Summary

This Solvency and Financial Condition Report (“SFCR”) has been drafted in line with articles 290 through 299 of the Commission Delegation Regulation (EU) 2015/35 of 10 October 2014.

The objective of this report is to consolidate all material and key information relating to Codeve Insurance Company DAC (“the Company” or “Codeve”) over the reporting period of 1 January 2020 through 31 December 2020, in respect of the following categories:

- Business and performance
- System of governance
- Risk profile
- Valuation for solvency purposes
- Capital management

The following summarises the information and findings in the subsequent sections of this report:

- The Company’s business remained unchanged from the prior year with no adjustments to the lines of business licensed to be underwritten. The financial performance of the Company was acceptable with a net profit after tax achieved of €2,361,404 (2019: €2,330,289).
- The Company’s System of Governance is robust and fit for purpose with the appointed Board of Directors together with the respective Heads of Functions, adequately fulfilling their requirements over the reporting period.
- The risk profile of the Company has remained unchanged from the prior year with all insurance coverage being provided to Group entities. The levels of risk and retention for the various lines of business remain unchanged.
- The Company has calculated its Solvency Capital Requirement (“SCR”) using the standard formula. As at 31 December 2020 the Company’s gross technical provisions as calculated under Solvency II valuation principles were €64.9M (2019: €79.3M) compared to GAAP technical provisions of €78.1M (2019: €85.2M), as booked in the audited financial statements.
- With eligible capital of €47.7M (2019: €45.0M) in place, the Company achieved SCR coverage of 159.7% (2019: 145.9%) and Minimum Capital Requirement (“MCR”) coverage of 638.9% (2019: 583.5%) as at 31 December 2020.

A. Business Performance: Year Ended 31st December 2020

This Solvency and Financial Condition Report ("SFCR") has been prepared to allow Codeve Insurance Company DAC ('CICDAC' or 'the Company') to comply with the Pillar III reporting requirements under Directive 2009/138/EC and associated Regulations ('the Solvency II Directive').

The Company has set a target Solvency Capital Requirement coverage ratio of a minimum of 115%.

A.1 General Information about the Business

None.

B. Systems of Governance

B.1 General Information

The organisational structure of the Company is as follows:

Board of Directors

The Board of Codeve Insurance Company DAC as at 31st December 2020 is comprised as follows:

Name	PCF	Date Appointed	Date Resigned
John O'Neill	Non-Executive Director (PCF2)	01/09/2004	N/A
Jonathan O'Reilly	Chief Executive Director (PCF8)	14/02/2012	N/A
Marc Denizot	Non-Executive Director (PCF2)	31/05/2013	N/A
Oliver Wild	Non-Executive Director (PCF2)	28/11/2013	N/A
Robert Frewen	Non-Executive Director (PCF2)	03/10/2019	N/A

The following roles and decisions are the sole responsibility of the Board and it is their role to ensure:

- The effective, prudent and ethical oversight of the Company
- Setting the business strategy for the Company
- Determination of Capital Requirements
- Establishing banking mandate/s
- Determining Investment Policy (to be reviewed at least annually)
- Approval of Claims Handling Arrangements
- Approval of Reserving Strategy
- Approval of the Reinsurance Strategy
- Appointment of Auditors
- Appointment of Head of Actuarial Function
- Appointment of Corporate Secretary
- Appointment of Management Company
- Appointment of Investment Managers (where applicable)
- Appointment of Bankers
- Appointment of Lawyers
- Appointment of Directors, Chief Executive & other Officers
- Identification and appointment of the Key Functions within the Company
- Removal of the Head of a Control Function and consequent notification of such decision to CBI within 5 working days
- Dividend Policy and Recommendations
- Setting the Risk Appetite of the Company

- Overall Responsibility for the Company's Risk Management
- Approval of Risk Management Policy
- Establishing and maintaining the Company's Internal Control Framework
- Own Risk and Solvency Assessment ("ORSA") policy and related activities
- Review of the Company's Policies and Procedures (annually)
- Approval and Determination of the Delegations of Authority
- Establishment of various Committees and related delegation of duties
- Approval of various Committees' Terms of Reference
- Fit and Proper Procedures and approval process

Audit Committee

In line with the requirements of the Corporate Governance Requirements for Insurance Undertakings 2015, the Company established an Audit Committee at the Board Meeting held on 24th November 2011. The duties of the Audit Committee include:

- Consider the appointment of external auditors.
- Review the relationship with external auditors: this includes the consideration of the audit fees and other fees paid for non-audit services (e.g. tax computations / advice).
- Review the financial reporting and internal control procedures, including reports issued by the Financial Advisory Committee.
- Engage with the internal audit function and/or internal audit team and agree the scope of their annual review.
- Review the internal audit procedures.
- Review any reports released by the internal auditor.
- Review the management of financial matters and focus on the independence and objectivity of the external auditors as well as the freedom allowed to the internal auditor.
- Review consistency of accounting policies both on a year to year basis and across the Company.

Information on Remuneration Policies and Practices

As the Company is classified by the Central Bank as an Insurance Undertaking, there is a corporate governance requirement to appoint a number of Independent Non-Executive Director to Board positions. Accordingly, these individuals are remunerated for their expertise and time spent preparing and participating in quarterly meetings. Remuneration is commensurate to the individual's experience and level of input into the activities of the Board, based on market rates.

In addition, owing to the classification of the Company as a non-captive, a position of Chief Executive Officer (previously General Manager) is required. This one individual constitutes the Company's sole employee during the year.

Overview of Year Ended 31st December 2020

Five Board meetings took place in Dublin, Ireland within the reporting period. These took place on the following dates:

- 26th March 2020
- 17th June 2020
- 30th September 2020
- 20th November 2020
- 3rd December 2020

Key Functions

The Company complies with the requirements under Solvency II and under the Fitness and Probity Standards to ensure that key functions are held by persons with the appropriate knowledge, experience and competence. The Company has nominated Mr. Jonathan O'Reilly, Executive Director as the designated person, with the overall responsibility for the outsourced functions. Mr. O'Reilly has sufficient knowledge and experience with regard to the outsourced key functions and has the ability to challenge the performance and results of the respective service providers. The following key functions are outsourced by the Company:

Risk Management Function

The Company has created a Risk Management Function (consisting of the Chief Executive and the Compliance Officer / Chief Risk Officer) to identify and evaluate the major risks facing the Company in order to facilitate the implementation of the Risk Management system. In assigning the Risk Management Function as referred to above, the Board is satisfied that the skill sets of the responsible personnel are adequate to undertake the required roles. Refer to the Compliance and Internal Control Policy for full details of individual and collective roles, responsibilities and objectives relating to this function.

The Board will review the composition of its Risk Management Function at least annually.

The Board is responsible for ensuring the effectiveness of the Company's Risk Management System, for setting the risk appetite and tolerance levels as well as approving all related risk management strategies and policies.

The Company's Risk Management Function is responsible for the implementation of the Company's Risk Management arrangements within the operations of the Company on an ongoing basis.

The Risk Management Function is also responsible for effective reporting to the Board on the material risks to which the Company is exposed and on other specific areas of risks both on its own initiative and following direction from the Board.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Chief Risk Officer (PCF14). This function is provided to the Company by Mr. Eamonn Brennan in line with the terms and conditions of the Compliance and Risk Services Agreement.

Compliance Function

The Company's Compliance Function is responsible for implementing an appropriate compliance framework within the Company and monitoring the Company's adherence to legal and regulatory requirements on an ongoing basis.

The Compliance Function reports to the Board periodically on all key compliance matters, such as implementation of the annual Compliance Plan, regulatory engagement and correspondence, upstream regulatory developments and any compliance breaches that may have occurred in the period and corrective actions undertaken.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Head of Compliance (PCF12). This function is provided to the Company by Mr. Eamonn Brennan in line with the terms and conditions of the Compliance and Risk Services Agreement.

Actuarial Function

The Board has ensured that an appropriately resourced Actuarial Function is established and maintained within the Company. The activities of the Company's Actuarial Function are currently outsourced to Willis Towers Watson.

The Actuarial Function is carried out by persons who have an appropriate knowledge of actuarial and financial mathematics, commensurate with the nature, scale and complexity of the risks inherent in the Company, and who are able to demonstrate their relevant experience with applicable professional and other standards in line with the Company's Fitness and Probity Policy and the Central Bank of Ireland's Fitness and Probity Standards.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Head of Actuarial Function (PCF48). This function is provided to the Company by Mr. David Stebbing in line with the Addendum to the Management Services Agreement dated 1st April 2017.

The Actuarial Function's role can be summarised as providing the Company with the following:

- Contribution to the effective implementation of the risk management system, in particular, the Own Risk and Solvency Assessment and Solvency Capital Requirement calculations.
- Co-ordinating the calculation of the Technical Provisions.
- Provision of an opinion on the underwriting and reinsurance policy of the Company
- Production of a written report to be submitted to the Board, at least annually (Actuarial Function Report). The report documents all tasks that have been undertaken by the Actuarial Function and their results, and clearly identifies any deficiencies and gives recommendations as to how such deficiencies should be remedied.
- Assess the sufficiency and quality of the data used in the calculation of technical provisions.
- Comparison of best estimates against experience.

Internal Audit Function

The Board has ensured that an appropriately resourced Internal Audit Function is established and maintained within the Company. The Internal Audit Function is an outsourced service provided by Veolia Group, which reports directly to the Board of Directors, with the Audit Committee acting as oversight. The Internal Audit mission is to independently examine and evaluate the functioning effectiveness and efficiency of the Company's internal control system and all other elements of governance.

The activities of the Internal Audit function are designed to provide advice to management in improving the internal control environment, monitoring the implementation of strategic control initiatives and management's remediation activity. The Internal Audit Function provides a formal report to the Audit Committee and Board at least annually. The findings of Internal Audit reviews conducted are discussed with, and challenged by, the Board and an action plan is agreed upon to remediate any issues identified, along with a timeline for completion.

In line with the Solvency II requirements, the Company has nominated an appropriate person to the role of Head of Internal Audit Function (PCF13). This function is provided to the Company by Mr. Oliver Wild, and performance of the internal audit function is outsourced to the Veolia Corporate Audit Department in line with the terms and conditions of the 'Provision of Internal Audit Function Agreement'.

B.2 Fit and Proper Requirements

Codeve Insurance Company DAC deems the following personnel to hold Pre-Approval Controlled Functions (“PCF”) and therefore be defined as ‘Relevant Persons’ subject to the Fitness and Probity Standards:

- The Board of Directors
- The Chairman of the Risk Committee
- The Chairman of the Audit Committee
- The Chief Risk Officer
- The Head of Internal Audit
- The Head of Actuarial Function
- The Head of Compliance

Fitness:

The members of the Board of the Company collectively possess the required qualification, experience and knowledge:

- Of insurance and financial markets relevant to the operations of the Company;
- Of the business strategy and business model of the Company;
- Of the Company’s system of governance;
- To perform required financial and actuarial analysis in respect of the Company;
- Of the regulatory framework and requirements applicable to the Company; and
- Generally, to be able to provide for the sound and prudent management of the Company.

The persons holding the key functions outlined above must hold the appropriate qualifications, knowledge and sufficient experience in their relevant disciplines, in compliance with the Fitness and Probity Standards (“the Standards”).

Probity:

The honesty, financial soundness and reputation of every Relevant Person as defined above has been assessed by the Company in order to determine that they are of good repute and integrity. This assessment has been based on relevant evidence regarding their character, personal behaviour and business conduct including any criminal, financial and supervisory aspects, regardless of location.

In line with the Standards, the Company submits a PCF Confirmation to the Central Bank on an annual basis confirming all PCF holders remain in compliance with the fitness and probity requirements.

B.3 Risk Management System

The Company's Risk Management System is comprised of the following elements;

- Risk Appetite Statement
- Risk Register
- Formal Policy Documents for all key risks
- Own Risk and Solvency Assessment
- Formalised Risk Reporting

Each of the elements of the Risk Management System detailed above contribute to the identification, measurement, monitoring, management and reporting of risks and is intended to work as an integrated system, and therefore each should be considered in both in terms of the specific function of the respective element, and in terms of its function within the overall system.

Each element of the system is embedded effectively within the Company and managed by the Risk Management Function with appropriate oversight from, and reporting to, the Board.

Risk Management Approach

The Company's risk management approach is centred on ensuring the inherent risks which the Company faces in the course of its business are appropriately managed to ensure the strategic objectives of the Company are achieved.

This approach also ensures that risk management is appropriately included in the Company's decision-making process.

Risk Profile

The Company, in considering its risk profile, has regard to the following factors;

Nature:

The nature of the Company's risk is confined with the Veolia Group only with no third-party policy holders and therefore represents limited systemic risk.

Scale:

The scale of the risk assumed by the Company can be considered low based on the residual 'Values at Risk' and the Company's organisational structure, relative to the general insurance market.

Complexity:

The Company assumes standard underwriting risk only, holds a simplistic and conservative investment portfolio, employs traditional risk mitigation techniques and utilises reputable counterparties, and therefore the risk assumed can be considered to be of limited complexity.

The Company's risk profile is formally reviewed at least annually as part of the Company's ORSA exercise. The Risk Management Function monitors the Company's risk profile and the corresponding risk management arrangements in place on an ongoing basis and reports to the Board on any observed material changes.

Risk Function

The Risk Management Function of the Company is responsible for the operational coordination and application of all Risk Management activities throughout the Company on an ongoing basis.

The Risk Management Function reports directly to the Board on a biannual basis or upon occurrence of an event which could materially impact the Company's risk profile.

The Risk Management Function is responsible for the coordination of all risk management activities throughout the Company.

The Risk Management Function is also responsible for providing the Board with assistance and support in the development and implementation of the various risk management arrangements within the Company.

The Board has outsourced the activities of the Risk Management Function to Mr. Eamonn Brennan in accordance with the Company's Outsourcing Policy and in line with the terms and conditions of the Compliance and Risk Services Agreement.

Risk Categories & Key Risks

Key risks are considered to be the six risk categories detailed in the Solvency II Directive, together with any other risks evaluated as being key risks by the Risk Management Function and the Board of Directors.

Any of the other identified risks, outside of those prescribed risk categories in the Solvency II Directive, shall be considered to be a key risk if, on a residual basis, a material level of capital is deemed to be required in order to accept the risk, or if particular controls or risk mitigation techniques specific for the risk in question must be employed in order to bring the risk within the appropriate thresholds as defined in the Risk Appetite Statement.

All key risks are documented in the Risk Appetite Statement and are subject to a specific policy document which addresses how the risk is to be managed in line with the hierarchy outlined previously.

The key risk categories for the Company are:

- Underwriting and Reserving Risk
- Reinsurance and Other Risk Mitigation Techniques
- Operational Risk
- Investment Risk
- Asset-Liability Management Risk
- Liquidity Risk

The risk categories and key risks to which the Company is exposed are reviewed periodically by the Risk Management Function and at least:

- Annually
- On occurrence of an event which could materially affect the Company's risk profile
- On the introduction of material new business
- At the discretion or order of the Board

Risk Appetite Statement

The Company has in place a Risk Appetite Statement ("RAS"). The RAS sets out the risk appetite and tolerance levels for all key risks over the planning period of the Company.

The Company considers the RAS to be the primary element of the Risk Management System, directly linking to the overall Company Strategy and determining the levels retained for each key risk, and also influencing the nature of the controls and mitigation techniques employed to ensure that the risk remains within the tolerable range.

The Board is responsible for setting the Company's RAS. The Board periodically reviews the appropriateness and effectiveness of the RAS and performs a formal review of the RAS at least annually or upon a material change in the Company's risk profile.

The RAS includes both qualitative and quantitative aspects for each key risk and is aligned to the planning period of the Company.

The RAS is embedded within the decision-making processes of the Company. The Board of Directors, prior to finalising any material decision which could impact the risk profile of the Company, refers to the RAS for guidance as to the likely effect of the decision on the risk appetite and tolerance levels of the Company.

The RAS is also used to track actual performance against the metrics detailed in the RAS to ensure that no breach in the agreed tolerance levels has occurred that would require the submission of a report to the Central Bank of Ireland.

Monitoring of the actual performance against the metrics identified in the RAS is performed periodically by the Risk Management Function and reported to the Board in line with the reporting trigger system included in the RAS.

The Company's qualitative risk appetite principles and quantitative appetite and tolerance levels for each key risk are detailed in the Risk Appetite Statement.

Risk Policies

The Company has documented a formal policy for each key risk included in the RAS. The policies for each specific risk are consistent with the details contained in the RAS relating to the risk in question.

The controls, reporting triggers and any other relevant aspects of the management of the risk are appropriately reflected in the policy for the risk.

Risk Register

The Company has in place a comprehensive Risk Register to evaluate and assess the risks to which the Company is exposed.

The Risk Register initially assesses the risk universe of the Company on an inherent basis. The controls and risk mitigating techniques employed by the Company, as documented in the Company's policies and procedures allow for an evaluation of the risk on a residual basis.

If the risk on a residual basis is deemed to potentially require a material level of capital or the implementation of significant additional controls to accommodate the risk to bring the risk within the appropriate thresholds, this risk should be considered a key risk. Any risk deemed to be a key risk shall be considered for inclusion in the RAS by the Board and a specific policy developed which outlines the process for the identification, management, monitoring and reporting on the risk in question.

The Risk Management Function is responsible for the ongoing maintenance of the Risk Register.

The Risk Register is updated on at least an annual basis and upon the occurrence of an event which may materially impact the Company's risk profile.

A summary of the results of the Risk Register review is distributed to the Board upon completion of each review as soon as is practicable and form part of the Risk Management Function's periodic Risk Reporting.

As part of each update, the Risk Register is reviewed by the Risk Management Function to ensure that the Risks included represent all the material risks to which the Company is exposed and that all applicable emerging risks have been appropriately included.

Where an emerging risk has been identified as one which should potentially be included in the Risk Register, the Risk Function advises the Board of the nature and context of the risk. The Board then determines whether the risk in question is to be included in the Risk Register and whether the risk should be considered as a Key Risk.

ORSA

The Company aims to ensure that the Company is appropriately and prudently capitalised in order to accept the risk to which the Company is exposed. In order to ensure this, the Company performs an Own Risk and Solvency Assessment at least annually and upon the occurrence of an event which may materially impact the Company's risk profile.

ORSA - Approach taken:

The EIOPA guidance in relation to the ORSA focuses on what is to be achieved by this assessment rather than on how it is to be performed. Since the ORSA represents the Company's own view of its risk profile and the capital needed to address these risks, the Company decides for itself the most appropriate process by which the ORSA is performed.

The Board takes a proactive approach in the ORSA process by providing guidance to the Risk Management function as to the direction of the ORSA process, including the identification, evaluation and quantification of the risks inherent in the business.

The following provides a summary of the approach taken in 2020:

- March 2020 Board Meeting – review of ORSA Process and HoAF recommendations from 2019 ORSA Opinion together with a review the Risk Register, Risk Appetite Statement and a selection of appropriate stressed scenarios for testing.
- June 2020 Board Meeting – review and discussion of scenarios for testing together with parameters and assumptions for financial projections. Scenarios approved by the Board.
- December 2020 Board Meeting – review full suite of documentation together with the populated CBI reporting template. Requisite approvals obtained and template uploaded to the CBI in advance of submission deadline of 31st December 2020.

The Board of Directors provide substantial input and discuss in detail the various aspects of the ORSA and adjust as and when considered necessary; as documented in the minutes of the Board meetings.

Own Risk Assessment:

The first element of the ORSA process was to ascertain the Company's Own Risk Assessment ("ORA"). ORA is a method of identifying its material risks in the context of its Risk Profile, Risk Register and Risk Appetite Statement. The following areas for assessment were identified in respect of the Company's material risks:

- The Maximum Value at Risk ("VAR") for each identified key risk of the Company.
- The controls and risk management arrangements in place which act to mitigate each risk.
- The basis for measurement and assessment of the risk over the planning period.
- The current experience of each individual risk.
- The expected risk assessment for the planning period, being the anticipated financial and non-financial activity of the Company over the short, medium and long term.

- Application of appropriate and reasonable stresses to the expected risk assessment to demonstrate the robustness of the Company's capital base in the context of its current business.

Risk Reporting

The Risk Management Function formally reports to the Board on an annual basis. The report contains details of the outcome of the Risk Register review, the results of the comparison of the RAS to actual results and an update on emerging risks.

The report contains both qualitative and quantitative aspects and covers all key risks of the Company.

The Risk Management Function is responsible for the development of the Risk Reports.

The Risk Management Function will provide a report to the Board based on the occurrence of an event which materially alters the risk profile of the Company or if the tolerance level triggers are breached.

The Risk Management Function will advise the Board on the quality of the data used in the review of the Risk Management System, including any deficiencies that may have been identified during the course of the review.

B.4 Internal Control System

The Board is ultimately responsible for ensuring that the Company has in place an effective internal control system which is commensurate with the nature, scale and complexity of the Company's operations. The Company ensures that appropriate levels of Internal Controls are present within the organisational structure, work and authority flows, resource utilisation and information systems.

This is achieved by:

- Ensuring the presence and application of individual internal policies, procedures and guidelines for each of the critical functions and activities of the Company;
- Ensuring that adequate approval procedures, authorization authorities, verification, reconciliations, and review procedures are in place for each function or activity and are adequately documented and communicated;
- Ensuring that adequate controls are in place pertaining to safeguarding the integrity and protection of information;
- Ensuring sufficient monitoring mechanisms are in place to facilitate assessments of the effectiveness of the controls in place; and
- The activities of the Compliance function are in place, the Compliance Policy is being applied and the Compliance Plan is being implemented.

The Internal Audit Function is responsible for the evaluation of the adequacy and effectiveness of the Company's internal control system. The Compliance Function is responsible for the review and monitoring of the application of internal controls relating to compliance risk. The outsourced Managers are responsible for the application and ongoing maintenance of the Company's internal control activities. The contracted Management Company has procedures manuals and internal controls in place that are documented and maintained within the Company's Corporate Governance Framework documents. Internal controls are reviewed at least annually or when a change in the systems or operations of the Company occurs. The policies and procedures in place are proportional to the operations of the Company and cover at least the following key operational areas:

- Underwriting
- Claims reserving
- Claims settlement
- Management accounts preparation
- General bank payments
- Bank reconciliations
- Compliance

The Internal Controls are also proportional to the operations of the Company and centre on the following controls:

Regular

- Four eye review approach on all renewal activities
- Dual signatories on all payments in line with approved bank mandates
- Reconciliations of all bank accounts on a monthly basis
- Quarterly financial reporting to Group
- Detailed reporting to the Board on compliance matters

Periodic

- Monitoring activities are carried out by the Compliance Function and a Compliance and Regulatory report is circulated to the Board.

- The Internal Audit Function conduct reviews of the design and effectiveness of internal controls, in line with the Internal Audit Plan approved by the Board
- The Management Company is subject to the Internal Audit processes of the Willis Towers Watson Group with Internal Audit reviews covering work performed by WTWMDL on its clients

B.5 Outsourcing

The Company outsources various activities where the Board believes outsourcing can provide access to superior processes and technical skills than it would otherwise achieve on a standalone basis, or where appropriate due to the nature, scale and complexity of the operations of the Company. The Board is ultimately responsible for the approval of and termination of all outsourcing arrangements of critical or important functions and activities.

The Risk Management Function is responsible for assessing the risks associated with the outsourcing of critical or important functions or activities as part of its overall remit to identify, assess, manage, monitor and report the risks of the Company on an ongoing basis. The functions deemed critical or important are defined in the Company's Outsourcing Policy.

The Board has ensured that the outsourced service providers adhere to the Company's policies and procedures and that the effectiveness of the Company's system of governance has not been lessened or compromised by the outsourcing arrangements.

The performance of each service provider is based on a comparison of the actual performance of the service provider in comparison with the required performance as per the agreed Service Level Agreement ("SLA"). The SLAs include details covering Business Continuity Planning and ensure that acceptable service levels are maintained in the event of problems occurring with the service provider. The performance of all service providers is formally assessed by the Board on an annual basis.

In the Board's current assessment of the performance of each service provider acting in an outsourced capacity, no material deficiencies noted.

B.6 Any Other Information

None.

C. Risk Profile

The Company operates a low-risk business model that is supported by a robust risk management framework that ensures risks are well understood and controlled. This is facilitated by systematic quantification of all risks and a culture that promotes the importance of risk management.

Integral to this is a thorough understanding and articulation of the Company's risk exposures. Determining the prevailing risk landscape within the Company allows Management, the Risk Function and the Board to assess the appetite for each emerging risk and to ensure that all are quantifiable and managed consistently with our appetite to risk.

An overview of the key risks associated with the business including an outline of how they are managed is provided below.

C.1 Underwriting Risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random, unknown and unpredictable.

As its primary insurance activity, the company assumes the following risks:

- Property Damage and Business Interruption ("PDBI") coverage in France and worldwide
- Personal Accident ("PA") coverage in France
- General Liability ("GL") relating to prior years
- Employers' and Auto Liability ("EL" & "AL") coverage in UK and Ireland
- Deductible Reimbursement of Workers' Compensation, Auto & GL coverages in the USA

The Company is therefore exposed to the uncertainty surrounding the timing and severity of claims under these insurance contracts. The terms and conditions of the insurance contracts it issues set out the basis for the determination of the Company's liability should the insured event occur.

The Company also faces risks that the actual claims are significantly different to the amounts included within the technical provisions. This could occur because the frequency or severity of claims is greater or lower than estimated. The insurance risks are mitigated through strict underwriting criteria, the utilising of actuarial review and the use of reinsurance.

The Company manages its insurance risk through underwriting limits, approval procedures for transactions that involve new products or that exceed set limits, pricing guidelines, centralised management of reinsurance and monitoring of emerging issues.

The Company reinsures a significant portion of the risks it underwrites in order to control its net exposure to losses and protect capital resources.

The Company monitors the financial condition of reinsurers on an ongoing basis and reviews its reinsurance arrangements annually. The Company utilises reinsurance agreements with both affiliated and non-affiliated reinsurers to control its exposure to losses resulting from one occurrence and for the accumulation of net losses arising out of one occurrence.

C.2 Market Risk

The Company's primary objective in relation to market risk is to protect and preserve the Company's assets. The Company therefore only invests in line with its Investment Policy which is reviewed on an annual basis by the Board of Directors.

The Company seeks to spread investments across a number of institutions to reduce concentration risk.

As part of the periodic reporting to Group Finance and the Board, the amount of funds invested with each individual institution is reviewed in line with that institution's current credit rating. In line with the Company's Risk Appetite Statement, there is an appetite to maintain a minimum of three credit institutions. However, it will tolerate fewer if adverse conditions develop further in the finance sphere such as negative interest rates being applied by one or more of the Company's existing banks.

All of the Company's liabilities can be considered short term in nature hence the Company looks to align the duration of investments accordingly to reduce Asset Liability Matching risk. The Company does invest in term deposits with duration of up to 18 months; however, the nature of the investments is such that they may be broken at a day's notice with the interest portion being forgone but the capital portion immediately available to settle liabilities as they arise.

Since the Company writes policies in currencies other than its reporting currency, with claims against those policies expected to be settled in that underlying currency, the Company endeavours to minimise its exposure to foreign currency risk by holding assets in the currency of the policy. Non-reporting currency will be bought and sold in line with the level of liabilities arising in respect of those foreign currency policies.

C.3 Credit Risk

Credit Default Risk

The investment strategy and minimum rating requirement outlined in the Company's Investment Policy is pursued and seeks to minimise credit default risk whilst protecting the underlying principal amount.

In respect of credit default risk relating to its reinsurance partners, this is managed by ensuring a general minimum credit rating of A or greater, as documented in the Company's Reinsurance Policy.

Counterparty Default Risk

The Company utilises reinsurance to manage efficiently its insurance risk. As such, it is exposed to the failure of these counterparties. The Company seeks to minimise this exposure by diversifying its placement of reinsurance with both commercial market reinsurers and with another Group company.

The Company has little appetite for counterparty default risk in relation to investments and seeks to invest in institutions of the greatest strength and stability.

C.4 Liquidity Risk

The Company's Liquidity Policy requires sufficiently liquid assets to be held in order to meet outflows. All investments are held in a liquid state and the Company has clear visibility of when policyholder obligations will and could fall due given the nature and scale of the Company. Ongoing monitoring of liquidity also allows mitigating actions to be taken at an early stage if required.

C.5 Operational Risk

The Company is exposed to operational risk, which is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. In particular, this includes the failure of key outsourcing arrangements, business disruption, fraud and loss of key personnel.

The process through which the Company's operational risk universe is determined and subsequent estimates of frequency and severity are assessed is captured in the Operational Risk Policy. This process safeguards the ongoing improvement of the control environment and ensures that operational risk is identified and mitigated.

The Company is reliant on the use of external parties to provide a significant portion of the services required, and thus is therefore exposed to the potential failure of these outsourcing partners. The Company has documented a Contingency Plan and an Outsourcing Policy which set out how this risk is managed and monitored.

C.6 Other Material Risks

The Company's view is that there are no other material risks to be considered at this time.

COVID -19

During the financial year, a global pandemic occurred, Covid-19 (the "pandemic"), which is ongoing and is causing significant financial market and social dislocation. The ultimate effects of the pandemic on the Company are expected to be immaterial, and to date there has been no financial impact on the Company. The Board has made an assessment of the risks involved for the Company and is satisfied that based on the information available to date the Company is well positioned and sufficiently capitalised to manage those risks. The Board will continue to closely monitor the evolving situation to

evaluate the potential risks to the Company on an ongoing basis and seek to minimise those risks where possible. COVID-19 is not considered a material risk to the Company at this time.

C.7 Any Other Information

None.

D. Valuation for Solvency Purposes

D.1 Assets

Valuation of Assets

The recognition and valuation basis are in accordance with the provisions of the Solvency II Directive with the valuation and recognition for material classes as follows:

Intangible Assets

Intangible assets are recognised under Financial Reporting Standard 102 on the basis that the expected future economic benefits that are attributable to the asset will flow to the Company, and the cost of the asset can be measured reliably. The Company holds no intangible asset and thus no recognition and valuation methodology were applied in respect of this category.

Deferred Tax Asset

Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. Under Solvency II which recognises unrealised gains and respective tax, deferred tax is recognised, and no adjustments were considered applicable to the valuation.

Investments

Investments are recognised under Financial Reporting Standard 102 on the basis that the Company becomes a party to the contractual provisions of the instrument.

All financial assets and liabilities are initially measured at transaction price, except for those financial assets classified as fair value through profit and loss, which are initially measured at fair value.

Realised and unrealised gains and losses arising from the changes in the fair value of investments are presented in the non-technical profit and loss account in the period in which they arise. Interest income is recognised when earned and investment management and other related expense are recognised when incurred.

Material Differences in the above used for valuation in Financial Statements

Codeve Insurance Company DAC Assets (€)	2020	
	Financial Statements	SII Valuation Principles
Deferred Acquisition Costs	2	-
Collective Investment Undertakings	9,916,045	9,916,045
Deposits other than cash equivalents	19,287,330	19,287,330
Reinsurance recoverables from non-life excluding health	51,614,315	40,900,153
Insurance & Intermediaries Receivables	873,918	11,532
Reinsurance Receivables	61,207	61,207
Cash & Cash Equivalents	42,862,737	42,862,737
Any Other Assets, Not Elsewhere Shown	717,637	717,637
Total assets	125,333,191	113,756,641

Codeve Insurance Company DAC Assets (€)	2019	
	Financial Statements	SII Valuation Principles
Deferred Acquisition Costs	2	-
Collective Investment Undertakings	9,949,461	9,949,461
Deposits other than cash equivalents	20,215,982	20,215,982
Reinsurance recoverables from non-life excluding health	56,419,690	51,951,517
Insurance & Intermediaries Receivables	151,202	151,202
Reinsurance Receivables	454,726	454,726
Cash & Cash Equivalents	42,867,308	42,867,308
Any Other Assets, Not Elsewhere Shown	723,675	723,675
Total assets	130,782,046	126,313,871

The table above sets out the values in the financial statements along with the corresponding current accounting basis used to calculate the Solvency II valuation.

Key points to note:

- €61,207 (2019: €454,726) represents a called but not paid amount which is included within the reinsurance receivables balance on the current accounting basis;
- The Solvency II reinsurance recoverable value is arrived at by discounting the total of the Financial Statements reinsurance recoverable together with a recoverable ENID of €325,000 (2019: €80,000).

Overview of any assets not regularly traded in Financial Markets

The Company has no assets that are not regularly traded in financial markets.

D.2 Technical Provisions

Valuation of Technical Provisions per Line of business

Technical provisions are valued in accordance with Article 77 of the Solvency II Directive which states that the value of technical provisions shall be equal to the sum of a best estimate and a risk margin.

Valuation results

The valuation was carried out together for each line of business. Under Solvency II, the balance sheet is required to be valued on a “best estimate” discounted cash flow basis. This leads to differences in claims provision between financial statements and Solvency II.

The table below sets out the results of the technical provision calculations on the financial statements together with the current accounting basis used to determine the Solvency II valuation.

Codeve Insurance Company DAC Liabilities (€)	2020	
	Financial Statements	SII Valuation Principles
Gross Technical Provisions – Non-Life (Excluding Health)	76,614,644	62,617,891
TP calculated as a whole (Best estimate + Risk margin)		
Best Estimate		59,283,361
Risk Margin		3,334,530
Gross Technical Provisions - Health (Similar to Non-Life)		2,305,399
TP calculated as a whole (Best estimate + Risk margin)		
Best Estimate		2,030,948
Risk margin		274,451
Other Technical Provisions	1,532,293	-
Deferred Tax Liabilities	-	205,887
Insurance & Intermediaries Payables	342,313	342,313
Any other liabilities, not elsewhere shown	633,487	633,487
Total liabilities	79,122,736	66,104,977

Codeve Insurance Company DAC Liabilities (€)	2019	
	Financial Statements	SII Valuation Principles
Gross Technical Provisions – Non-Life (Excluding Health)	83,488,011	76,545,189
TP calculated as a whole (Best estimate + Risk margin)		
Best Estimate		73,547,569
Risk Margin		2,997,620
Gross Technical Provisions - Health (Similar to Non-Life)		2,776,343
TP calculated as a whole (Best estimate + Risk margin)		
Best Estimate		2,590,128
Risk margin		186,215
Other Technical Provisions	1,669,760	-
Deferred Tax Liabilities	-	171,008
Insurance & Intermediaries Payables	912,638	912,638
Any other liabilities, not elsewhere shown	862,588	862,588
Total liabilities	86,932,997	81,267,766

Key points to note:

- The Solvency II Gross TPs value is arrived at by discounting the total of the Financial Statements Gross Technical Provisions and adding the Gross ENID value of €985k (2019: €296k) along with expenses of €2,204k (2019: €2,134k); collectively forming the Best Estimate.
- The Gross Technical Provisions, valued using Solvency II valuation principles, requires the addition of a Risk Margin to the Best Estimate.

The Solvency II Directive regulation requires the inclusion of “run-off” expenses to be incorporated into the Solvency II calculation. This has been added to the net technical provisions for the Company.

Claims Provision

As at the reporting date, the Company had included the following known losses with open reserves and Incurred but not Reported (“IBNR”) provisions.

	2020 (€)	2019 (€)
Notified outstanding claims	58,785,835	66,161,313
Provision for claims incurred but not reported	17,828,808	17,326,698
	76,614,643	83,488,011

Material Differences in the above used for valuation in Financial Statements

The above tables outline the material differences in the valuation of technical provisions between the Financial Statements and Solvency II valuation.

Simplification

The Company utilises the standard formula for the calculation of its Solvency Capital Requirement. Simplification method 1 is used for the standard formula.

Uncertainties in the value of Technical Provisions

The key assumptions that impact the Technical Provisions are detailed below along with comments regarding the materiality of these assumptions.

- **Settlement period:** Vary according to the line of business from 1 year in respect of the French Personal Accident cover to 15 years for the various components of the US casualty cover. Save for the latter, the Company has a significant amount of historical data upon which it determines its settlement patterns thus reducing the level of uncertainty.
- **Discount rate:** EIOPA standard yields are applied to the various lines of business depending on the underlying currency of the policy written. Current yields remain very low, which means that minimal discounting is applied to the Technical Provisions denominated in USD. EUR and GBP yields are negative for the first 21 and 3 years respectively at present, resulting in a modest increase in the provision held in respect of the PDBI line. Overall, however, the effect of the discounting is to reduce the value of the technical provisions held when valued using Solvency II principles.
- **Expenses:** Solvency II requires that the principle for valuing expense provisions is to estimate the expenses that a third party (re)insurer would be likely to incur if it were taking over the business. An expense provision is required for claims handling, policy administration expenses, acquisition expenses and investment expenses. The expense provision should also take into account overhead expenses incurred in servicing insurance obligations and should be projected on the assumption that the undertaking will write new business in the future. As such, the Company has included an expense provision within its calculation of its technical provisions, as calculated by its Head of Actuarial Function.
- **Reinsurance:** We have also assumed that the reinsurance will perform as expected.

The above assumptions in calculating appropriate Technical Provisions are consistent with those of the Company's Head of Actuarial Function.

Impact of Reinsurance on Technical Provisions

The impact of reinsurance under SII valuation principles is to reduce the Company's Gross Technical Provisions by €40,900,153 (2019: €51,951,517).

Effectiveness of reinsurance arrangements

The use of reinsurance is to maintain underwriting risk within the Company's approved risk tolerance levels. The Board are satisfied with the effectiveness of the reinsurance arrangements in place.

It is also noted that the Veolia Group could purchase insurance directly from the market and therefore the use of the Company for the provision of insurance services is a conscious decision made in order to improve the efficiency of the risk management process within the Group by using a Company vehicle and provide access to reinsurance markets.

Furthermore, as part of the annual review of the reinsurance arrangements in 2019, the Head of Actuarial Function does not have material concerns about the Company's reinsurance arrangements.

Matching Adjustments, Volatility Adjustments and Transitional Measures

The Company has no matching adjustments, volatility adjustments or transitional measures as at the reporting period.

D.3 Other Liabilities

Valuation of liabilities per Class of Liability

Recognition

Financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial liabilities are classified according to the substance of the contractual arrangement entered into.

Initial measurement

All financial liabilities are initially measured at transaction price.

LIABILITIES	2020 €	2019 €
Creditors arising out of insurance operations	342,313	912,638
Amounts owed to group	-	-
Taxation payable	170,893	332,898
Accrued expenses	462,592	529,690
Total	975,798	1,775,226

Material Differences in the above used for valuation in Financial Statements

While there is no differentiation between the valuation of the other liabilities under GAAP financial statements (FRS 102/103) and Solvency II valuation, a Deferred Tax Liability in the amount of €205,887 (2019: €171,008) is generated as a product of the revaluation of the technical provisions.

D.4 Alternative methods for valuation

No alternative methods for valuation are utilised.

D.5 Any other Information

None.

E. Capital Management

E.1 Own Funds

The Company has the following components of own funds: Tier 1 basic own funds; ordinary share capital, and retained earnings.

The Company's ordinary shares have full voting, dividend and capital distribution (including on winding up) rights; they do not confer any rights of redemption.

The difference between the Company's equity as shown in its audited financial statements and the excess of assets over liabilities as calculated for solvency purposes is:

- the difference between the technical provisions calculated in accordance with the Solvency II requirements
- deferred tax adjustment in relation to the above differences

No deductions are applied to own funds and there are no significant restrictions affecting their availability and transferability. The MCR and SCR were calculated using the standard formula.

Solvency Capital Requirement Coverage

The Company's targeted SCR coverage is currently set at a minimum of 115% of the Pillar 1 solvency capital requirement. On an annual basis, and having regard to the results of stress tests applied to projections over the three year planning period, the Board will consider whether a dividend should be paid to remit any surplus capital above this target or if an intercompany loan should be arranged.

At the reporting date, no dividends have been declared or paid to Group and no intercompany loans have been extended.

Solvency Capital Position

The following tables set out the Company's pillar 1 capital position as at 31st December 2020 and 31st December 2019:

Composition	2020 €	
	Available Capital	Eligible Capital
Tier 1 unrestricted	47,651,665	47,651,665
Tier 1 restricted	-	-

Tier 2 basic	-	-
Tier 2 ancillary	-	-
Tier 3	-	-
Total	47,651,665	47,651,665

Solvency	Capital Requirement	Eligible Capital	Solvency Ratio	MCR as % SCR
SCR	29,833,610	47,651,665	159.7%	25.0%
MCR	7,458,403	47,651,665	638.9%	

Composition	2019 €	
	Available Capital	Eligible Capital
Tier 1 unrestricted	45,046,105	45,046,105
Tier 1 restricted	-	-
Tier 2 basic	-	-
Tier 2 ancillary	-	-
Tier 3	-	-
Total	45,046,105	45,046,105

Solvency	Capital Requirement	Eligible Capital	Solvency Ratio	MCR as % SCR
SCR	30,878,562	45,046,105	145.9%	25.0%
MCR	7,719,640	45,046,105	583.5%	

The table below shows the SCR components by risk module (using the Standard Formula):

SCR Overview	2020 €	2019 €
Market Risk	5,044,441	3,528,172
Counterparty Default Risk	6,004,533	6,972,075
Health underwriting risk	3,569,754	3,513,922
Non-life underwriting risk	22,293,304	22,697,918
Diversification	(8,695,181)	(8,117,656)
Basic Solvency Capital Requirement	28,216,851	28,594,431
Operational Risk	1,839,429	2,284,131
Loss Absorbing Capacity of Deferred Taxes	(222,670)	-
Solvency Capital Requirement	29,833,610	30,878,562

Simplified calculations are not used for any of the risk modules or sub-modules. The Company does not use undertaking specific parameters in its computation.

The Minimum Capital Requirement is calculated using the Standard Formula specifications. The table below shows the inputs into the MCR calculation:

MCR Overview	2020 €	2019 €
Linear MCR	2,606,529	2,929,797
SCR	29,833,610	30,878,562
MCR cap	13,425,125	13,895,353
MCR floor	7,458,403	7,719,640
Combined MCR	7,458,403	7,719,640
Absolute floor of the MCR	3,700,000	3,700,000
Minimum Capital Requirement	7,458,403	7,719,640

Deferred Taxes

A deferred tax liability in the amount of €205,887 (2019: €171,008) has been calculated as a result of the revaluation of the Company's assets and liabilities applying Solvency II valuation principles. The full deferred tax liability has been recognised on the Company's Solvency II Balance Sheet for the current reporting period.

The Company is not carrying any deferred tax assets at the valuation date.

E.2 SCR & MCR

As at 31st December 2020, the Company had achieved SCR coverage of 160%% (2019: 145.9%) and MCR coverage of 639% (2019: 583.5%).

Loss-Absorbing Capacity of Deferred Taxes (“LACDT”)

The SCR has been adjusted for LACDT in the amount of €222,670 (2019: €0).

The Company has determined a level of probable future taxable profits aligned to its Own Risk and Solvency Assessment, which demonstrates future utilisation of the proportion of loss-absorbing capacity of deferred taxes being applied.

As a proportion of the instantaneous loss, as defined in Article 207(1), the Company’s LACDT represents 0.7% and as such is deemed not material.

E.3 Use of duration-based equity risk Sub module in SCR calculation

The Company does not hold any liabilities that require this approach; therefore, this is not applicable for the Company.

E.4 Non-Compliance with MCR and SCR during the period

The Company was compliant at all times with the MCR and SCR requirements during the reporting period.

E.5 Any Other Information

None.

Own Funds

Basic own funds before deduction for participations in other financial sector as foreseen in article 68 of Delegated Regulation 2015/35

R0010	Ordinary share capital (gross of own shares)
R0030	Share premium account related to ordinary share capital
R0040	Initial funds, members' contributions or the equivalent basic own-fund item for mutual and mutual-type undertakings
R0050	Subordinated mutual member accounts
R0070	Surplus funds
R0090	Preference shares
R0110	Share premium account related to preference shares
R0130	Reconciliation reserve
R0140	Subordinated liabilities
R0160	An amount equal to the value of net deferred tax assets
R0180	Other own fund items approved by the supervisory authority as basic own funds not specified above

R0220 Own funds from the financial statements that should not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds

R0230 Deductions for participations in financial and credit institutions

R0290 Total basic own funds after deductions

Ancillary own funds

R0300	Unpaid and uncalled ordinary share capital callable on demand
R0310	Unpaid and uncalled initial funds, members' contributions or the equivalent basic own fund item for mutual and mutual - type undertakings, callable on demand
R0320	Unpaid and uncalled preference shares callable on demand
R0330	A legally binding commitment to subscribe and pay for subordinated liabilities on demand
R0340	Letters of credit and guarantees under Article 96(2) of the Directive 2009/138/EC
R0350	Letters of credit and guarantees other than under Article 96(2) of the Directive 2009/138/EC
R0360	Supplementary members calls under first subparagraph of Article 96(3) of the Directive 2009/138/EC
R0370	Supplementary members calls - other than under first subparagraph of Article 96(3) of the Directive 2009/138/EC
R0390	Other ancillary own funds
R0400	Total ancillary own funds

Available and eligible own funds

R0500	Total available own funds to meet the SCR
R0510	Total available own funds to meet the MCR
R0540	Total eligible own funds to meet the SCR
R0550	Total eligible own funds to meet the MCR

R0580	SCR
R0600	MCR
R0620	Ratio of Eligible own funds to SCR
R0640	Ratio of Eligible own funds to MCR

Reconcillation reserve

R0700	Excess of assets over liabilities
R0710	Own shares (held directly and indirectly)
R0720	Foreseeable dividends, distributions and charges
R0730	Other basic own fund items
R0740	Adjustment for restricted own fund items in respect of matching adjustment portfolios and ring fenced funds
R0760	Reconciliation reserve

Expected profits

R0770	Expected profits included in future premiums (EPIFP) - Life business
R0780	Expected profits included in future premiums (EPIFP) - Non- life business
R0790	Total Expected profits included in future premiums (EPIFP)
