INTRODUCTION

CCHBC Reinsurance DAC (the “Company” or “CCHBC Re”) has prepared the below Solvency and Financial Condition Report in accordance with the regulations set out in Articles 292 –297 of the Solvency II Delegated Acts together with the Guidelines on reporting and public disclosure issued by EIOPA.

SUMMARY

This Report refers to the business of CCHBC Reinsurance DAC a captive composite reinsurer, authorised and supervised by the Central Bank of Ireland. It provides the reader with information on the Company’s business and performance, system of governance, risk profile, valuation for solvency purposes and capital management for the reporting period ended 31 December 2020.

The Company’s business strategy is to provide coverage for certain employee benefit (“EB”) and property risks of Coca-Cola Hellenic Bottling Group (“Coca-Cola HBC”). Investment of the Company’s funds is in line with the documented investment strategy, reflecting a ‘prudent person’ approach to the management of counterparty, concentration, interest rate and currency risk.

The Board has identified the key risks to which CCHBC Re is exposed and established appropriate corporate governance, risk management and reporting mechanisms to ensure that the identified risks remain relevant, and that they are managed and reported on with appropriate levels of detail and frequency. The Company has established a comprehensive suite of risk policies and implemented a series of internal controls to ensure that CCHBC Re can be managed in accordance with its governance and risk management systems. Documented escalation mechanisms are in place to ensure that any breaches in risk limits and tolerances, internal controls and governance requirements can be reported promptly to the appropriate individuals. Risks to which the Company is exposed are well understood and are used to determine the level of solvency and capital required over the business planning period and to better inform decision making within the Company.

Risks to which the Company is exposed are well understood and are used to determine the level of solvency and capital required over a forward-looking three-year business planning period. The results of this exercise are used to better inform decision making within the Company.

As at 31 December 2020, the Company had eligible own funds of EUR9.7m available to meet its Solvency Capital Requirement (“SCR”) of EUR4.2m; resulting in a Solvency Ratio of 226% which is in compliance with the regulatory solvency requirements per the Solvency II regulations. The Board of Directors is satisfied that the Company has adequate and appropriate capital to support its business operations. The Minimum Capital Requirement (“MCR”) was also satisfactorily met at the year-end. There were no instances of non-compliance with the capital requirements during the period.

During the year 2020, CCHBC Re began writing reinsurance business in line with its business plan following incorporation in 2019. With effect from 22 May 2020 CCHBC Insurance (Guernsey) Limited, a fellow Coca-Cola HBC group undertaking, transferred all rights, obligations and liabilities under the property damage and business interruption and employee benefits reinsurance contracts to the Company. There were no material changes to CCHBC Re business and performance, system of governance, risk profile, valuation for solvency purposes and capital management over the reporting period from that of the original business plan provided to the Central Bank of Ireland.

A. BUSINESS & PERFORMANCE

A.1 Business

CCHBC Reinsurance DAC was incorporated in Ireland in 2019 in line with the requirements of the Companies Act 2014. CCHBC Reinsurance was authorised to undertake the business of life and non-life reinsurance from 30 April 2020. CCHBC Re is a captive reinsurance undertaking, underwriting only the risks of the Coca-Cola HBC group. CCHBC Re conducts all of its significant business activities from its offices in Ireland.

The Company's registered address is Huntstown Business Park, Cappagh Road, Ballycoolin, Dublin 11, Ireland. The Company's business address is 3rd Floor, The Metropolitan Building, James Joyce Street, Dublin 1, Ireland.

The insurance supervision division at the CBI may be contacted at their offices in New Wapping Street, North Wall Quay, Dublin 1, Ireland.

PricewaterhouseCoopers is the appointed external auditor of the Company and is located at One, Spencer Dock, North Wall Quay, Dublin 1

CCHBC Re is authorised by the Central Bank of Ireland ('CBI'), under the European Union (Insurance and Reinsurance) Regulations 2015 (SI 485), to carry out the business of non-life (re)insurance. The insurance supervision division at the CBI may be contacted at their offices in New Wapping Street, North Wall Quay, Dublin 1, Ireland.

The Company's ownership structure is as follows:

The business reinsured by the Company relates to certain Employee Benefits risks and Property risks of the Coca-Cola HBC Group's European operations.

The Company's insurance exposure is mitigated by setting limits of liability within its insurance programme.

The operation of the Company is subject to the local regulatory requirements in Ireland within which it operates. Such regulations not only prescribe approval and monitoring of activities but also impose certain restrictive provisions, for example capital adequacy to minimize the risk of default and insolvency on the part of the Company to meet unforeseen liabilities as they arise.

There have been no other significant events during the reporting period which have had a material impact on the Company.

A.2 Underwriting Performance

The principal risks and uncertainties that the Company faces are, by the very nature of the business, those for which it provides or has provided insurance cover. The Company seeks to ensure that it collects sufficient premium income to meet the cost of potential claims over time, but the uncertainty surrounding the severity and frequency of claims can lead to significant variation in the Company's performance in the short term. Whilst considerable judgement is involved, the Directors adopt an appropriately prudent approach to the provision and valuation of adequate reinsurance reserves, with annual support being provided by the external actuary who serves as the Head of Actuarial Function.

The Company has implemented various risk mitigating actions to limit the Company's exposure as well as to reduce the volatility of its losses and hence underwriting performance.

Since the Company prepares its financial statements in accordance with IFRS, the underwriting performance information outlined in this section is on an IFRS basis.

	<u>31 Dec 2020</u>	<u>31 Dec 2019</u>
	€	€
Income		
Gross premiums written	1,516,916	-
Change in unearned premium reserve	(84,238)	
Net premium earned	<u>1,432,678</u>	-
Claims paid net of reinsurance		
Claim paid	(300,072)	-
Change in the provision for claims		
Gross and net amount	<u>(602,025)</u>	-
Net claims incurred	<u>(902,098)</u>	-
Underwriting expenses	(191,154)	-
Operating and administrative expenses	(308,873)	(4,345)
Foreign Exchange gain/ (losses)	(411)	-
Total expenses	<u>(500,438)</u>	<u>(4,345)</u>
Net profit/ (loss) before tax	<u>30,142</u>	<u>(4,345)</u>

The following table shows the underwriting results per line of business:

Year ended 31 December 2020	Employee Benefits €	Property €	Total €
Gross premiums earned	579,622	853,056	1,432,678
Reinsurers' share	-	-	-
Net premiums	579,622	853,056	1,432,678
Net claims incurred	(97,291)	(804,807)	(902,098)
Underwriting expenses	(62,168)	(128,988)	(191,154)
Operating expenses	(93,232)	(137,213)	(230,445)
Underwriting Profit/(Loss)	326,931	(217,950)	108,981

Geographical analysis of premiums written are as follows:

	31 December 2020 €
Risks located in the EU	1,500,126
Risks located outside the EU	16,790

Reinsurance premiums written relate to business inception during the financial year and have resulted from contracts of reinsurance concluded in the Republic of Ireland.

Provision is made for notified losses on all underwriting years.

A.3 Investment Performance

The Company's investment policy is in line with that of the Coca-Cola HBC Group. The Company invests its funds with a highly rated financial institution. The Company's funds are currently held in cash in bank. The investment position of the Company is monitored by the Board of Directors on a regular basis, to ensure the investment guidelines of the Company are adhered to.

The interest expense for the year amounted to EUR78k (2019: NIL) which was a result of negative interest paid by the bank on Euro funds held.

The Company has no investments in securitised asset classes and all investment income is recognised in the Company's income statement.

A.4 Performance of other activities

CCHBC Re does not engage in any activities other than those associated with captive reinsurance and has not entered into any leasing agreements.

A.5 Any other information

During the year 2020, the Company acquired all rights, obligations and liabilities under the property damage and business interruption and employee benefits reinsurance contracts previously underwritten by CCHBC Insurance (Guernsey) Limited, a fellow Coca-Cola HBC group undertaking.

B. SYSTEM OF GOVERNANCE

B.1 General information on the system of governance

In order to meet the requirements for sound corporate governance, ensure efficient conduct of business and to protect the interests of the Company's stakeholders, the Company has a comprehensive Governance and Risk Management system in place.

The Board of the Company acknowledges its responsibility to ensure that risks are fully understood and appropriately managed and has taken appropriate steps to ensure that risk management, reporting and control processes have been put in place in a manner which reflects the nature and scale of the captive's activities.

The Governance and Risk Management System of the Company may be described as relying on four cornerstones:

- 1) Governance Framework, aligned with the Company's strategic objectives, providing top level oversight by the Board, clear ownership and accountability for risks, as well as clear escalation and reporting channels.
- 2) Risk Management Framework which details the Company's strategic objectives in documented Risk Policies. For each risk, limits and operational checkpoints as well as functional identification, mitigation and monitoring processes are documented.
- 3) A series of Internal Controls, defining the architecture of processes required to manage the Company in accordance with its governance and risk management framework.
- 4) A Risk Register combining operational and risk management processes to deliver a descriptive analysis of material risks threatening at least one of the Company's global strategy objectives.

There have been no material changes to this structure in the period. CCHBC Re implemented the above system in line with the Solvency II regulatory framework.

In order to achieve the Company's objectives, the Board has established a system of governance with the following core components:

- the Board of Directors is the focal point of the governance system and is ultimately accountable and responsible for the performance and conduct of the Company and, as such, must have at its disposal all required capabilities to achieve its duties;
- all authority emanates from the Board of Directors and responsibilities are delegated in such a manner so as to ensure that no one individual has unfettered powers of decision;
- an embedded Compliance Function aiming to ensure the continuous compliance of the Company with all applicable legal, regulatory and administrative requirements;
- an appropriate segregation of duties in order to enable the Risk Management, Internal Audit, Actuarial and Compliance Function to perform independent risk and business control mitigation, monitoring and reporting tasks;
- a meaningful and practical approach in documenting policies and strategies to formalise all processes in an efficient and fit-for-purpose manner; and
- structured reporting processes to enable an appropriate escalation of risks and issues to the Board of Directors in order to ensure a clear and comprehensive information process allowing

the Board to conduct business in an efficient and prudent manner in line with the strategic objectives.

According to these principles, the chosen governance model is one of "three lines of defence" which is illustrated as follows:

The Board undertake responsibility for performing the equivalent function of an Audit Committee in relation to the reporting period 31 December 2020.

Key Functions

The key functions of Risk Management, Internal Audit, Actuarial, Compliance and Operations have clear and defined lines of reporting directly to the Board. This is facilitated by the straightforward nature of the Company's structure and fit-for-purpose documented policies and procedures which are clearly communicated and well understood by all relevant parties. The Board has ensured that the key functions are appropriately resourced and have the necessary authority and operational independence to perform their roles. The Company has engaged Aon Insurance Managers (Dublin) Limited ('AIMD') for the provision of management services, under the terms of an outsourced service and management agreement which is overseen by the Board of Directors.

Remuneration and material transactions

The members of the Board of Directors receive no remuneration for their services as directors to the Company. There are no employees and consequently no remuneration is paid.

As a captive reinsurer, all CCHBC Re's inward premium flows and outward claims payments relate to reinsured risks of the shareholder group. During the year 2020, the shareholder subscribed for additional 10,000,000 ordinary shares of €1 each in the share capital of the Company in exchange for consideration of €10,000,000. Aon Insurance Managers (Dublin) Limited (Aon), of which Michael Spellman is a director (board member of CCHBC Re), acted as manager to the Company during the year. A management fee is paid by CCHBC to Aon for services provided. Other than these transactions, the Company had no material transactions during the reporting period with members of the shareholder group and none with members of the Board of Directors.

B.2 Fit and proper requirements

CCHBC Re has documented its Fitness & Probity policy specifying out the Company's approach to the selection and assessment of the persons who effectively run the Company or are responsible for other key functions.

In selecting individuals as directors or function holders, the Company takes account of the following factors:

- specific requirements of the role
- the skills, experience and relevant qualifications of the proposed individual
- results of due diligence enquiries
- conflicts of interest
- time requirements and other commitments
- competence and integrity
- financial soundness

Consideration is given to ensuring an appropriate mix of knowledge, skills and experience across the Board of Directors and for those roles where specialist skills are required e.g. Head of Actuarial Function, only those individuals possessing the pertinent qualifications and expertise will be considered.

For those roles which are prescribed by the CBI as Controlled Functions (CFs) and Pre-approval Controlled Functions (PCFs), the Compliance function adopts appropriate control and due diligence processes in the selection and vetting of such individuals to ensure that they meet the regulator's fit and proper criteria. Written approval from the CBI is obtained prior to the appointment of PCFs. Appointed individuals are required to maintain on-going compliance with the Standards of Fitness & Probity and the guidance issued by the CBI. This is assessed by the Company on an annual basis.

B.3 Risk Management System including the own risk and solvency assessment

The Company's Risk Management System:

- sets out the level of risk acceptable by the Company (Risk Appetite and risk tolerance);
- identifies the risks which represent a threat to the achievement of its strategic objectives;
- identifies, defines and regularly measures key risk indicators enabling an efficient monitoring of risks;
- defines the appropriate actions to reduce the Company's risk exposure;
- ensures the risk management framework is implemented in day-to-day business processes; and
- regularly reviews controls and mitigation actions to ensure that they remain relevant and effective.

In order to achieve these objectives, the Risk Management System of the Company has been clearly documented and specified through specific risk management policies for each key risk category. The key risk categories for which the Company has set up specific control and monitoring mechanisms are:

- Underwriting/Reserving
- Asset Liability Management ("ALM")
- Investment
- Liquidity and concentration
- Operational
- Reinsurance and other risk mitigation techniques
- Strategic

In addition to these, an outsourcing policy defining the key rules and criteria to be followed by each service provider has been determined.

Own Risk and Solvency Assessment

The Company performs an Own Risk and Solvency Assessment ('ORSA') process annually in order to provide its Board of Directors with a forward-looking risk and capital assessment. The adequacy of the available capital, the Risk Appetite Framework and the appropriateness of the risk limits are assessed for the business planning period, considering the evolving risk profile. To this end, risks and scenarios to which the Company is exposed during the business planning period and which may affect the capacity to meet its insurance obligations or pose a threat to the achievement of its business objectives are taken into account.

Stress testing and scenario analysis are used to assess whether the available and future capital are sufficient in both expected and stressed situations. Business projections, stresses and scenarios are compiled by the Operations Functions with input and agreement from the Board of Directors to ensure that these are appropriate for the Company.

Capital and solvency projections are conducted by the Actuarial Function and validated by the Risk Management Function. Where applicable, any future additional capital needs will be identified and aligned to the Company's capital management plan i.e. defining the measures to restore the Company's solvency margin should the assumed scenarios occur.

In line with CBI requirements, the Head of Actuarial Function provides an actuarial opinion to the Board of Directors in respect of the ORSA at the same time that the results of the ORSA process are presented to the Board for review and challenge. Following feedback and approval from the Board, the Company's ORSA report is finalised and results submitted to the CBI within 2 weeks.

The ORSA report provides clarity over projected risk assessments and solvency needs to three different stakeholders:

Stakeholder	Expectation	ORSA Report
Board of Directors	Matching projected risks vs. the Risk Appetite framework.	Provides a clear and prospective understanding of critical risk exposures and their relationship with Risk Appetite boundaries.
Shareholders	Detailed and prospective understanding about the risk of bankruptcy and potential need for future additional capital.	Provides a plan for capital needs on the time horizon of the financial planning.
Supervisory Authority	Detailed and prospective understanding of potential ORSA deviations compared to solvency capital requirements	Gathers information about: projected Solvency ratios; - explanations about deviations due to specific critical risks exposures.

The ORSA process described above ensures that the ORSA is integrated in the Company's decision-making and business planning process. Furthermore, monitoring procedures as set out in the risk management policies ensure that risk exposures are measured on a regular basis triggering exception reports to the Board.

The capital risk appetite for CCHBC Re is to sustain its capital at a level sufficient to meet the Regulatory Solvency Capital Requirement at all times. The Board of Directors maintains a prudent approach to capital to ensure that CCHBC Reinsurance is in a comfortable position to meet this obligation.

B.4 Internal Control System

The Internal Control System embedded in the Company's operations is a mix of processes undertaken by all stakeholders within the Company to provide reasonable assurance that the strategic objectives will be achieved.

In order to achieve the aforementioned objectives, the Internal Control framework of the Company is structured around five complementary components.

Component	Contents
1) Control environment	A strong "risk and control" culture is embedded within the Company's operations through the continuous oversight of the Board of Directors and the communication to all internal stakeholders of all governance and risk principles through the Company's governance manual.
2) Risk assessment	Procedures and policies are detailed and formalised in order to disclose the way of identifying, managing, controlling, mitigating and reporting issues relating to each risk category.
3) Reporting channels	Clear and structured reporting processes are in place enabling the Board of Directors to have access to relevant, complete, reliable, correct and timely communication related to internal as well as external events.
4) Monitoring process	The appropriate escalation of significant issues to the Board of Directors, the ongoing involvement of all internal stakeholders as well as the Internal Audit process enables the Company to continuously monitor and adapt when necessary its Internal Control System.
5) Control activities	The Company has developed a comprehensive set of preventive, detective or corrective control actions embedded in its daily operations.

In order to set out how the Internal Control System is implemented, the Company's processes and related control activities are documented, monitored and reviewed on a regular basis.

These items are designed by the Risk Management Function, approved by the Board of Directors and evaluated by the Internal Audit Function. They are reviewed as often as necessary but at least annually.

Compliance Function

The Compliance Function is an integral component of the Company's governance system. The Company has a dedicated Head of Compliance reporting to the Board of Directors, supported by a Compliance Officer who coordinates the activities of the Compliance Function.

The responsibilities of the Compliance Function include:

- utilisation of compliance management practices that contribute to the use of sound, responsible and sustainable business practices by the Company;
- presentation of an annual compliance plan to the Board of Directors, outlining specific areas which it will focus on during a particular year;
- promotion of a culture of compliance within the organisation;
- maintenance of a comprehensive compliance risk management control and reporting system in conjunction with the Risk Management Function to assist in managing the compliance risk faced by the Company;
- consideration of possible future changes in the legal environment and their potential effect on the Company as well as providing regular compliance and regulatory updates to the Board of Directors;
- identification and communication throughout the Company the laws, regulations and codes of conduct to which the Company is subject and assisting to embed compliance with these in the way the Company does business; and
- investigation and follow up of compliance breaches, ensuring timely reporting to the Board and in certain circumstances to outside bodies such as the CBI.

B.5 Internal Audit Function

Purpose and Objectives

The purpose of the Internal Audit Function is to serve as an independent function that objectively evaluates and recommends improvements with respect to the Company's Internal Control System by facilitating an objective and independent assessment of the processes and controls in place.

It assists the Company in accomplishing its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes employed by the Company. The audit approach is risk based and in line with an annual audit plan which is provided by the Head of Internal Audit to the Board of Directors.

The Internal Audit Function and the appointed Head of Internal Audit report directly to the Board of Directors.

Independence and Impartiality

The Company's Internal Audit Function has been established to be independent of the activities audited, the operational functions and the Board of Directors.

The Internal Audit Function is free to report its findings and appraisals and to disclose them to the Board as required. This principle of independence ensures that the Internal Audit Function reports directly to the Board of the Company.

B.6 Actuarial Function

The Company has established an effective Actuarial Function, including a nominated Head of Actuarial Function ('HoAF') approved by the CBI, which carries out the following key tasks:

- coordination of the calculation of technical provisions in conjunction with other outsourced actuarial resources;
- ensuring the appropriateness of the methodologies, underlying models and assumptions made in the calculation of technical provisions;
- assessment of the sufficiency and quality of the data used in the calculation of technical provisions. Where relevant, the Actuarial Function will provide recommendations on internal procedures to improve data quality;
- estimation of Solvency II technical provisions (both claims and premium provisions)
- comparison of best estimates against experience;
- reporting to the Board of Directors on the calculation, reliability and adequacy of technical provisions;
- calculation of the Solvency and Minimum Capital Requirements at the balance sheet date;
- ensuring results of technical provisions can efficiently feed into solvency capital calculations and Quantitative Reporting Templates (QRTs) on both a quarterly and annual basis;
- contributing to the effective implementation of the Risk Management System, in particular:
 - i. with regard to risk modelling underlying the calculation of the Solvency and Minimum Capital Requirements; and
 - ii. the application of stress scenarios to the solvency calculations as part of the Company's ORSA process.

- provision of opinions on:
 - Technical provisions
 - Solvency position
 - Underwriting Policy
 - ORSA

The HoAF reports to the Board of Directors and issues a report in writing at least annually documenting all of the material tasks that have been undertaken by the Actuarial Function during the reporting period.

In establishing the Company's Actuarial Function, the Board of Directors has ensured that the persons involved have the requisite qualifications and demonstrable experience in the area of non-life reserving and are fully conversant with the Solvency II requirements for the calculation of Technical Provisions.

B.7 Outsourcing

All functions and activities of the Company are eligible to be outsourced provided that specific criteria are satisfied in each instance.

The Board is responsible for the approval and termination of all outsourcing arrangements of critical or important functions or activities. Critical or important functions or activities include key functions relating to the Company's System of Governance and all functions within the Company that are fundamental to carry out its core business. The Board is responsible for ensuring notification to the CBI is made in a timely manner prior to the outsourcing of critical or important functions or activities, and thereafter where there have been material developments in relation to the service provider.

The objectives of CCHBC Re's Outsourcing Policy are to ensure that the outsourcing of critical or important operational functions or activities does not lead to:

- Reduction in the Board's responsibility for, or influence over, key functions of the Company;
- Material impairment of the quality of the Company's System of Governance;
- Any impairment of the Company's ability to meet its regulatory requirements;
- Non-adherence to the Company's approved policies and procedures;
- Undue increases in operational risk or cost;
- Material impairment of the Company's ability to fulfil its obligations to stakeholders;
- Conflicts of Interest;
- Breach of the Company's data protection obligations.

The Board is responsible for assessing the risks associated with the outsourcing of critical or important functions or activities, carrying out the appropriate due diligence on the outsourced service provider and for reviewing the performance of outsourced service providers against their agreed and documented Service Level Agreements ('SLA').

The management of the Company is coordinated and carried out at its place of business in Ireland. CCHBC Reinsurance engages outsourced service providers in order to access the expertise and strength and depth of resources necessary to manage the specific requirements of a regulated captive reinsurance company operating on a global basis.

The following critical or important functions / activities are outsourced:

Critical or important function	Outsourced Service Provider	Jurisdiction
Underwriting and claims administration	Aon Insurance Managers (Dublin) Limited (AIMD)	Ireland
Finance and accounting	AIMD	Ireland
Compliance Function	AIMD	Ireland
Risk Management Function	AIMD	Ireland
Actuarial Function	Aon Global Risk Consulting	Luxembourg
Internal Audit Function	Aon Commercial Services Ireland Limited	Ireland

B.8 Any other information

The Board is satisfied, based on its assessment of the frameworks which have been established and are in use, that the Company's system of governance is appropriate and adequate for the nature, scale and complexity of the risks inherent in its business operations.

There are no other material items to report in this section.

C. RISK PROFILE

The Risk Appetite Framework adopted by the Board sets out the level of risk that the Company is prepared to accept in the pursuit of its strategic objectives. It sets out:

- the Company's overall philosophy to risk taking and the expectations of shareholders;
- the Company's tolerance to loss of capital, profit volatility and other specified measures; and
- the risk limits that are acceptable in terms of exposures to different types of risk.

The Company's Risk Register combines operational and risk management processes to deliver a descriptive analysis of material risks threatening at least one of the Company's strategic objectives.

The Board's annual ORSA process is based on the company's current and expected risk profile over the business planning period and supports the Board in achieving its strategic objectives by taking a structured and combined approach of strategy, risk management and capital management.

C.1 Underwriting risk

The Company underwrites contracts that transfer insurance risk. The risk under any insurance contract is the possibility that the insured event occurs and the uncertainty that the Company will have sufficient assets to satisfy the amounts payable under the contract. The Company seeks to ensure that it collects sufficient premium income to meet the cost of potential claims over time, but the uncertainty surrounding the severity and frequency of claims can lead to variation in the Company's performance over the short term. Whilst considerable judgement is involved, the Directors ensure that suitable processes are in place to ensure the reliability, sufficiency and adequacy of the statistical and accounting data to be considered in both premium pricing and loss reserving exercises.

As the Company is a captive reinsurer, it is effectively insuring the risks of one customer, its parent group, and thus is exposed to risk concentration. However, diversification is achieved through the varying geographical locations of the underlying risks.

The principal assumptions underlying the Company's estimation of liabilities is that the Company's future claims development will follow a similar pattern to the past claims development experience of the Group. Additional qualitative judgements are used to assess the extent to which past trends may not apply in the future, for example, isolated large claim occurrences, economic conditions, internal factors such as portfolio mix, policy conditions and claims handling procedures. Judgement is further used to assess the extent to which external factors, such as judicial decisions and government legislation affect the estimates, especially taking account of the longer-term nature of the risks which the Company underwrites.

The Company manages these risks through its underwriting strategy of arranging for an external qualified actuary to review reserve adequacy of the Company on an annual basis and settling of appropriate policy limits. The Company also monitors emerging issues and factors in their potential impact on the Company's pricing and claims reserving.

The sensitivity analysis below is performed for conservative movements in the loss reserves outstanding for each open underwriting year, showing the impact on claims reserve and profit before tax (PBT) for the year.

	Claims Reserve	Impact on PBT for the year	Impact on Equity for the year
2020	€	€	€
Increase in loss reserves by 10%	200,754	(200,754)	(175,659)
Decrease in loss reserves by 10%	(200,754)	200,754	175,659

The Company takes all reasonable steps to ensure that it has appropriate information regarding its underwriting exposures.

Annual support and certification is provided by the Company's Actuarial Function.

C.2 Market risk

The risk of future changes in market prices, which would result in devaluation of investable assets, may result from several factors, including, but not limited to, value, liquidity, duration, composition, interest rates, foreign exchange rates and market fluctuations. The Company diversifies its portfolio to reduce the exposure to market fluctuations and market risk concentrations.

CCHBC Re has an investment strategy in place in line with its Risk Appetite Framework and the related 'Prudent Person' regulatory requirements. The Company endeavours to:

- prudently invest with consideration of the prevailing financial market environment;
- ensure the Company invests appropriately so as not to result in the Company failing to meet its Solvency Capital Requirements;
- ensure that the Company holds assets of sufficient value and liquidity to meet all liabilities as they become due;
- maximise investment return within the levels of risk as defined by the Company's Risk Appetite;
- ensure compliance with the Liquidity Strategy and Policy;
- ensure compliance with the Asset-Liability Management Strategy and Policy; and
- ensure effective risk management of investments at all times, with due consideration of the risks associated with investments and procedures to monitor, manage and report these risks in a timely manner as part of the Company's overall Risk Management System.

Interest rate risk arises on the return on the Company's cash in bank. The Company is exposed to currency risk to the extent its assets and liabilities are denominated in a currency different from its functional currency. The ultimate settlement of loss reserves is in the Company's reporting currency and as such its exposure to foreign exchange risk is minimal. Due to the limited exposure to currency risk, management considers that it is unnecessary to attempt to mitigate foreign exchange rate fluctuations.

C.3 Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The assets that are exposed to credit risk are:

- Cash and cash equivalents

The Company has an exposure to credit risk in relation to its cash held with credit institutions. To manage these risks deposits are made, in accordance with established policies and with highly rated credit institutions. The credit risk has increased in line with market risk as a result of the increase in assets, thereby increasing the exposure of the financial institutions defaulting.

Deposits are managed under the Investment strategy (market risk).

C.4 Liquidity risk

The Company is exposed if proceeds from financial assets are not sufficient to fund obligations arising from its insurance contracts. The Company can be exposed to frequent calls on its available investment assets, principally from insurance claims. Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet cash commitments associated with financial obligations.

The Company has determined that liquidity risk does not represent a significant exposure to its business. This assessment is based on the fact that the Company intends to put investments in highly liquid assets which it can access immediately or within a very short time frame without incurring material costs or penalties. During the period all of the Company's cash are held in a bank account. The Company is in the process of opening two deposit accounts to ensure compliance with the Company's investment guidelines.

C.5 Operational risk

Operational risk is the risk of loss arising from system failure, human error, fraud, or external events. When controls fail to perform, operational risk can cause damage to reputation, have legal or regulatory implications, or can lead to financial loss. The Company has a rigorous control framework and monitoring process in place to manage operational risk. Controls include effective segregation of duties, access controls, authorisation and reconciliation procedures, staff education, and assessment processes. Outsourced activities are monitored and managed in the same manner in line with the Outsourcing policy.

The Company cannot expect to eliminate all operational risk, but by initiating a rigorous control framework and by monitoring and responding to potential risks, the Company is able to manage the risk.

In addition, CCHBC Re is subject to Internal and External Audit review.

CCHBC Re maintains a regulatory dialogue with the CBI to mitigate the risk of any potential sanction or compliance breach as well as using expert, industry leading, service providers to provide its outsourced functions which helps avoid any material error or delay. In order to ensure the quality of the outsourced functions is as high as possible, CCHBC Re puts in place service level agreements outlining key performance indicators against which its outsourced service providers can be monitored and assessed.

C.6 Other material Risks

Strategic Risk

Strategic risk is the risk of loss arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes i.e. the risk associated with implementing the wrong strategy or failing to correctly implement the chosen strategy.

The control and monitoring actions/principles underlying the strategic risk management of the Company are:

- Review at least annually of the appropriateness of the high level overall objectives for the Company; the major risks facing the Company; the Risk Appetite for each of these major risks identified. The Board of Directors will ensure continuing appropriateness, at least annually and revisions shall be affected where necessary.
- Ensure the Company strategy is implemented correctly including approval, review and, monitoring of agreed Key Performance Indicators for the Company.
- Ensure all plans are regularly reviewed to ensure that Risk Tolerances are not exceeded individually or in total.

Sensitivity Risk

The Actuarial Function assesses annually the sensitivity of its estimate of the Company's unpaid claim liabilities of varying the key assumptions underlying its analysis. Given the nature of the Company's exposures, the key assumptions underlying the actuarial analysis are subject to a range of reasonable interpretations.

No other material risks have been identified.

C.7 Any other information

There are no other material items to report in this section.

D. VALUATION FOR SOLVENCY PURPOSES

D.1 Assets

CCHBC Re prepares its financial statements on a going concern basis in accordance with International Financial Reporting Standards (IFRS). The entity's financial statements comply with IFRS and the Companies Act 2014. There are a number of differences between the financial statement basis and the Solvency II valuation rules. Most of these differences are driven by the requirement for all assets and liabilities to be valued on a market consistent fair value basis under Solvency II.

At the end of the current reporting period CCHBC Re had total assets valued at €12,928k for Solvency II purposes. This total comprises the following categories of assets:

- Cash at bank €11,517K

Cash at bank comprise of current account held with Citibank NA. Carrying amounts approximate fair value due to the liquid nature of the assets. There are no valuation adjustments for solvency purposes.

- Debtors €0k

These relate to premium receivables from the cedants net of fronting costs. Non-overdue premium and claims receivables are reclassified in the best estimates.

- Other assets €16k

This relates to funds withheld by cedant. There are no valuation adjustments for solvency purposes.

The Company recorded deferred acquisition costs in its IFRS financial statements. These relate to the cedants' fronting fees that are deferred over the remaining policy period as at 31 December 2020. Such costs are not recognised for Solvency II purposes.

Information on how the Company invests its assets and manages risk in this area, including how it achieves compliance with the 'prudent person principle', is set out in Sections C2 – C4 above. Operational risks relating to the Company's assets are managed according to the control framework is described in Section B4 above.

D.2 Technical Provisions

The technical provisions of CCHBC Re at 31 December 2020, relating to various lines of business, gross and net of reinsurance, are set out below in EUR:

	Claims Provision	Premium Provision	Best Estimate	Risk Margin	Technical Provisions
Gross	1,871,131	(610,763)	1,260,368	412,566	1,672,934
Net	1,871,131	(610,763)	1,260,368	412,566	1,672,934

These amounts comply in all material respects with the relevant Solvency II requirements.

The starting point for the calculation of the Solvency II technical provisions is the amounts which have been calculated for the financial statements reserving basis. Within the financial statements, full provision is made for the estimated cost of all claims notified but not settled at the period-end using the best information available at that time. Provision is made for the cost of claims incurred but not reported and at the period-end, and potential development on outstanding claims estimates (together regarded as IBNR reserves). In addition, an estimate is made for future claims handling expenses relating to claims outstanding at the period-end.

Provisions are calculated gross of any reinsurance recoveries with a separate estimate being made of amounts recoverable from reinsurers. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. In estimating the cost of claims notified but not paid, the Company has regard to claims circumstances as reported, any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. IBNR provisions are established having regard for the results of a valuation on a best-estimate basis by an independent actuary together with a margin for uncertainty which has been determined by management.

Claims projections have been carried out using a range of standard actuarial methods, including the Loss Ratio Method, Bornhuetter-Ferguson method (BF), the Chain-Ladder Method and BH Benktander – Hovinen Method. The Loss Ratio is appropriate for recent lines of business where little amount of claims occurred and is stable over time, as it does not consider claims development to date. BF is a blended method, which uses chain ladder development factors to improve on an initial estimate of ultimate claims. In Chain-Ladder Method, historical claims development is used to estimate the ultimate amounts of claims. It assumes an average development of claims through the years considered. The BH Benktander – Hovinen Method estimates reserves by using a credibility mixture of the Chain Ladder and BF reserve estimates.

Solvency II requires undertakings to hold technical provisions which correspond to the amount they would have to pay to transfer their (re)insurance obligations immediately to another undertaking. This value comprises a **best estimate** and a **risk margin**, intended to represent a market consistent valuation. The technical provisions take account of the time value of money by discounting using a risk-free interest rate term structure as at the valuation date. There is no allowance for prudence in the calculation of best estimates.

The best estimate is calculated by considering all future cash inflows and outflows required to settle the existing (re)insurance obligations over their lifetime. It represents the mean outcome of all possible scenarios, taking account of how likely they are to occur and their potential variability. In this

regard, the best estimate is a probability-weighted average of future cash flows, allowing for the time value of money.

The Solvency II best estimate is calculated gross with any recoverables calculated separately following the same methodology. The best estimate is made up of a claims provision and a premium provision, relating to past and future exposures respectively. An allowance has been made for reinsurer counterparty default. Claims payments in the claim and premium provisions have been projected at annual intervals using annual paid development patterns.

The Solvency II claims provision is equivalent to the expected net present value of the best estimate claims reserve, with additional allowances to allow for all possible outcomes through the inclusion of provisions for Events Not in Data (ENID) and the future expenses that will be incurred in servicing the existing reinsurance obligations.

Under the Solvency II contract boundary definition, any policies which have been bound, even if unaccepted as at the valuation date, must be considered in the premium provision. The Solvency II premium provision is therefore equivalent to the expected net present value of the following cash inflows and outflows, relating to unearned exposure from accepted contracts and exposure from unaccepted contracts bound as at the valuation date:

- Cash flows from future premiums in relation to future claims;
- Cash flows arising from future claim events (e.g. claims payments);
- Cash flows arising from loss adjustment expenses in respect of claims events occurring after the valuation date;
- Cash flows arising from the ongoing administration of policies in-force as at the valuation date; and
- Cash flows arising from salvage and subrogation.

The Company had no bound but not accepted business at 31 December 2020.

Estimates are “best estimates” in the sense that they are intended to be a probability-weighted average of all possible outcomes. CCHBC Re has employed techniques and assumptions that are appropriate for the purpose of calculating its Solvency II technical provisions. The actual amounts required to meet future claim payments may differ from estimates for a number of reasons, such as model specification error, parameter error and random error due to the inherent uncertainty in insurance. External environment risk factors may cause material deviations in estimates of technical provisions, including persistent negative interest rates, inflation and currency exchange rate fluctuations.

The Solvency II risk margin is intended to represent an amount that CCHBC Re would be required to pay, in excess of the best estimate of the liabilities, for a third party to assume the risk of running of the existing liabilities. The actuarial calculation of the risk margin is consistent with the Solvency II regulations, applying a 6% cost of capital to the amount of capital required at the beginning of each year to support the run-off of the insurance obligations. These future costs of capital are then discounted to the valuation date and summed to calculate the amount of risk margin required.

The resultant differences between the value of technical provisions for solvency purposes and the financial statements at 31 December 2020 are shown below in Euro:

	Gross and Net
Claims provisions on financial statements basis	2,571,018
Removal of prudence	(721,290)
Expected Premium Inflow	(468,827)
Expected Claims Outflow from Future Events	(456,919)
Expected Expenses from Future Claims	305,025
Discounting on Claim Provision	21,402
Discounting on Premium Provision	9,959
Risk Margin	412,931
Solvency II claims provisions	1,672,934

Information on how the Company manages risk in the area of underwriting and reserving is set out in Section C1 above. Operational risks relating to the Company's technical provisions and claims data are managed using the Control Framework described in Section B4 above.

The Company is satisfied that it has access to sufficient historical claims data on an annual basis for the calculation of its technical provisions and that this data is accurate and appropriate for the Company's needs. Claims management processes by the Company are appropriate and adequate given the nature of the underlying risks. Significant reporting delays are not experienced.

In calculating its technical provisions on a Solvency II basis, the Company has not applied any of the following items:

- matching adjustment referred to in Article 77b of Directive 2009/138/EC;
- volatility adjustment referred to in Article 77d of Directive 2009/138/EC;
- transitional risk-free interest rate-term structure referred to Article 308c of Directive 2009/138/EC; and
- transitional deduction referred to in Article 308d of Directive 2009/138/EC.

D.3 Other liabilities

Aside from technical provisions, the valuation of which is detailed above in Section D2, CCHBC Reinsurance has 3 other principal classes of liabilities:

- Creditors €281k

These relate to fronting fees to cedants and certain general and administrative expenses. Fronting fees are included in the calculation of the technical provision.

- Accrual and deferred income €155k

These mostly relate to general and administrative expenses. There are no valuation adjustments.

D.4 Alternative methods for valuation

No alternative methods were used.

D.5 Any other information

The Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. The Company was authorised by the Central Bank of Ireland as a non-life reinsurance undertaking effective 30 April 2020. The Directors have assessed the ability of the Company to continue in operational existence for twelve months from the date of approval of the financial statements and have concluded that it is appropriate to prepare the financial statements on a going concern basis.

In making this assessment the Directors have considered the impact of COVID-19. During the year 2020, COVID-19 did not significantly impact the operations and the business of the Company. The Directors believe that COVID-19 will not pose significant threat on the business of the Company.

E. CAPITAL MANAGEMENT

E.1 Own funds

The Company has put in place a Capital Management policy to ensure that 'Own Fund' items, both at issue and subsequently, meet the requirements of the Solvency II capital regime. The objectives of the policy are to ensure that on an on-going basis the Company has:

- own fund items available to meet its capital requirements; and
- developed processes to ensure the appropriateness of its own fund items.

As part of the annual review of the medium-term capital plan, the Company reviews the level, composition and classification of own fund items to ensure they continue to meet its own solvency needs, and its regulatory obligations in respect of Solvency Capital Requirement (SCR) and Minimum Capital Requirement (MCR). A forward-looking time horizon is used for business planning purposes and any anticipated changes to the Company's business and risk profile are factored into the ORSA process to assess the solvency and capital needs over the business planning period. It is intended that the Company's capital needs will be managed out of its existing pool of own funds and the efficient management of the Company's insurance business. Should additional funds be required outside of that, they will be advanced by the shareholder.

The Company's own funds consist of the following items:

- Issued Share Capital; and
- Retained Earnings.

Any change to the share capital requires the approval of the Shareholder and the Board. Retained earnings are adjusted on a quarterly basis to take account of the profits/losses earned in the period together with any Solvency II valuation adjustments.

Any other qualifying own fund item requires the review and approval of the Board. In such instances, the Board must ensure that the terms and conditions of any own fund item are clear and unambiguous in relation to the capital classification.

Own fund items at the end of reporting period and the prior year comparative period are as follows:

	2020	2019
	EUR	EUR
Ordinary paid up share capital	10,000,001	1
Reconciliation Reserve	(328,799)	(3,802)
Total Tier 1 capital	9,671,202	(3,801)
Net deferred tax asset – Tier 3 capital	-	543
Total basic own funds	9,671,202	(3,258)

The movement in basic own funds during the reporting period reflects that, as of the prior period, the Company had not yet received authorisation from the Central Bank of Ireland to accept reinsurance business, hence the required paid up share capital had not been received by the Company. The reconciliation reserve represents the Company's retained profits as adjusted for Solvency II valuation principles. The adjustments which arise in the application of these principles are shown in the equity reconciliation below.

At the end of the current reporting period eligible own funds available to meet the Company's SCR and MCR is EUR10.9m, comprised of Tier 1 capital only.

The equity position as shown in the Company's 2020 year-end financial statements can be reconciled to the basic own funds balance under Solvency II as follows:

	2020 EUR
Total Equity in the financial statements	13,028,949
Reinsurance BEL	(1,260,368)
Risk Margin	(412,566)
Adjustment to the FRS reserves	-
Removal of Debtors	(1,395,603)
Remove Deferred Acquisition Costs	(101,085)
Remove Trade Payables	(33,547)
Remove any other liabilities, not elsewhere shown	(154,578)
SII value of excess of assets over liabilities	9,671,202

The Company's own funds are not subject to transitional arrangements and the Company has no ancillary own funds. No deductions are applied to own funds and there are no material restrictions affecting their availability and transferability.

The company assesses material risks that may threaten the accomplishment of the Company's strategic objectives or might have a substantial impact on the available qualifying own funds. These risks could result from either internal or external events.

Management has identified Underwriting Risk, Reserving Risk and Market Risk as the material risks to which the Company is exposed. Management has investigated the magnitude of each of these risks as well as sought to determine any potential correlations that may exist within, or between, these risk categories based on review of historical experience.

In relation to Investment Risk, a clear strategy has been developed to manage risk in a manner which limits exposure to investment volatility for those assets matching insured liabilities.

All other risks are managed through a framework of internal controls supported by monitoring by management, internal audit, governance groups and the various functions of the board.

E.2 Solvency capital requirement and minimum capital requirement

At the end of the current reporting period, CCHBC Re's SCR and MCR have been calculated as EUR4.1m and EUR1.2m respectively.

The SCR is intended to correspond to the capital the Company needs to hold in order to limit the probability of ruin, in the following 12 months, to 0.5%, i.e. ruin would occur less than once in every 200 years. The SCR calculated at the end of the current reporting period, relates to the capital required to support the business over the prospective 12 months; covering both existing liabilities and business written during 2020/2021. Based on the Company's eligible own funds of EUR10.9m, the Company has a solvency ratio at 31 December 2020 of 264%.

The SCR has been calculated using the standard formula and without the application of any undertaking specific parameters.

The split of SCR by risk modules is shown below:

Risk Charge	2020 EUR'000
Mortality Risk	-
Catastrophe Risk	-
Life Expense Risk	-
Lapse Risk	-
<i>Diversification Benefit</i>	-
Life Underwriting Risk	-
Health NSLT	390
SLT Health Risk	-
Catastrophe Risk	1,863
<i>Diversification Benefit</i>	(283)
Health Underwriting Risk	1,997
Premium/Reserve Risk	1,085
Catastrophe Risk	15,190
Lapse Risk	51
<i>Diversification Benefit</i>	(684)
Non-Life Underwriting Risk	3,147
Counterparty Default Risk	772
Interest Rate Risk	-
Spread Risk	-
Currency FX Risk	-
Concentration Risk	-
<i>Diversification Benefit</i>	-
Market Risk	-
<i>Diversification Benefit</i>	(1,710)
BSCR	4,206
Operational Risk	65
SCR	4,271
Available Capital	9,671
Surplus/Deficit	5,401
Solvency Ratio	226%
MCR	1,200

The MCR for CCHBC Reinsurance is calculated in accordance with the standard formula. Setting the MCR involves three steps:

- Firstly, a factor-based calculation is applied using premiums and reserves as the drivers.
- The value of this calculation is either capped or floored such that the value of the MCR is between 25% and 45% of the value of the SCR.
- Finally, the Absolute Minimum Capital Requirement (“AMCR”) is applied. This is a monetary floor on the value of the MCR. For reinsurance captives this is currently set at EUR 1.2m.
- CCHBC Reinsurance’s MCR is equal to the AMCR.

E.3 Use of duration-based equity risk sub module in calculation of the solvency capital requirement

There was no use of duration-based equity risk sub module in the calculation of the SCR.

E.4 Differences between the standard formula and any internal model used

CCHBC Re used the standard formula in determining its SCR and MCR and did not rely on any internal model.

E.5 Non-Compliance with the Minimum Capital Requirement and the Solvency Capital Requirement

There are no instances of non-compliance with the MCR and SCR.

E.6 Any other information

There is no other information to report.

<i>Note: Tables within this report contain minor rounding differences in certain instances due to amounts being displayed as whole numbers or in thousands while the source workings underlying the annual reporting templates are calculated to two decimal places. These differences are immaterial.</i>
