Executive Summary

The new, harmonized EU-wide regulatory regime for Insurance Companies, known as Solvency II, came into force with effect from 1 January 2016. The regime requires new reporting and public disclosure arrangements to be put in place by (re)insurers. This document is the third version of the Solvency and Financial Condition Report (“SFCR”) that is required to be prepared by DCC Group Insurances dac (“the Company”).

This report covers the Business and Performance of the Company, its System of Governance, Risk Profile, Valuation for Solvency Purposes and Capital Management.

Company Background

DCC Group Insurances dac is a company incorporated in Ireland and authorised by the Central Bank of Ireland (“CBI”) to carry out the following classes of non-life insurance business:

- Class 3: Land Vehicle;
- Class 10: Motor Vehicle Liability;
- Class 13: General Liability.

The Company is a non-life captive insurance undertaking that insures selected risks of the DCC Group.

Business and Performance

The Company's financial year end is 31st March each year. The Company booked pre-tax profits of €3.3 million in the year ended 31st March 2019 (2018: €1.1 million). The profit has been driven by positive underwriting performance on the business written in the year and positive claims development in respect of previous underwriting years.

System of Governance

The Company is subject to the the Central Bank of Ireland's Corporate Governance Requirements for Captive Insurance and Captive Reinsurance Undertakings 2015. The corporate governance principles of the Company are implemented via the following Corporate Governance Framework:

- Board of Directors
- Outsourced Service Providers
- Internal Control Framework
- Risk Management Framework
- Compliance Function
- Audit – Internal & External

Outsourced Activities

The following is a list of the important outsourced operational functions together with the jurisdiction in which the service providers of such functions or activities are located:

Critical Outsourcing Arrangements				
Outsourced Provider	Service Outsourced	Internal/External	Jurisdiction	Outsourcing Oversight
Marsh Management Services (Dublin) Limited	Captive Manager	External	European Union	K. Lucey (PCF-2)
	Compliance Function			
	Risk Management Function			
DCC plc	Internal Audit Function	Internal	European Union	
Barnett Waddingham LLP	Head of Actuarial Function	External	European Union	
Davies Ireland Limited	Claims Administration	External	European Union	
Zurich Insurance PLC				
Crawford & Company				

Risk Profile

The Company uses the Standard Formula to assess the solvency and capital requirements. The following table outlines the material risks to which the Company is exposed as well as the undiversified capital charge associated with the risks at year end 2019.

SCR €'000	Market €'000	Default €'000	Non-life €'000
5,611	1,202	776	4,553

Valuation for Solvency Purposes

The Company assets and liabilities, under Solvency II methodology, are valued at best estimate. This differs in some respects from the GAAP valuations for financial statements. In particular, the technical provisions for the Solvency II balance sheet represent the present value of future claim payments. A risk margin is also included in technical provisions, which represents the cost of holding the solvency capital requirement. Section D of the SFCR shows the comparison between the Solvency II balance sheet and the Financial Statements.

Capital Management

The objective of own funds management is to maintain, at all times, sufficient own funds to cover the SCR and MCR with an appropriate buffer. As part of own funds management, the Company prepares ongoing annual solvency projections and reviews the structure of own funds and future requirements. The business plan, which forms the basis of the ORSA contains a three-year projection of funding requirements and helps focus actions for future funding.

The Company is a single shareholder entity whose ordinary shares are fully paid up.

The Company has no debt financing nor does it have plans to raise debt or issue new share capital over the three year time horizon used for business planning.

The company solvency position including the individual risks is as follows:

Solvency	Capital requirement €'000	Eligible capital €'000	Solvency ratio %
SCR	5,611	9,990	178
MCR	3,700	9,990	270

A BUSINESS AND PERFORMANCE

A.1 Business

A.1.1 Name and legal form of the undertaking

DCC Group Insurances dac (hereinafter “the Company”) is incorporated in the Republic of Ireland and is a private company limited by shares.

A.1.2 Name of the Supervisory Authority responsible for the financial supervision of the undertaking

The Company is regulated by the Central Bank of Ireland (CBI). The CBI can be contacted at:

Central Bank of Ireland, PO BOX 559, New Wapping Street, North Wall Quay, Dublin 1, Ireland.

A.1.3 External auditor of the undertaking

The independent auditors of the Company are:

KPMG, 1, Harbourmaster Place, IFSC, Dublin 1, Ireland.

A.1.4 Holders of Qualifying Holdings in the Undertaking

The Company is wholly owned by DCC plc, a company incorporated in Ireland.

A.1.5 Legal Structure of the Group

DCC plc is also the ultimate and controlling party parent company.

A.1.6 Material lines of business and geographical areas

The Company is a non-life captive insurance undertaking that insures selected risks of the DCC Group.

The material geographical area in which the Company operates is the EU.

A.1.7 Significant Business events during the reporting period

No material events occurred during the year that would merit disclosure.

A.2 Underwriting Performance

The premium income written by the Company was derived from the coverage of the non-life insurance risks of DCC Group companies.

The Company writes the following lines of business:

Motor Liability (Class 10)
General Liability (Class 13)

For the purposes of capital reporting these are categorised as:

Class of Business as Local GAAP	Solvency II Class of Business
Motor Liability	Motor Vehicle Liability
General Liability	General Liability

The Company has determined that the Euro ("€") is the functional currency.

The tables below show a summary of the technical (underwriting) account for the year ended 31 March 2019 by material Line of Business and Geographical area (based on International Financial Reporting Standards (IFRSs)):

Underwriting performance for the main Solvency II Lines of Business and Geographical areas (including aggregate performance).

Aggregate UW Performance	31/03/2019	31/03/2018
	€'000	€'000
Gross Premium Earned	5,979	5,954
Insurance Premium Ceded	(2,359)	(2,326)
Net Earned Premiums	3,620	3,628
Gross Claims Incurred	(155)	(2,313)
Net Claims Incurred	(155)	(2,313)
Operating Expenses	(156)	(264)
Investment Income	38	15
Net Underwriting Profit	3,347	1,066

Financial Year ended 31 March 2019			
European Union	Motor Liability	General Liability	Total
	€'000	€'000	€'000
Gross Premium Earned	3,322	2,657	5,979
Insurance Premium Ceded	(1,226)	(1,133)	(2,359)
Net Earned Premiums	2,096	1,524	3,620
Gross Claims Incurred	(397)	242	(155)
Net Claims Incurred	(397)	242	(155)
Operating Expenses	(133)	(23)	(156)
Investment Income	19	19	38
Net Underwriting Profit	1,585	1,762	3,347

Financial Year ended 31 March 2018			
European Union	Motor Liability	General Liability	Total
	€'000	€'000	€'000
Gross Premium Earned	3,532	2,422	5,954
Insurance Premium Ceded	(1,287)	(1,039)	(2,326)
Net Earned Premiums	2,245	1,383	3,628
Gross Claims Incurred	(2,083)	(230)	(2,313)
Net Claims Incurred	(2,083)	(230)	(2,313)
Operating Expenses	(224)	(40)	(264)
Investment Income	8	7	15
Net Underwriting Profit/(Loss)	(54)	1,120	1,066

The Company booked pre-tax profits of €3.3 million in the year ended 31st March 2019 (2018: €1.1 million). The profit has been driven by positive underwriting performance on the business written in the year and positive claims development in respect of previous underwriting years.

A.3 Investment Performance

A.3.1 Income and expenses arising by asset class

The Company has an investment strategy which complies with the requirements of “the prudent person principle”.

As at 31 March 2019 the Company's investment portfolio comprised the following material asset classes:

Asset Class	31/03/2019		31/03/2018	
	Amount €'000	% of portfolio	Amount €'000	% of portfolio
Cash and cash equivalents	16,789	100%	15,202	100%
Total	16,789	100%	15,202	100%

The table below sets out the investment returns by asset class:

Asset Class	31/03/2019	31/03/2018
	€'000	€'000
Cash and cash equivalents	38	15
Total	38	15

Results are consistent with the prior year.

A.3.2 Gains and losses recognised directly in equity

No gains and losses have been recognised directly in equity.

A.3.3 Investments in securitisation

There are no investments in securitisation.

A.4 Performance of Other Activities

A.4.1 There have been no other significant activities undertaken by the company other than its insurance and related activities.

A.5 Any Other Information

There are no other material matters in respect of the business and performance of the Company.

B SYSTEM OF GOVERNANCE

B.1 General Information on the system of governance

B.1.1 Role and responsibilities of the administrative, management or supervisory body and key functions

The Company is classified as a Low Risk firm under the Central Bank of Ireland's risk-based framework for the supervision of regulated firms, known as PRISM or Probability Risk and Impact System and is subject to the Central Bank of Ireland's Corporate Governance Requirements for Captive Insurance and Captive Reinsurance Undertakings 2015 ("The Requirements").

Board of Directors:

The Company's Board of Directors carries responsibility for the effective, prudent and ethical oversight of the business and sets its business strategy and risk appetite. The Board of Directors is also responsible for ensuring that risk and compliance are properly managed in the company.

The current composition of the Board of Directors is as follows:

G. Whyte (Chairman)

K. Lucey

Y. Divilly

J. Magee

Independent Control Functions:

The Company has established the four key control functions in line with Solvency II requirements: risk management, actuarial, compliance and internal audit. These functions, each possessing distinct responsibilities, are tasked with providing oversight of and challenge to the business and for providing assurance to the Board in relation to the Company's control framework.

Risk Management Function

The role of the Company's risk management function is to identify and evaluate the major risks. Having considered the nature scale and complexity of the Company the Board have determined that the role of the RMF can be carried out by the Captive Manager, Marsh Management Services (Dublin) Limited ("the Manager") under the supervision of the Board. The roles and responsibilities of the risk management function are set out within the risk management policy.

Compliance Function

In order to effectively monitor and report on The Company's requirement to be in compliance with all applicable laws and regulatory requirements the Board of Directors has outsourced the compliance function to the Manager and an employee of the Manager has been appointed as Compliance Officer. The Compliance Officer reports to the Board.

Actuarial Function

To ensure compliance with Solvency II obligations, the role of the Head of Actuarial Function (“HoAF”) is outsourced to a third party provider. The HoAF reports to the Board.

Internal Audit Function

The internal audit function is outsourced within the DCC Group Internal Audit Team. The scope of internal audit activities includes the examination and evaluation of the effectiveness of the internal control, risk management and governance systems and processes of the entire licensed entity, including the Company’s outsourced activities. The Internal Audit function reports to the Board.

B.1.2 Material changes in the system of governance that have taken place over the reporting period.

No material changes took place over the reporting period, aside from the fact that certain functions, including the actuarial function, internal audit function and risk management functions were finalised and approved by the CBI in line with Solvency II requirements.

B.1.3 Remuneration policy for the administrative, management or supervisory body and employees.

The Company does not have any employees. Day-to-day running of the Company is handled by the Manager under a third party administrative agreement.

Hence the Company’s remuneration policy refers only to the remuneration of non-group executive directors should circumstances dictate that it is necessary to appoint external Executive Directors to the Board.

The Board of Directors of the Company includes Directors from DCC Group who receive no remuneration from the Company in relation to this.

B.1.3.2 Material transactions during the reporting period with shareholders, with persons who exercise a significant influence on the undertaking, and with members of the administrative, management or supervisory body.

The Company is a non-life insurance captive whose principal activity is the issuance of insurance policies direct to its parent company and its related subsidiaries/affiliated companies.

The Company did not enter into any transactions with key management personnel in the DCC Group during the year ended 31 March 2019.

Mr. J. Magee, a director of the Company, is also a director of the Captive Administration Manager, Marsh Management Services (Dublin) Limited.

B.2 Fit and Proper requirements

B.2.1 Requirements for skills, knowledge and expertise

On 1 October 2010, Part 3 of the Central Bank Reform Act 2010 introduced a harmonised statutory system for the regulation by the Central Bank of Ireland (“CBI”) of persons performing Controlled Functions (“CFs”) and Pre-Approval Controlled Functions (“PCFs”) in regulated financial service providers.

On 1 December 2011 the CBI issued the Fitness & Probity Standards under Section 50 of the Central Bank Reform Act 2010 which all persons performing Controlled Functions or Pre-Approval Controlled Functions should, at a minimum, comply with.

Guidance for (Re)Insurance Undertakings on the Fitness & Probity Amendments 2015 further assist companies in complying with their obligations brought in by the Solvency II (European Union (Insurance and Reinsurance) Regulations 2015 S.I. 485 of 2015).

The Company has adopted a Fitness and Probity Policy (reviewed by the Board on an annual basis) with the purpose of ensuring that:

- persons holding key positions within the Company are assessed in terms of their fitness and probity in relation to a proposed role and on an ongoing basis;
- effective procedures are in place to undertake this assessment;
- the results of such an assessment are documented;
- the Board is satisfied that it can conclude that persons holding key positions are fit and proper;
- responsibility is assigned to ensure fitness and probity is monitored on a continuous basis;
- approval is sought from the CBI prior to the appointment of persons performing Pre-Approval Control Functions.

B.2.2 Process for assessing the fitness and the propriety of the persons who effectively run the undertaking or have other key functions

The Policy outlines the procedures that must be followed for assessing the fitness and probity of persons performing CFs and PCF’s while also stipulating the requirements for instances when either of these functions are outsourced to a regulated or unregulated entity.

It also focuses on the documentation, controls and governance that are required to be in place to ensure compliance with the abovementioned Regulations.

This is achieved in the main by means of internal checklists, documentary evidence of qualifications proving suitability for the role in question, references, regulatory authority, companies’ office and police authority checks and self-certifications from the applicant in the form of Curricula Vitae and the CBI Individual Questionnaires.

B.3 Risk management system including the own risk and solvency assessment

B.3.1 Risk management system

The Company's risk management system is set out as follows:

1. The Board sets the Company Strategy.
2. The Board sets the Risk Strategy. The Risk Strategy describes and addresses the management of all material risks that the Company is exposed to in pursuit of the Company Strategy.
3. The Board sets the Risk Appetite. The Risk Appetite sets out the desired level of risk and the maximum level of variation from its risk appetite that it is willing to accept.
4. The Board has approved a Risk Policy and other individual risk policies necessary for the implementation of its Risk Strategy, consistent with its Risk Appetite.

The Company uses the Standard Formula to assess the solvency and capital requirements.

The Company performs an Own Risk and Solvency Assessment ("ORSA") at least annually. The main purpose of performing the ORSA is to ensure that the Company engages in a process of assessing all risks inherent in the business and determining the corresponding capital needs.

In order to ensure effective risk governance, the system has been designed to identify, assess, manage and monitor and report exposure to risk. This is a continuous process subject to continuous review and development.

Identify

The board reviews the risk profile of the Company at least annually and the Risk Management Function reviews the risk profile on an ongoing basis to ensure that the material risks of the Company are identified and recorded in the risk register.

Assess

Risks identified in the risk register are then quantified by the Board with input from the Risk Management Function and tolerances are established through the development of a risk appetite statement.

Manage

The Board determines the minimum standards to be maintained by the Company in order to manage the risks in a way that is consistent with its risk appetite by developing suitable individual risk policies.

Monitor/Report

Monitoring and reporting to the Board is undertaken at least quarterly from a number of sources including the Risk Management Function, Compliance Officer and the Internal Audit Function.

Findings from the development of the risk register are considered by the Board in the preparation of the annual internal audit plans.

The result is a risk management strategy, which is led by the Board of Directors whilst being embedded in the Company's business systems, strategy and policy setting processes and the activities of the Company.

B.3.2 Implementation of the Risk management system

The Company recognises the need to have appropriate governance, monitoring and reporting processes and procedures which enable the Company to identify, assess, manage, monitor and report the risks it is or might be exposed to.

Responsibility for risk management is spread throughout the Company and the wider Philip Morris group. Appropriate internal reporting procedures and feedback loops ensure that information on the risk management framework is actively monitored and managed by all relevant functions and the Board.

The Company adopts a "3 lines of defence" approach for the overall governance of its risk management system.

The Board of Directors is ultimately responsible for the risk management framework and internal control, including approval of the Company strategy and business planning.

1st Line of Defence – Day to Day:

Operations – the Manager: The Manager provides day to day operations, accounting, financial reporting and administrative support services and company secretarial and regulatory reporting services on an outsourced basis to the Company.

2nd Line of Defence – Oversight:

Risk Management Function ("RMF"): The RMF is responsible for the oversight of the ongoing development, implementation and operation of the risk management framework, strategy, related resource plan and making recommendations to the Board thereon.

Compliance Function: The Compliance Function is recognised as a key part of the Company's internal control system which should identify, assess, monitor and report on the compliance risk exposure of the Company.

In order to help achieve its compliance objective the Board has appointed a Compliance Officer. The role of the Compliance Officer is set out in the Company's Board approved Compliance Policy.

3rd Line of Defence – Independent Assessment:

Internal Audit Function: The Board has established an Internal Audit Function that is an independent function within the Company with a remit to examine and evaluate the functioning, effectiveness and efficiency of the internal control system and other elements of the system of governance of the Company.

The responsibilities of the Internal Audit function are set out in the Company's Board approved Internal Audit Policy. The Internal Audit Function reports to the Board.

External Audit: The Board recognises that the independent external auditor has an important role in the effectiveness of the governance and risk management systems of the Company. The Company is required by law to appoint an external auditor on an annual basis.

Actuarial Function: The role of the Actuarial Function is outsourced to third party provider via the terms of a written SLA.

B.3.3 ORSA

B.3.3.1 ORSA process

The Company prepares an ORSA on an annual basis and on an ad-hoc basis, if circumstances materially change. The objective of the ORSA process is to enable the Board to assess its capital adequacy in light of the assessments of its risks and the potential impacts of its risk environment, and to enable the Company to make appropriate strategic decisions.

The ORSA process is a rolling project plan of how the ORSA is completed, the interaction and contributions from different stakeholders, the process timetable, the audit trail and the monitoring and reporting cycle.

The Company has adopted the following approach for the conduct of the ORSA process:

Risk Management System: Board puts in place an effective risk management framework comprising of strategies, tolerances, policies, governance, monitoring and reporting procedures necessary to identify, measure, monitor, manage and report, on a continuous basis, the risks to which the company is or could be exposed in pursuing its Company strategy.

Risk Identification: Board initiates an organised identification of all actual risks as well as emerging risks, taking into account the Company's strategy and business planning horizon.

Risk Appetite: Appetites and tolerance limits for the risks identified are set by the Board, which provide a basis for allocating risk capacity against the Company's exposure to particular risk categories.

Current Business Activities, Risk Profile, Capital and Solvency: Analysis of the current business activities, risk profile (quantitative and qualitative), calculation and analysis of regulatory and economic capital, analysis of solvency margin cover and description and assessment of risk mitigation techniques.

Forecast Business Activities, Risk Profile, Capital and Solvency: Analysis of the forecast business activities, risk profile (quantitative and qualitative), calculation and analysis of regulatory and economic capital, analysis of solvency margin cover and description and assessment of risk mitigation techniques.

Stress and Scenario Analysis: Board assesses the effect of different stresses (including reverse stress testing) and scenarios.

Impact on Strategy: Output of the ORSA process is reviewed and challenged by the Board and continuously embedded into the Company strategy and system of governance.

B.3.3.2 ORSA review and approval process

The risk management process and ORSA is performed on an annual basis, after the SCR calculation or when there is a significant shift in The Company's business plan. The risk monitoring is performed on an on-going basis and the Risk Register is annually reviewed and updated during the ORSA review process.

The Board requires that the ORSA process produces meaningful reports on the adequacy of the Company's capital and that it includes risk sensitivities that can be used in shaping strategy and risk appetite.

The Board reviews the ORSA report and considers appropriate action for the business such as:

- Decisions in relation to capital;
- Reassessment of risk profile and appetite;
- Additional risk mitigation actions;
- Reassessment of investment strategy.

Under the following circumstances, a non-scheduled ORSA shall be performed immediately (in addition to the scheduled ORSA):

- Significant change in the risk profile of the Company which can be defined as a major change to the business strategy/business activity/insurance program etc.
(i.e. business activities other than the Company's current underwriting activity)
- Significant changes to Non-Financial matters - Operational/Regulatory and Legal/Strategic/Group Risks.
- Significant changes in Other categories - Capital Shortage Risks/quality of capital etc.

B.3.3.3 Statement explaining how the undertaking has determined its own solvency needs given its risk profile and how its capital management activities and its risk management system interact with each other.

The Company determines the solvency capital and assesses the overall solvency needs using the Solvency II standard formula.

A three year base case projection of the Solvency II Balance Sheets and Solvency Capital Requirements position is produced using the standard formula, as well as actuarial assumptions. The results are subjected to a range of scenario testing that is reviewed by management and challenged by the Board and, where appropriate, potential management actions are noted and conclusions drawn

The Company has sufficient capital to meet its base case SCR for its current and projected business activities over the 3 year business planning horizon. The Company also meets its strategic solvency target and is projected to meet it in future years.

The results of the ORSA show that the Company has sufficient eligible capital own funds to:

- Maintain a comfortable margin over its Overall Solvency Needs for its current and projected business activities over the business planning horizon;
- Continue to meet internal and regulatory solvency targets for capital management;
- Continue its business on a going concern basis over the business planning horizon.

B.4 Internal Control System

B.4.1 Description of the internal control system

The Board of Directors is ultimately responsible for the internal control framework, including approval of the Company strategy and business planning. Board level controls include the Board Charter, Company policies, reports and minutes of board meetings.

The Internal Control Framework of the Company has three other elements, as previously detailed in section B3.2:

First line of defence: “Day to day” operations and associated controls

Second line of defence: oversight from Compliance and Risk Management functions

Third line of defence: Independent Assessment, internal audit and actuarial functions (and also external audit).

B.4.2 Implementation of the compliance function

The Board of the Company has ultimate responsibility for its compliance objective.

To help achieve this aim the Board has established a Compliance Function, staffed by an appointed Compliance Officer, to supplement not supplant, the responsibilities of the Board to ensure compliance with legislation and applicable requirements.

The role of the Board appointed Compliance Officer is to:

- assist the Board with ensuring ongoing compliance with legislation and applicable requirements;
- enhancing the Company’s awareness of compliance matters;

- monitor the Company's compliance with insurance legislation and applicable requirements and guidelines;
- document any breaches identified, how they were addressed and whether any third party reporting of the breach is required;
- ensure that the Board is kept informed of any amendment to the applicable regulations, legislation and guidelines or the addition of any new requirements and the potential impact on the Company;
- provide opinions, recommendations, supervision and independent controls;
- provide reasonable assessment of the effectiveness and consistency of the internal processes used to control the compliance of the Company's operations and protect its reputation.

The Compliance Officer presents a Compliance Officer report to the Board at each board meeting which outlines the following:

- Details of regulatory correspondence with the Company
- Details of regulatory developments
- Details of which controls were tested since the last report and the results of the tests
- Conclusions and recommendations on the Company's compliance with reinsurance legislation and guidelines.

B.5 Internal audit function

B.5.1 Implementation of the internal audit function

The internal audit function is outsourced within the DCC Group Internal Audit Team. The internal audit function possesses a remit to examine and evaluate the functioning, effectiveness and efficiency of the internal control system and all other elements of the system of governance.

To this end, the Internal Audit Function is mandated to:

- establish, implement and maintain an audit plan setting out the audit work to be undertaken in the upcoming years, taking into account all activities and the complete system of governance of the Company;
- take a risk-based approach in deciding its priorities;
- report the audit plan to Board of Directors;
- issue recommendations based on the result of work carried out in accordance with (a) above, and submit a written report on its findings and recommendations to the Board of Directors on at least an annual basis.

B.5.2 Independence of the internal audit function

The internal audit function provides independent and objective assurance services.

B.6 Actuarial function

The role of the Actuarial Function is outsourced to third party provider, Barnett Waddingham LLP, via the terms of a written SLA.

The key role of the Head of Actuarial Function (HoAF) is to provide the following services:

- Opinion on Underwriting Policy
- Opinion on Technical Provisions
- Opinion on Reinsurance Arrangements

- Contribution to the Risk Management System
- Contribution to calculation of capital requirements
- Opinion on the ORSA process

B.7 Outsourcing

The Company has established an Outsourcing Policy which sets out the requirements for identifying, justifying and implementing material outsourcing arrangements. This Policy has been adopted by the Company and includes following:

- Definition of outsourcing and critical outsourcing;
- Risk Mitigation strategies;
- Board and Management responsibility;
- Due Diligence;
- Business Continuity Management (BCM);
- Contractual Arrangements;
- Management and control of the Outsourcing Relationship;
- Intra-Group Outsourcing;
- Final approval

The Company's outsourcing arrangements are subject to annual review and the findings of the report, along with the Outsourcing Policy are reviewed by the Board.

The following is a list of the important outsourced operational functions together with the jurisdiction in which the service providers of such functions or activities are located:

Critical Outsourcing Arrangements				
Outsourced Provider	Service Outsourced	Internal/External	Jurisdiction	Outsourcing Oversight
Marsh Management Services (Dublin) Limited	Captive Manager	External	European Union	K. Lucey (PCF-2)
	Compliance Function			
	Risk Management Function			
DCC plc	Internal Audit Function	Internal	European Union	
Barnett Waddingham LLP	Head of Actuarial Function	External	European Union	
Davies Ireland Limited	Claims Administration	External	European Union	
Zurich Insurance PLC				
Crawford & Company				

B.8 Assessment of the adequacy of the system of governance of the insurance or reinsurance undertaking to the nature, scale and complexity of the risks

The Company has assessed its corporate governance system and has concluded that it effectively provides for the sound and prudent management of the business, which is proportionate to the nature, scale and complexity of operations of the Company.

B.9 Any other material information regarding the system of governance of the Company

No material changes regarding the system of governance of the Company took place.

C RISK PROFILE

C.1 Underwriting risk

C.1.1 Key underwriting risks

Non-life underwriting risk at 31 March 2019 comprises 70% of the undiversified basic SCR.

The key underwriting risks to which the Company is exposed to are set out below:

Non-life premium and reserve risk

Underwriting risk arises from two sources – premium risk (pricing) and adverse claims development (reserve risk).

For a non-life insurer, underwriting risk is the risk arising from non-life reinsurance obligations in relation to the perils covered and the processes used in the conduct of business.

There are a number of material risks that are considered as a result of the Company's insurance underwriting.

For premium risk, the Company has considered the risk of under-pricing of premiums resulting in higher loss ratios than expected. The Board of Directors has approved an underwriting policy that established the standards and limitations' regarding the Company's underwriting activities.

The Company has no appetite for the underwriting of risks outside of its approved underwriting policy.

For reserve risk, the Company has considered the risk of over- and under-reserving of actual and expected claims. This risk is mitigated by the appointment of professional loss adjustors to assist in the determination of estimated loss reserves.

Non-life catastrophe risk

The risk of a major natural or man-made catastrophe event occurring, while not listed in the Company's risk register, is considered as part of its reinsurance strategy.

C.1.2 Material risk concentrations

The Company seeks to avoid concentration of risks by accepting insurance of risks which are sourced across the European Union and across different lines of business.

C.1.3 Assessment and risk mitigation techniques used for underwriting risks

The Company monitors and controls risks via various methods, including:

- Having in place clear underwriting and reserving philosophies and procedures and controls in relation to pricing and reserving;
- Assessing insurance risks with quality underwriting and claims expertise and information;
- Retaining risk within an approved risk appetite and solvency requirements;
- Expertise of professional loss adjusters;
- Transferring risk, through reinsurance with high credit quality entities;
- Monitoring changing environment and market conditions that affect risk;
- The ORSA includes stress and scenario testing which is used to assess the risks under stressed conditions;
- Independent opinion on the reasonableness and adequacy of the overall underwriting policy is provided by the Head of Actuarial Function on an annual basis.

C.2 Market risk

C.2.1 Material market risks

Market risk at 31 March 2019 comprises 18% of the undiversified basic SCR.

Market risk is the risk arising from the level of volatility of market prices of financial instruments. Exposure to market risk is measured by the impact of movements in the level of financial variables such as stock prices, interest rates, real estate prices and exchange rates. Market risk is arrived at using the assumptions and calculations methods contained in the Standard Formula.

Investment objectives are outlined in the Company's Investment and Asset Liability Policy.

The table below outlines the components of the market risk module as at 31 March 2019.

Market Risk sub-module	€'000
Interest Rate	10
Concentration	642
Spread	61
FX	996

Interest rate risk: the risk that the Company is exposed to lower returns or loss as a direct or indirect result of fluctuations in the value of, or income from, specific assets arising from changes in underlying interest rates.

Interest risk is not considered largely material given the nature and structure of the Company's investments. The Company has allocated an interest rate charge of €10k.

Concentration Risk: the risk that excessive exposure to counterparty will impact on the solvency of Company.

Concentration risk of €642k arises from the term deposit with HSBC of £4.7m (AA rating).

Spread Risk: the sensitivity of the value of investments, primarily bonds and deposits in respect of the Company, to changes in the level or in the volatility of credit spreads. Spread risk is linked to the credit rating of assets held and the effect of a market change in the credit curve.

Spread risk also arises from the HSBC term deposit.

Currency risk: the risk that the Company is exposed to higher or lower returns as a direct or indirect result of fluctuations in the value of, or income from, specific assets or liabilities arising from changes in underlying exchange rates.

The Company has a small exposure to currency risk deriving from UK business and has allocated an FX risk charge of €996k.

C.2.2 Material risk concentrations

The Company does not have any material market risk concentration exposures.

C.2.3 Prudent person principle applied to market risks

The high quality and conservative investments are a consequence of the investment assets being prudently invested, taking into account the liquidity requirements of the business and the nature and timing of the insurance liabilities.

C.2.4 Assessment and risk mitigation techniques used for market risks

The Company monitors and controls market risks via various methods, including:

- Compliance with the Investment and Asset Liability Policy as approved by the Company's Board of Directors;
- Retaining risk within an approved risk appetite and solvency requirements;
- Monitoring changing environment and market conditions that affect risk;
- The ORSA includes stress and scenario testing which is used to assess the risks under stressed conditions.

C.3 Credit risk

C.3.1 Material market risks

Credit risk at 31 March 2019 comprises 12% of the undiversified basic SCR.

Credit risk is the risk that the Company is exposed to lower returns or loss if another party fails to perform its financial obligations towards the Company.

The counterparty default risk module in the Standard Formula is mainly driven by cash at bank and the reinsurers' share of technical provisions (under loss scenarios).

C.3.2 Material risk concentrations

Reinsurance risk is managed through the Company's outward reinsurance policy, which stipulates minimum credit ratings and monitoring/reporting thereof and other salient requirements.

C.3.3 Prudent person principle applied to credit risks

Counterparties are selected by taking into account the credit rating and reputation of each entity. Credit ratings are used as a way of properly identifying and managing the risk attached to a counterparty.

C.3.4 Assessment and risk mitigation techniques used for credit risks

The Company monitors and controls credit risks via various methods, including:

- Minimum rating criteria for the placing of deposits and opening of bank accounts, in line with the Investment and Asset Liability Policy;
- Transferring risk, through reinsurance with high credit quality entities;
- Monitoring the credit ratings of counterparties;
- Reporting of cash, investment and liquidity positions takes place monthly as part of the Company's management accounts reporting process;
- Retaining risk within an approved risk appetite and solvency requirements;
- The ORSA includes stress and scenario testing which is used to assess the risks under stressed conditions.

C.4 Liquidity risk

C.4.1 Material liquidity risks

Liquidity risk refers to the risk that undertakings are unable to realise investments and other assets in order to settle their financial obligations when they fall due.

It is the Company's policy that liquidity and concentration risk is minimised as much as possible

The Company has considered the risk of a lack of liquidity available to pay insurance liabilities in its risk register. No specific allocation of capital is considered necessary for this risk.

The Company's cash in-flow is generated from premium income. Its cash out-flow consists mainly of claims payments and a small volume of administration expenses

C.4.2 Prudent person principle applied to liquidity risks

The investment assets are prudently invested taking into account the liquidity requirements of the business and the nature and timing of the insurance liabilities.

C.4.3 Assessment and risk mitigation techniques used for liquidity risks

The Company monitors and controls risks via various methods, including:

- Compliance with the Liquidity and Concentration Policy as approved by the Company's Board of Directors;
- Retaining risk within an approved risk appetite and solvency requirements;
- The Manager monitors cash movements and performs cash flow forecasting which are regularly reported to the Company;
- Reporting of cash, investment and liquidity positions takes place monthly as part of the Company's management accounts reporting process.

C.5 Operational risk

C.5.1 Material operational risks

Operational risk is the risk of loss resulting from failed internal processes, people and systems or from external events. Operational risks which can result in losses include internal fraud. External fraud, employment practices, system failures and disregard of company policies.

The Company seeks to limit all operational risk through the implementation of a robust system of internal controls and procedures.

For such non-quantifiable risks, the Company has set a strategic surplus (target) of 15% as a prudent buffer to the Standard Formula calculation.

Operational risks are also addressed in the capital requirement as an addition to the BSCR to the extent that they have not been explicitly covered in other risk modules. The operational risk capital charge as at 31 March 2019 is €179k.

C.5.2 Assessment and risk mitigation techniques used for operational risks

The Company monitors and controls operational risks via various methods, including:

- Identifying and analysing risk through a disciplined risk assessment process;
- Mitigating or avoiding risks that do not fit within the Company's business objectives;
- Implementing a robust system of internal controls and procedures;
- Segregation of duties;
- Monitoring and internal reporting;
- Outsourcing its management to an experienced management company;
- Setting a strategic surplus target above the SCR;
- Commitment of effective corporate governance.

C.6 Other material risks

The Company has included a range of non-quantifiable risks in its ORSA process. Documented associated actions exist for each of these risks and they are reviewed on a quarterly basis by the Board of Directors.

Sample risks include:

- Regulatory and Compliance;
- Loss of key personnel/director's resignation;
- Outsourcing.

The Company has no appetite for regulatory risk. It is the objective of the Company to be at all times in compliance with Insurance Acts and Regulations, and with Guidelines issued by the insurance supervisory authority and other applicable legislation in accordance with good corporate governance and codes of conduct.

The Board is satisfied that the Company has a succession plan in place and in the event that a director resigns or intends to resign the parent Company will provide a replacement nominee for that position as soon as possible.

The Board recognises that the Company operates on a basis of an outsourced model, whereby the day to day operations and number of key functions are outsourced; the Board is satisfied that all outsourcing agreements include an appropriate period notice.

This would provide the Company with sufficient time to find an alternative professional services provider. Additionally, performance of outsourced providers is reviewed on an annual basis and such review would flag any potential deficiencies of the individual service provider.

The Board considers that these non-quantifiable risks that are not captured by the standard model are covered by the application of a specified strategic solvency target.

C.7 Amount of expected profit included in future premiums as calculated in accordance with Article 260(2)

Future profits are allowed for in accordance with Article 260(2).

C.8 Stress and sensitivity tests

The Company's ORSA contains 4 scenarios. Stress testing is based on the largest risks per the Company's risk register; accordingly the following scenarios were modelled:

1. Large losses incurred across all insurance programs;
2. Downgrade of reinsurance panel;
3. Downgrade of financial counterparties;
4. Combination of scenarios 1 and 3.

Robust risk mitigation practices and remediation plans are in place to address these risks.

As part of the 2018 ORSA the Company considered reverse stress tests for all stress scenarios. This can be defined as a stress test that requires assessment of scenarios and circumstances that would render its business model unviable, thereby identifying potential business vulnerabilities.

The stress test under scenario 4, being a combination of large losses incurred across all insurance programs and a concurrent downgrade of the Company's financial counterparties, indicated that under these circumstances a capital injection from the Parent Company would be required in order for the Company to continue to meet its solvency capital requirement.

C.9 Any Other Information

The Company has identified all material risks through its risk register and there is no other material information regarding the risk profile of the Company that warrants disclosure.

D VALUATION FOR SOLVENCY PURPOSES

D.1 Assets

D.1.1-2 Local GAAP and Solvency II Valuations

The table below sets out the value of the Company's material assets as at 31 March 2019:

	31/03/2019		31/03/2018	
	Assets per GAAP	Assets per Solvency II	Assets per GAAP	Assets per Solvency II
	Total €'000	Total €'000	Total €'000	Total €'000
Cash and cash equivalents	16,789	11,272	15,202	10,965
Deposits other than cash equivalents	-	5,517	-	4,237
Reinsurer's share of technical provisions	1,233	-	1,128	-
Insurance and Intermediaries Receivables	172	172	345	345
Other Assets	9	9	-	-
Deferred tax asset	-	-	-	29
Total assets	18,203	16,970	16,675	15,576

The Company's assets are recognised and valued using the following principles:

Cash and cash equivalents

Cash and cash equivalents comprise cash deposits held at call with banks. Cash and cash equivalents are measured at fair value.

Reinsurer's share of technical provisions

Reinsurer's share of technical provisions are comprised of the reinsurer's share of unearned premiums.

Adjustments for solvency purposes relates to the application of the Solvency II best estimate valuation. The fair value of these technical provisions is calculated by discounting estimated future cash-flows (best estimates) based on estimated duration of each provision (payment pattern), using the risk-free interest rates curve.

Deferred tax asset

In the previous year, the Company recorded a deferred tax asset as the cash flows from their relevant Basic Own Funds items resulted in a decrease in available capital when translating from Local GAAP/IFRS to Solvency II and the Company therefore recognised future tax receivable on this capital.

D.2 Technical Provisions

D.2.1 Local GAAP and Solvency II Valuations

The table below shows an analysis of the gross technical provisions as at 31 March 2019:

Insurance Class	31/03/2019		31/03/2018	
	TPs per GAAP	TPs per Solvency II	TPs per GAAP	TPs per Solvency II
	€'000	€'000	€'000	€'000
Motor Vehicle Liability				
Best estimate of liabilities (BEL)	4,670	3,675	5,810	4,966
Risk margin	-	203	-	237
General Liability				
Best estimate of liabilities (BEL)	3,035	2,304	3,665	3,189
Risk margin	-	173	-	184
Total technical provisions	7,705	6,355	9,475	8,576

Solvency II classes of business: Classes of business have been allocated to Solvency II line of business on the following basis:

Class of Business as Local GAAP	Solvency II Class of Business
Motor Liability	Motor Vehicle Liability
General Liability	General Liability

The GAAP accounts of the Company include provisions for claims incurred and claims incurred but not reported, which consider all reasonably foreseeable best estimates. An unearned premium reserve is also included, relating to gross premiums written that have not yet expired by the end of the financial period by reference to the full term of the insurance policies to which such premiums written relate.

A number of adjustments were made to the GAAP provisions in order to obtain the Solvency II technical provisions. Key points to note are as follows:

The Solvency II technical provisions are made up of a best estimate of the claims, premiums and expenses cash flows that are discounted to give an estimate of the provisions.

Cash-flows and discounting: Cash-flows have been discounted using the Euro risk free yield curve as at 31 March 2019 as published by the European Insurance and Occupational Pensions Authority ("EIOPA").

Risk Margin

The risk margin has been calculated separately by determining the cost of providing an amount of eligible own funds equal to the Solvency Capital Requirement necessary to support the insurance and reinsurance obligations

The annual cost of capital is taken to be 6% of the capital estimated at each future point.

D.2.2 Uncertainty associated with the value of Technical Provisions

All estimates of unpaid loss reserves are inherently uncertain. The key areas of uncertainty of the technical provisions are driven by the uncertainty of the underlying booked reserves.

D.2.3 Solvency II and local GAAP valuation differences of Technical Provisions by material line of business

See analysis in Section D2.1.

D.2.4 The Company does not apply the matching adjustment referred to in Article 77b of Directive 2009/138/EC.

D.2.5 The Company does not use the volatility adjustment referred to in Article 77d of Directive 2009/138/EC.

D.2.6 The Company does not apply the transitional risk-free interest rate-term structure referred to Article 308c of Directive 2009/138/EC.

D.2.7 The Company does not apply the transitional deduction referred to in Article 308d of Directive 2009/138/EC.

D.2.8 Recoverables from reinsurance and special purpose vehicles

Total reinsurance recoverables at 31 March 2019 were € nil (2018: € nil). An overview of the Solvency II valuation bases has been provided in Section D1.1.

D.2.9 Material changes in relevant assumptions made in the calculation of technical provisions

There are no material changes in the relevant assumptions made in the calculation of the technical provisions compared to the previous reporting period.

D.3 Other liabilities

Other liabilities at 31 March 2019 were €610k (2018: €242k) and are composed of sundry creditors, insurance payables, tax creditors and accrued expenses.

There were no differences between the Local GAAP and Solvency II valuations.

D.4 Alternative Methods for Valuation for other liabilities

The Company does not use any alternative methods for valuation.

D.5 Any Other Information

There are no other material matters in respect of the valuation of assets and liabilities.

E CAPITAL MANAGEMENT

E.1 Own funds

E.1.1 Objective, policies and processes for managing own funds

The objective of own funds management is to maintain, at all times, sufficient own funds to cover the SCR and MCR with an appropriate buffer. As part of own funds management, the Company prepares ongoing annual solvency projections and reviews the structure of own funds and future requirements. The business plan, which forms the basis of the ORSA contains a three-year projection of funding requirements and helps focus actions for future funding.

The Company is a single shareholder entity whose ordinary shares are fully paid up.

The Company has no debt financing nor does it have plans to raise debt or issue new share capital over the three year time horizon used for business planning.

The medium-term capital management plan set by the Board is as follows:

- Own funds to be maintained at an agreed level in excess of the SCR, target solvency margin cover is currently set at 115% of the SCR;
- Dividends will not be paid or will be deferred if doing so would cause the Company to breach its legal and regulatory requirements or fall below the abovementioned target SCR cover;
- The Company's own funds are primarily invested in cash and cash equivalents in line with the Board approved Investment and Asset Liability Policy.

E.1.2 Own funds analysed by tiers

An analysis of own funds is shown below:

Date	Description	Tier 1 €'000	Tier 3 €'000	Total €'000
1 April 2018	Opening balance comprising: Ordinary share capital Reconciliation Reserve Deferred Tax Asset	7,500 (770)	29	7,500 (770) 29
	Movement in the Reconciliation Reserve for the year ended 31 March 2019	3,260		3,260
	Movement in Deferred Tax Asset		(29)	(29)
31 March 2019	Closing balance	9,990	-	9,990
	<i>Represented by:</i>			
	Ordinary share capital	7,500		7,500
	Reconciliation reserve (comprising retained earnings and Solvency II adjustments)	2,490		2,490
	Deferred Tax Asset		-	-
	Total Basic own funds after deductions	9,990	-	9,990

The Company's ordinary share capital and reconciliation reserve are all available as tier 1 unrestricted own funds as per Article 69 (a)(1) of the Delegated Regulation. The reconciliation reserve equals the excess of liabilities over assets less other basic own fund items, as at the reporting date. There are no foreseeable dividends or own shares held.

The Company has no tier 1 restricted own funds and no tier 3 own funds as at 31 March 2019.

E.1.3 Eligible amount of own funds to cover the Solvency Capital Requirement, classified by tiers

The eligible amount of own funds to cover the Solvency Capital Requirement is €9.99m. This is comprised solely of Tier 1 unrestricted Basic Own Funds.

E.1.4 Eligible amount of own funds to cover the Minimum Capital Requirement, classified by tiers

The eligible amount of own funds to cover the Minimum Capital Requirement is €9.99m. This is comprised of Tier 1 unrestricted Basic Own Funds of €9.99m.

Reconciliation of Basic Own Funds to Equity as per financial statements as at 31 March 2019	
	€'000
Solvency II - Basic Own Funds	9,990
Total Equity as per financial statements	9,887
Difference:	103
<u>Represented by:</u>	
Difference between Net Technical Provisions and BEL	494
Risk Margin – Non Life	(376)
Solvency II Deferred Tax Liability	(15)
Difference:	103

E.1.6 None of the Company's own funds are subject to the transitional arrangements referred to in Articles 308b(9) and 308b(10) of Directive 2009/138/EC.

E.1.7 The Company has no tier 3 own funds as at 31 March 2019.

E.1.8 No deductions are applied to own funds and there are no material restrictions affecting their availability and transferability.

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.1 Amount of Solvency Capital Requirement and Minimum Capital Requirement

The table below shows the total SCR and MCR at 31 March 2019:

	€'000
Solvency Capital Requirement	5,611
Minimum Capital Requirement	3,700

The final amount of the SCR remains subject to supervisory assessment.

E.2.2 Solvency Capital Requirement split by risk modules

The table below shows the SCR components by risk module (using the Standard Formula) at 31 March 2019.

	2019	2018
	€'000	€'000
Market risk	1,202	767
Counterparty default risk	776	775
Non-life underwriting risk	4,553	4,672
Diversification	-1,099	-855
Basic Solvency Capital Requirement	5,432	5,359
Operational Risk	179	245
Overall Solvency Capital Requirement	5,611	5,604

Available Capital	9,990	6,759
SCR Cover	178%	121%

E.2.3 Simplified calculations are not used for any of the risk modules or sub-modules.

E.2.4 The Company does not use undertaking specific parameters in its computation.

E.2.5 The Minimum Capital Requirement is set at the absolute minimum capital requirement of €3.7m.

E.2.6 There were no material changes to the Solvency Capital Requirement and to the Minimum Capital Requirement over the reporting period.

E.3 Any use of the equity risk sub-module in the calculation of the Solvency Capital Requirement.

The Company has not opted to use the duration-based equity risk sub-module set out in Article 304 of Directive 2009/138/EC.

E.4 Internal model information.

The Company applies the Standard Formula model and does not use an internal model to calculate the Solvency Capital Requirement.

E.5 Non compliance with the Minimum Capital Requirement and significant non-compliance with the Solvency Capital Requirement.

There were no breaches of the Solvency Capital Requirement (and hence the Minimum Capital Requirement) over the reporting period.

E.6 Any other information.

There are no other material matters in respect of the valuation of capital management.
