk Register is updated on at least a quarterly basis and upon the occurrence of an event which may materially impact the Company's risk profile.

A summary of the results of the Risk Register review is distributed to the Board upon completion of the each review as soon as is practicable and form part of the Risk Management Function's periodic Risk Reporting.

As part of each update, the Risk Register is reviewed by the Risk Management Function to ensure that the Risks included represent all the material risks to which the Company is exposed and that all applicable emerging risks have been appropriately included.

Where an emerging risk has been identified as one which should potentially be included in the Risk Register, the Risk Function advises the Board of the nature and context of the risk. The Board then determines whether the risk in question is to be included in the Risk Register and whether the risk should be considered as a Key Risk.

ORSA

The Company aims to ensure that the Company is appropriately and prudently capitalised in order to accept the risk to which the Company is exposed. In order to ensure this, the Company performs an Own Risk and Solvency Assessment ('ORSA') at least annually and upon the occurrence of an event which may materially impact the Company's risk profile.

ORSA - Approach taken:

The EIOPA guidance in relation to the ORSA focuses on what is to be achieved by this assessment rather than on how it is to be performed. Since the ORSA represents the Company's own view of its risk profile and the capital needed to address these risks, the Company decides for itself the most appropriate process by which the ORSA is performed.

The Board takes a proactive approach in the ORSA process by providing guidance to the Risk Management function as to the direction of the ORSA process, including the identification, evaluation and quantification of the risks inherent in the business.

The following approach provides a summary of the approach to be taken in 2018:

- The ORSA was discussed initially during the 20th June 2018 meeting of the Board, where stressed scenarios were identified by the Board for testing together with a review of the Risk Appetite Statement. At the November Board Meeting, a final review of the Risk Register and Risk Appetite Statement, approval of the ORSA framework and related items including determination of the Own Solvency Needs will take place.

- The Board will approve the ORSA Report before 31st December 2018

The Board of Directors provide substantial input and discuss in detail the various aspects of the ORSA, and adjust as and when considered necessary, as documented in the minutes of the Board meetings where the ORSA process is an Agenda item.

Own Solvency Needs Assessment

The first element of the ORSA process is to ascertain the Company's assessment of its Overall Solvency Needs (OSN). OSN is a method of identifying its material risks in the context of its Risk Profile, Risk Register and Risk Appetite Statement. The following areas for assessment are identified in respect of the Company's material risks:

- The Maximum Value at Risk (VAR) for each identified key risk of the Company,
- The controls and risk management arrangements in place which act to mitigate each risk,
- The basis for measurement and assessment of the risk over the planning period,
- The current experience of each individual risk,
- The expected risk assessment for the planning period, being the anticipated financial and non-financial activity of the Company over the short, medium and long term.
- Inclusion of appropriate and reasonable stressed amounts to the expected risk assessment to demonstrate the robustness of the Company's capital base in the context of its current business.

Risk Reporting

The Risk Management Function formally reports to the Board on a quarterly basis. The report contains details of the outcome of the Risk Register review, the results of the comparison of the RAS to actual results and an update on emerging risks.

The report contains both qualitative and quantitative aspects and covers all key risks of the Company.

The Risk Management Function is responsible for the development of the Risk Reports.

The Risk Management Function will provide a report to the Board based on the occurrence of an event which materially alters the risk profile of the Company or if the tolerance level triggers are at risk of being breached.

The Risk Management Function will advise the Board on the quality of the data used in the review of the Risk Management System, including any deficiencies that may have been identified during the course of the review.

B.4 Internal Control System

The Board is ultimately responsible for ensuring that the Company has in place an effective internal control system which is commensurate with the nature, scale and complexity of the Company's operations. The Company ensures that appropriate levels of Internal Controls are present within the organisational structure, work and authority flows, resource utilisation and information systems.

This is achieved by:

- Ensuring the presence and application of individual internal policies, procedures and guidelines for each of the critical functions and activities of the Company;
- Ensuring that adequate approval procedures, authorization authorities, verification, reconciliations, and review procedures are in place for each function or activity and are adequately documented and communicated;
- Ensuring that adequate controls are in place pertaining to safeguarding the integrity and protection of information;
- Ensuring sufficient monitoring mechanisms are in place to facilitate assessments of the effectiveness of the controls in place; and
- The activities of the Compliance function are in place, the Compliance Policy is being applied and the Compliance Plan is being implemented.

The Internal Audit Function is responsible for the evaluation of the adequacy and effectiveness of the Company's internal control system. The Compliance Function is responsible for the review and monitoring of the application of internal controls relating to compliance risk. The outsourced Managers are responsible for the application and ongoing maintenance of the Company's internal control activities. The contracted Management Company has procedures manuals and internal controls in place that are documented and maintained within the Company's Corporate Governance Framework documents. Internal controls are reviewed at least annually or when a change in the systems or operations of the Company occurs. The policies and procedures in place are proportional to the operations of the Company and cover at least the following key operational areas:

- Underwriting
- Reinsurance
- Claims reserving
- Claims settlement
- Management accounts preparation

- General bank payments
- Bank reconciliations
- Compliance

The Internal Controls are also proportional to the operations of the Company and centre on the following controls:

Regular

- Four eye review approach on all renewal activities
- Dual signatories on all payments in line with approved bank mandates
- Reconciliations of all bank accounts on a monthly basis
- Monthly financial reporting to Group
- Detailed bi-annual reporting to the Board on Compliance matters

Periodic

- Monitoring activities are carried out by the Compliance Function and a Compliance and Regulatory report is circulated to the Board.
- The Internal Audit Function conduct reviews of the design and effectiveness of internal controls, in line with the Internal Audit Plan approved by the Board
- The Management Company is subject to the Internal Audit processes of the Willis Towers Watson Group with Internal Audit reviews covering work performed by WTWMDL on its clients

External Audit

- The Company's accounts are audited annually by the external Auditor, providing assurance to the Board that no material issues have been raised to date on the operations of the Company.

B.5 Outsourcing

The Company outsources various activities where the Board believes outsourcing can provide access to superior processes and technical skills than it would otherwise achieve on a standalone basis, or where appropriate due to the nature, scale and complexity of the operations of the Company. The

Board is ultimately responsible for the approval of and termination of all outsourcing arrangements of critical or important functions and activities.

The Risk Management Function is responsible for assessing the risks associated with the outsourcing of critical or important functions or activities as part of its overall remit to identify, assess, manage, monitor and report the risks of the Company on an ongoing basis. The functions deemed critical or important are defined in the Company's Outsourcing Policy.

The Board has ensured that the outsourced service providers adhere to the Company's policies and procedures and that the effectiveness of the Company's system of governance has not been lessened or compromised by the outsourcing arrangements.

The performance of each service provider is based on a comparison of the actual performance of the service provider in comparison with the required performance as per the agreed Service Level Agreement ('SLA'). The SLA's include details covering Business Continuity Planning and ensure that acceptable service levels are maintained in the event of problems occurring with the service provider. The performance of the service providers are formally assessed by the Board on an annual basis.

In the Board's current assessment of the performance of each service providers acting in an outsourced capacity, no material deficiencies noted.

C. Risk Profile

The Company operates a low-risk business model that is supported by a robust risk management framework that ensures risks are well understood and controlled. This is facilitated by systematic quantification of all risks and a culture that promotes the importance of risk management.

Integral to this is a thorough understanding and articulation of the Company's risk exposures. Determining the prevailing risk landscape within the Company allows Management, the Risk Function and the Board to assess the appetite for each emerging risk and to ensure that all are quantifiable and managed consistently with our appetite to risk.

An overview of the key risks associated with the business including an outline of how they are managed is provided below.

C.1 Underwriting Risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random, unknown and unpredictable.

As its primary insurance activity, the Company assumes risks relating to Auto Liability across Europe. Additionally the Company accepts inwards reinsurance placements for Property Damage and Business Interruption (PDBI) and Marine Cargo with worldwide coverages. The Company is therefore exposed to the uncertainty surrounding the timing and severity of claims under these insurance contracts. The terms and conditions of the insurance contracts it issues set out the basis for the determination of the Company's liability should the insured event occur.

The Company also faces risks that the actual claims are significantly different to the amounts included within the technical provisions. This could occur because the frequency or severity of claims is greater or lower than estimated. The insurance risks are mitigated through strict underwriting criteria, the utilising of actuarial review and the use of reinsurance.

The Company manages it insurance risk through underwriting limits, approval procedures for transactions that involve new products or that exceed set limits, pricing guidelines, centralised management of reinsurance and monitoring of emerging issues.

The Company reinsures a significant portion of the risks it underwrites in order to control its net exposure to losses and protect capital resources. The Company buys non-proportionate facultative reinsurance to reduce the Company's net exposure.

Ceded reinsurance contains credit risk and reinsurance recoverables that are reported after deductions, if any, for known insolvencies and uncollectible items. The Company monitors the

financial condition of reinsurers on an ongoing basis and reviews its reinsurance arrangements annually.

C.2 Market Risk

The Company's primary objective in relation to market risk is to protect and preserve the Company's assets. The Company therefore only invests in line with the Company's Investment Policy which is reviewed on an annual basis by the Board of Directors.

The Company and the Board will annually review the amount of funds invested with any one institution. The Company has little appetite for counterparty default risk in relation to investments and seeks to invest in institutions with an investment grade rating.

All of the Company's liabilities can be considered short term in nature and hence the Company looks to limit the duration of investments to reduce Asset Liability Matching risk.

C.3 Credit Risk

Credit Default Risk

The investment strategy and minimum rating requirement outlined in the Company's Investment Policy is pursued and seeks to minimise credit default risk and lock in an illiquidity premium. Currently, the Company hold all funds on bank deposit.

Counterparty Default Risk

The Company recognises potential exposure to the failure of its counterparties. The exposure is reduced as the counterparties have strong market presence and also the credit default risk is managed by ensuring a general minimum credit rating of A or greater, as documented in the Company's Reinsurance Policy.

C.4 Liquidity Risk

The Company's Liquidity Policy requires sufficiently liquid assets to be held in order to meet outflows. All investments are held in a liquid state and the Company has clear visibility of when policyholder obligations will and could fall due given the nature and scale of the Company being a Captive Insurer. Ongoing monitoring of liquidity also allows mitigating actions to be taken at an early stage if required.

C.5 Operational Risk

The Company is exposed to operational risk, which is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. In particular, this includes the failure of key outsourcing arrangements, business disruption, fraud and loss of key personnel.

The process through which the Company's operational risk universe is determined and subsequent estimates of frequency and severity are assessed is captured in the Operational Risk Policy. This process safeguards the ongoing improvement of the control environment and ensures that operational risk is identified and mitigated.

The Company is reliant on the use of external parties to provide a significant portion of the services required, and thus is therefore exposed to the potential failure of these outsourcing partners. The Company has documented a Contingency Plan and an Outsourcing Policy which set out how this risk is managed and monitored.

C.6 Other Material Risks

The Company considers that there are no other Material Risk to be considered at this time.

D. Valuation for Solvency Purposes

D.1 Assets

Valuation of Assets

The recognition and valuation basis are in accordance with the provisions of the Solvency II Directive with the valuation and recognition for material classes as follows:

Intangible Assets

Intangible assets are recognised under International Financial Reporting Standards (IFRS) on the basis that the expected future economic benefits that are attributable to the asset will flow to the Company, and the cost of the asset can be measured reliably. The Company holds no intangible asset and thus no recognition and valuation methodology was applied in respect of this category.

Deferred Tax Asset

Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. The Company holds no Deferred Tax Asset balance as at the reporting date.

Investments

Investments are recognised under IFRS on the basis that the Company becomes a party to the contractual provisions of the instrument.

All financial assets and liabilities are initially measured at transaction price, except for those financial assets classified as fair value through profit and loss, which are initially measured at fair value.

Realised and unrealised gains and losses arising from the changes in the fair value of investments are presented in the non-technical profit and loss account in the period in which they arise. Interest income is recognised when earned and investment management and other related expense are recognised when incurred.

Material Differences in the above used for valuation in Financial Statements

Sofinsod Insurance DAC Assets (EUR)	Current Accounting Bases	SII Valuation Principles
Deferred Acquisition Costs	53,145	-
Deferred Tax assets	-	35,315
Reinsurance share of TP - non-life excluding health	88,718	94,812
Reinsurance share of TP - health similar to non-life	-	-
Insurance & Intermediaries Receivable	1,876,644	212,047
Cash & Cash Equivalents	9,133,897	9,133,897
Any Other Assets, Not Elsewhere Shown	169,790	626,841
Total assets	**11,322,195**	**10,102,912**

Overview of any assets not regularly traded in Financial Markets

The Company does not currently hold any assets that are not regularly traded in financial markets.

D.2 Technical Provisions

Valuation of Technical Provisions per Line of business

Technical provisions are valued in accordance with Article 77 of the Solvency II Directive which states that the value of technical provisions shall be equal to the sum of a best estimate and a risk margin.

Valuation results

The valuation was carried out for each line of business. Under Solvency II, the balance sheet is required to be valued on a “best estimate” discounted cash flow basis. This leads to differences in claims provision between financial statements and Solvency II.

The table below sets out the results of the Technical provision calculations on the financial statements and Solvency II basis.

Sofinsod Insurance DAC Liabilities (EUR)	Current Accounting Bases	SII Valuation Principles
Gross Technical Provisions – Non-Life (Excluding Health)	3,983,870	3,011,790
TP calculated as a whole (Best estimate + Risk margin)	3,983,870	-

Best Estimate	-	2,730,042
Risk Margin	-	281,748
Insurance & Intermediaries Payable	366,913	366,913
Any other liabilities, not elsewhere shown	129,642	129,642
Total liabilities	**4,480,425**	**3,508,345**

The Solvency II Directive regulation requires the inclusion of “run-off” expenses to be incorporated into the Solvency II calculation. This has been added to the net technical provisions for the Company.

Claims Provision

As at the reporting date, the Company had known losses reported with combined reserves of EUR 1.12M booked in the audited financial statements together with Incurred but not Reported (IBNR) provisions in the amount of EUR 1.68M.

Material Differences in the above used for valuation in Financial Statements

The above table outlines the material differences in the valuation of technical provisions between the Financial Statements and Solvency II valuation.

Simplification

The Company utilises the standard formula for the calculation of its Solvency Capital Requirement (‘SCR’). Simplification method two is used for the standard formula.

Uncertainties in the value of Technical Provisions

The key assumptions that impact the Technical Provisions are detailed below along with comments regarding the materiality of these assumptions.

- **Settlement period:** Vary according to the line of business. There is a combination of risks being underwritten which are both short-tailed and long tailed. We have assumed that the property risk would run off within 3 years and that the auto liability risk would run off within 9 years. The Marine risk is assumed to run off within 3 years.

- **Discount rate:** Current yields are very low, which means that minimal discounting is applied to the Technical Provisions. EUR yields are negative for the first 3 years at present. Similarly, SEK yields are negative for the first 3 years. Overall, however, the effect of the discounting is a small increase to the value of the technical provisions held when valued using Solvency II principles.

- **Expenses:** The total expenses involved in the operation of the Company are relatively small when compared to other elements in the calculation of the technical provisions.

- **Reinsurance:** We have also assumed that the reinsurance will perform as expected.

The above assumptions are consistent with the latest Actuarial Function Report therefore there have been no material changes in technical provisions due to underlying changes in the assumptions.

Impact of Reinsurance on Technical Provisions

The impact of reinsurance under SII valuation principles is to increase the Company's Reinsurer's Portion of Technical Provisions by EUR 6,094 owing to the discounting effect.

Effectiveness of reinsurance arrangements

The Company's "Reinsurance and Other Risk Mitigation Techniques" Policy, last approved on 6th December 2017 refers to the below key principle:

- That the reinsurance programme provides cover appropriate to the Company's level of capital, risk profile, business strategy and risk appetite statement.

It is noted that: "The use of reinsurance is to maintain underwriting risk within the Company's approved risk tolerance levels." The Board were satisfied with the effectiveness of the reinsurance arrangements in place.

It is also noted that, the Sodexo Group could purchase insurance directly from the market and therefore the use of the Company for the provision of insurance services is a conscious decision made in order to improve the efficiency of the risk management process within the Group by using a Company vehicle and provide access to reinsurance markets.

Matching Adjustments, Volatility Adjustments and Transitional Measures

The Company has no matching adjustments, volatility adjustments or transitional measures as at the reporting period.

D.3 Other Liabilities

Valuation of liabilities per Class of Liability

Recognition

Financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial liabilities are classified according to the substance of the contractual arrangement entered into.

Initial measurement

All financial liabilities are initially measured at transaction price.

LIABILITIES	EUR
Creditors arising out of insurance operations	366,913
Other creditors including taxation and accruals	129,642
Total	**496,555**

Material Differences in the above used for valuation in Financial Statements

There is no differentiation between the valuation of the other liabilities under IFRS financial statements and Solvency II valuation.

D.4 Alternative methods for valuation

No alternative methods for Valuation are utilised.

D.5 Any other Information

None.

E. Capital Management

E.1 Own Funds

The Company has the following components of own funds: Tier 1 basic own funds; ordinary share capital, and retained earnings and Tier 3, deferred tax asset.

The Company's ordinary shares have full voting, dividend and capital distribution (including on winding up) rights; they do not confer any rights of redemption.

The difference between the Company's equity as shown in its Irish GAAP financial statements and the excess of assets over liabilities as calculated for solvency purposes is:

- the difference between the technical provisions calculated in accordance with the Solvency II requirements
- deferred tax adjustment in relation to the above differences

No deductions are applied to own funds and there are no significant restrictions affecting their availability and transferability. The Minimum Capital Requirement ('MCR') and SCR were calculated using the standard formula.

Solvency Capital Requirement Coverage

The Company's targeted SCR coverage is currently set at a minimum of 120% of the Pillar 1 solvency capital requirement. It is envisaged that the target SCR coverage will be reviewed once the Company has completed one full year of trading. On an annual basis, and having regard to the results of stress tests applied to projections over the three year planning period, the Board will consider whether a dividend should be paid to remit any surplus capital above this target.

At the reporting date, no dividends have been declared or paid to Group.

Solvency Capital Position

The table below sets out the Company's pillar 1 capital position as at 31st August 2018:

Composition	Available Capital	Eligible Capital
Tier 1 unrestricted	6,559,253	6,559,253
Tier 1 restricted	-	-
Tier 2 basic	-	-
Tier 2 ancillary	-	-
Tier 3	35,315	35,315
Total	6,594,568	6,594,568

Solvency	Capital Requirement	Eligible Capital	Solvency Ratio	MCR as % SCR
SCR	4,118,263	6,594,568	160.1%	89.8%
MCR	3,700,000	6,559,253	177.3%	

E.2 SCR & MCR

The Company has achieved SCR coverage of 160% and MCR coverage of 177% as at 31st August 2018.

E.3 Use of duration based equity risk Sub module in SCR calculation

The Company does not hold any liabilities that require this approach; therefore this is not applicable for the Company.

E.4 Non Compliance with MCR and SCR during the period

The Company was compliant at all times with the MCR and SCR requirements during the reporting period.

E.5 Any Other Information

None.
