## **EXECUTIVE SUMMARY**

This Report refers to the business of TCS Insurance Company of Ireland Designated Activity Company ('TCS', 'the Company'), a captive insurer, authorised and supervised by the Central Bank of Ireland. It provides the reader with information on the Company's business and performance, system of governance, risk profile, valuation for solvency purposes and capital management for the reporting period ended 31 December 2020.

TCS has prepared this report in accordance with the relevant articles of the Commission Delegated Regulation (EU) 2015/35, together with the Guidelines on reporting and public disclosure issued by EIOPA. TCS financial statements are prepared to 31 December 2020 and it reports its results in USD (United States Dollar).

The Board has identified the key risks to which TCS is exposed and established appropriate corporate governance, risk management and reporting mechanisms to ensure that the identified risks remain relevant and that they are managed and reported on with appropriate levels of detail and frequency. The Company has established a comprehensive suite of risk policies and implemented a series of internal controls to ensure that TCS can be managed in accordance with its governance and risk management systems. Documented escalation mechanisms are in place to ensure that any breaches in risk limits and tolerances, internal controls and governance requirements can be reported promptly to the appropriate individuals. Risks to which the Company is exposed are well understood and are used to determine the level of solvency and capital required over the business planning period and to better inform decision making within the Company.

There were no material changes to TCS's business and performance, system of governance, risk profile, valuation for solvency purposes and capital management over the reporting period.

As at 31 December 2020, the Company had eligible own funds of USD 8,502,159 available to meet its Solvency Capital Requirement (SCR) of USD 2,023,593 and Minimum Capital Requirement (MCR) of USD 4,540,270 resulting in a Solvency Ratio of 187% (eligible own funds over the MCR) which is in compliance with the regulatory solvency requirements per the Solvency II regulations. The Board of Directors is satisfied that the Company has adequate and appropriate capital to support its business operations. There were no instances of non-compliance with the capital requirements during the period.

## A. BUSINESS & PERFORMANCE

### A.1 Business

TCS was incorporated in Ireland in 1995 is licensed as a non-life insurance undertaking, under the supervision of the Central Bank of Ireland ('CBI') and in line with the requirements of the Companies Act 2014 converted to a designated activity company (DAC), limited by shares, effective 7 September 2016.

The Company is a wholly owned subsidiary of its parent company, Motorola Solutions, Inc, headquartered in Chicago, Illinois in the United States (thereafter 'the Group') and was set up to insure solely the risks of the group and is therefore considered to be a captive Insurer Company. The Company has not renewed any insurance policies since 2014.

The Group is listed on the NYSE and provides business and mission critical communication products and services for enterprise and government customers worldwide.

The position of the Company within the Group is set out below:

Details on other Group subsidiaries and related undertakings are published within the Group Annual Report and Financial Statements, 2020, which is available to download from [www.motorolasolutions.com](http://www.motorolasolutions.com).

The operation of the Company is subject to the local regulatory requirements in Ireland, within which it operates. Such regulations not only prescribe approval and monitoring of activities but also impose certain restrictive provisions, for example capital adequacy to minimise the risk of default and insolvency on the part of the Company to meet unforeseen liabilities as they arise.

TCS conducts all significant business activities from its business address and registered office, 3rd Floor, The Metropolitan Building, James Joyce Street, Dublin 1, Ireland.

The Company has received a licence from the Central Bank of Ireland (CBI) to write the following classes of business:

- 7 – Goods in Transit
- 8 – Fire and Natural Forces
- 9 – Other Damage to Property
- 13- General Liability
- 15- Suretyship
- 16 – Miscellaneous Financial Loss

## TCS Insurance Company of Ireland Designated Activity Company

The insurance supervision division at the CBI may be contacted at their offices in New Wapping Street, North Wall Quay, Dublin 1, Ireland.

The Company's independent auditor PricewaterhouseCoopers ('PwC') is located at North Wall Quay, Dublin 1.

The operation of the Company is subject to the local regulatory requirements in Ireland. Such regulations not only prescribe approval and monitoring of activities but also impose certain restrictive provisions, for example capital adequacy to minimise the risk of default and insolvency on the part of the Company to meet unforeseen liabilities as they arise.

TCS conducts all of its significant business activities from its offices in Ireland. As such the Company strives to ensure compliance with all relevant Irish laws and regulations.

There have been no significant events during the reporting period which have had a material impact on the Company.

With the current Insurance markets continuing to harden the company continues to monitor the situation and while the strategic review of the future of TCS is ongoing there is a possibility that in 2021 the Company could write insurance business.

### **A.2 Underwriting Performance**

The Company has not written any new insurance policies since the 2014 underwriting year.

Profit after tax for the financial year ended 31 December 2020 amounted to a loss of USD 78k (2019: Profit USD 27k), with a dividend of USD Nil paid to the parent during 2020 (2019: USD Nil).

Provision is made for notified losses on all underwriting years and the gross technical provisions are equal to the net technical provisions.

Total claims and claims expenses paid during the financial year ended 31 December 2020 totalled USD 9k (2019: USD 123k) and the movement in the provision for claims amounted to a reduction of USD 141k (2019: reduction of USD 273k). Total claims incurred are split by line of business on the following page:

Amounts are presented in United States Dollars (USD), which is the Company's functional currency:

<b>31-Dec-20</b>				
<b>Line of Business</b>	<b>Claims Paid</b>	<b>Claims Exps Paid</b>	<b>Movement in Claims Provision</b>	<b>Net Operating Expenses</b>
Property	0	0	(14,565)	12,350
General Liability	0	8,764	(126,006)	322,092
<b>Total</b>	<b>0</b>	<b>8,764</b>	<b>(140,571)</b>	<b>334,442</b>
<b>31-Dec-19</b>				
<b>Line of Business</b>	<b>Claims Paid</b>	<b>Claims Exps Paid</b>	<b>Movement in Claims Provisions</b>	<b>Net Operating Expenses</b>
Property	68,790	15,800	(150,481)	17,974
General Liability	28,592	9,906	(122,861)	312,131
<b>Total</b>	<b>97,382</b>	<b>25,706</b>	<b>(273,342)</b>	<b>330,105</b>

Net operating expenses for the year amounted to USD 334k (2019: USD 330k).

As the activities of the Company are predominately outsourced, the Company has no employees, other than the directors, who did not receive any remuneration during the year (2019: Nil).

### **A.3 Investment Performance**

The investment position of the Company is monitored by the Board of Directors and Motorola Solutions Inc. Treasury on a regular basis, to ensure the investment guidelines of the Company are adhered to.

The Company allocates its investment portfolio between cash and intercompany loans, as described below.

Cash and other Investments: The Company maintains funds for operational purposes with a preapproved financial institution and group relationship bank, being HSBC. Other Investments held with Citibank Trust NA is funds withheld to support the Reinsurance Trust Agreement. Other investments are deposits with ceding undertakings and are amounts withheld by ceding insurers in relation to the general liability and property program. The net investment income earned / (expense) for the reporting period on the HSBC account was USD 347.00 (2019: USD 162.00).

Intercompany Loan: Available funds are invested, as deemed prudent by the Board of Directors, in an intercompany loan with a wholly owned subsidiary of Motorola Solutions Inc. The interest income earned for the financial year ended 31 December 2019 amounted to USD 108,954 (2019: USD 208,737).

The Company has no investments in securitised asset classes and all investment income is recognised in the Company's income statement.

### **A.4 Performance of other activities**

TCS does not engage in any activities other than those associated with captive insurance and has not entered into any leasing agreements.

## **A.5 Other Information**

There are no other material items to report in this section.

## **B. SYSTEM OF GOVERNANCE**

### **B.1 General information on the System of Governance**

In order to meet the requirements for sound corporate governance, ensure efficient conduct of business and to protect the interests of the Company's stakeholders, the Company has a comprehensive Governance and Risk Management system in place.

The Board of Directors of the Company (hereafter 'the Board') acknowledges its responsibility to ensure that risks are fully understood and appropriately managed and has taken appropriate steps to ensure that risk management, reporting and control processes have been put in place in a manner which reflects the nature and scale of the captive's activities. The Board is the focal point of the governance system and is ultimately accountable and responsible for the performance and conduct of the Company.

All authority emanates from the Board and responsibilities are delegated in such a manner so as to ensure that no one individual has unfettered powers of decision and that business is undertaken in a controlled and responsible manner.

The overriding goal of the Company's risk management strategy is to control and to achieve, as much as possible, a reduction in the Company's risk exposure as a means of minimising the impact of undesired and/or unexpected events.

The Governance and Risk Management System of the Company may be described as relying on four cornerstones:

1. A Governance Framework aligned with the Company's strategic objectives, providing top level oversight by the Board, clear ownership and accountability for risks, as well as clear escalating and reporting channels.
2. A Risk Management System which details the Company's strategic objectives in documented Risk Policies. Limits and operational checkpoints as well as functional identification, mitigation and monitoring processes are documented for each risk.
3. A series of Internal Controls, defining the architecture of processes required to manage the Company in accordance with its Governance and risk management framework.
4. A Risk Register combining operational and risk management processes to deliver a descriptive analysis of material risks threatening at least one of the Company's global strategic objectives.

The Board annually reviews the governance framework, the risk appetite framework setting out tolerance limits and operational limits for all risk categories, the risk management policies for all risk categories and the risk register for the Company.

The Board members have:

- The necessary knowledge, skills, experience, expertise, competencies, professionalism, fitness, probity and integrity to carry out their duties;
- A full understanding of the nature of the Company's business, material activities and related risks;

- A full understanding of their individual direct and indirect responsibilities and collective responsibilities; and
- An understanding of the Company's financial statements and key performance drivers.

The Company comprises the following senior personnel who have been selected to ensure that the Company is being run by individuals of appropriate expertise and integrity and who meet the criteria set out above:

Tanya Vasylevska (Chairperson)  
Aidan Pyke  
Mary Roche  
John Grubnich (appointed 29 March 2021)

There have been no material changes in the system of governance since the prior reporting period. Given the limited scale and complexity of the Company, and having reviewed the risks facing the Company thoroughly, the Board is satisfied that the system of governance in place is adequate.

The Board undertake responsibility for performing the equivalent function of an Audit Committee in relation to the reporting period ended 31 December 2020.

### **Key Functions**

The key functions of Risk Management, Internal Audit, Actuarial, Compliance and Operations have clear and defined lines of reporting directly to the Board. This is facilitated by the straightforward nature of the Company's structure and fit-for-purpose documented policies and procedures which are clearly communicated and well understood by all relevant parties. The Board has ensured that the key functions are appropriately resourced and have the necessary authority and operational independence to perform their roles. The Company has engaged Aon Insurance Managers (Dublin) Limited ('AIMD') for the provision of management services, under the terms of an outsourced service and management agreement which is overseen by the Board of Directors.

### **Remuneration and material transactions**

The members of the Board of Directors receive no remuneration for their services as directors to the Company. TCS has no employees and consequently no remuneration is paid.

As a captive insurer, all TCS's inward premium flows, if any, and claims payments relate to insured risks of the shareholder group. In addition, the Company has advanced an Intergroup loan to a fellow Group subsidiary. Other than these transactions which arise in the normal course of business, the Company had no material transactions during the reporting period with members of the shareholder group and none with members of the Board of Directors.

## **B.2 Fit & Proper requirements**

TCS has documented its Fitness & Probity policy setting out the Company's approach to the selection and assessment of the persons who effectively run the Company or are responsible for other key functions.

In selecting individuals as directors or function holders, the Company takes account of the following factors:

- specific requirements of the role
- the skills, experience and relevant qualifications of the proposed individual
- results of due diligence enquiries
- conflicts of interest
- time requirements and other commitments
- competence and integrity
- financial soundness

Consideration is given to ensuring an appropriate mix of knowledge, skills and experience across the Board of Directors and for those roles where specialist skills are required e.g. Head of Actuarial Function, only those individuals possessing the pertinent qualifications and expertise will be considered.

For those roles which are prescribed by the CBI as Controlled Functions (CFs) and Pre-approval Controlled Functions (PCFs), the Compliance function adopts appropriate control and due diligence processes in the selection and vetting of such individuals to ensure that they meet the regulator's fit and proper criteria. Written approval from the CBI is obtained prior to the appointment of PCFs. Appointed individuals are required to maintain on-going compliance with the Standards of Fitness & Probity and the guidance issued by the CBI.

TCS is satisfied that appointed individuals performing controlled functions meet all relevant regulatory requirements and have a suitable level of training and qualification in order to enable them to carry out their respective duties.

### **B.3. Risk Management System including the own risk and solvency assessment**

The Company has taken appropriate actions in order to:

- embed risk management as a key function within its governance structure; and
- develop and maintain effective processes and reporting procedures to identify, measure, monitor, manage and report, on a continuous basis, the risks to which the Company is exposed.

Risk refers to the effect of uncertainty on the Company's ability to meet its objectives. Risk management is a systematic approach to protect the business resources and income against losses and unexpected events so that objectives of the Company can be achieved without unnecessary disruption.

The Company's Risk Management System:

- sets out the level of risk acceptable by the Company (Risk Appetite and risk tolerance);
- identifies the risks which represent a threat to the achievement of its strategic objectives;
- identifies, defines and regularly measures key risk indicators enabling an efficient monitoring of risks;
- defines the appropriate actions to reduce the Company's risk exposure;
- ensures the risk management framework is implemented in day-to-day business processes; and
- regularly reviews controls and mitigation actions to ensure that they remain relevant and effective.

In order to achieve these objectives, the Risk Management System of the Company has been clearly documented and specified through specific risk management policies for each key risk category. The key risk categories for which the Company has set up specific control and monitoring mechanisms are:

- Underwriting/Reserving
- Asset Liability Management ("ALM")
- Investment
- Liquidity and concentration
- Operational
- Reinsurance and other risk mitigation techniques
- Strategic Risk

In addition to these policies, an outsourcing policy defining the key rules and criteria to be followed by each service provider has been determined.

### **Own Risk and Solvency Assessment**

The Company performs an Own Risk and Solvency Assessment ('ORSA') process annually in order to provide its Board of Directors with a forward-looking risk and capital assessment. The adequacy of the available capital, the Risk Appetite Framework and the appropriateness of the risk limits is assessed for the business planning period, considering the evolving risk profile. To this end, risks and scenarios to which the Company is exposed during the business planning period and which may affect the capacity to meet its insurance obligations or pose a threat to the achievement of its business objectives are taken into account. The approach may be summarised as follows:

#### *Define the Stress scenarios*

Stress testing and scenario analysis are used to assess whether the available and future capital is sufficient in expected and stressed situations.

Business projections, stresses and scenarios are compiled by the Operations Functions with input and agreement from the Board of Directors to ensure that these are appropriate for the Company.

#### *Stress the Financial Plan*

Stress test scenarios are embedded into the projected financial plan. Related solvency capital requirements and solvency ratios are then calculated for each year, resulting in a stressed financial plan and the solvency impact of adverse scenarios. This exercise is conducted by the Actuarial Function and validated by the Risk Management Function.

#### *Assess prospective solvency needs on the basis of the Stressed Financial Plan*

The Risk Management Function identifies potential additional mitigation actions to reduce the potential impact of the stress scenarios. Where applicable, any future additional capital needs will be identified and aligned to the Company's capital management plan i.e. defining the measures to restore the Company's solvency margin should the assumed scenarios occur.

*Produce the ORSA Report*

The ORSA report brings clarity over projected risk assessments and solvency needs to 3 different stakeholders:

Stakeholder	Expectation	ORSA Report
Board of Directors	Matching between risks to which the Company is or can be exposed and the Risk Appetite framework.	Provides a clear and prospective understanding of critical risk exposures and their relationship with Risk Appetite boundaries.
Shareholders	Detailed and prospective understanding about the risk of bankruptcy and potential need for future additional capital.	Provides a plan for capital needs on the time horizon of the financial planning.
Supervisory Authority	Detailed and prospective understanding of potential ORSA deviations compared to the Solvency Capital Requirements.	Gather information about: projected Solvency ratios; - explanations about deviations due to specific critical risks exposures.

The ORSA process described above ensures that ORSA is integrated in the decision-making and business planning process. Furthermore, monitoring procedures as set out in the risk management policies ensure that risk exposures are measured on a regular basis triggering exception reports for the Board.

In line with CBI requirements, the Head of Actuarial Function provides an actuarial opinion to the Board of Directors in respect of the ORSA once the results of the ORSA process are presented to the Board for review and challenge

The capital risk appetite for TCS is to sustain its capital at a level sufficient to meet the Regulatory Solvency Capital Requirement at all times.

Motorola Solution, Inc would always seek to be in a position to take prompt corrective action to replenish capital to an appropriate level in The Company so that SCR compliance can be demonstrated. Motorola Solution, Inc is expected to continue to have ample capacity to provide this support to the TCS.

**B.4 Internal Control System**

The Internal Control System embedded in the Company's operations is a mix of processes undertaken by all stakeholders within the Company to provide reasonable assurance that the strategic objectives will be achieved.

In order to achieve the aforementioned objectives, the Internal Control framework of the Company is structured around five complementary components.

Component	Contents
1) Control environment	A strong "risk and control" culture is embedded within the Company's operations through the continuous oversight of the Board of Directors and the communication to all internal stakeholders of all governance and risk principles through the present manual.
2) Risk assessment	Procedures and policies are detailed and formalized in order to disclose the way of identifying, managing, controlling, mitigating and reporting issues relating to each risk category.
3) Reporting channels	Clear and structured reporting processes are in place enabling the Board of Directors to have access to relevant, complete, reliable, correct and timely communication related to internal as well as external events.
4) Monitoring process	The appropriate escalation of significant issues to the Board of Directors, the ongoing involvement of all internal stakeholders as well as the Internal Audit process enables the Company to continuously monitor and adapt when necessary its Internal Control System.
5) Control activities	The Company has developed a comprehensive set of preventive, detective or corrective control actions embedded in its daily operations.

### Detailed Processes and Embedded Control Activities

In order to set out how the Internal Control System is implemented the Company's processes and related control activities are documented, monitored and reviewed on a regular basis.

These items are designed by the Risk Management Function, approved by the Board of Directors and evaluated by the Internal Audit Function. They are reviewed as often as necessary but at least annually

Tasks and actions are shared between the key functions of the Company and clarify related roles, responsibilities and embedded control activities.

### Compliance Function

The Compliance Function is an integral component of the Company's governance system. The Company has outsourced its Compliance Function to its Insurance Managers. The Insurance Managers have appointed a Head of Compliance who is responsible for overseeing all compliance activities and ensuring the Compliance Function of the Company is adequately resourced. The Compliance Function reports directly to the Board of Directors.

The responsibilities of the Compliance Function include:

- utilisation of compliance management practices that contribute to the use of sound, responsible and sustainable business practices by the Company;
- presentation of an annual compliance plan to the Board of Directors, outlining specific areas which it will focus on during a particular year;
- promotion of a culture of compliance within the organisation;
- maintenance of a comprehensive compliance risk management control and reporting system in conjunction with the Risk Management Function to assist in managing the compliance risk faced by the Company;

- consideration of possible future changes in the legal environment and their potential effect on the Company as well as providing regular compliance and regulatory updates to the Board of Directors;
- identification and communication throughout the Company the laws, regulations and codes of conduct to which the Company is subject and assisting to embed compliance with these in the way the Company does business; and
- investigation and follow up of compliance breaches, ensuring timely reporting to the Board and in certain circumstances to outside bodies such as the CBI.

## **B.5 Internal Audit Function**

### **Purpose & Objectives**

The purpose of the Internal Audit Function is to serve as an independent Function that objectively evaluates and recommends improvements to the Company's Internal Control System by facilitating an objective and independent assessment.

It assists the Company achieve its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of the risk management, control, and governance processes employed by the Company. The audit approach is risk based and in line with an annual audit plan which is provided by the Head of Internal Audit to the Board of Directors.

The Board has developed effective policies and practices and will take appropriate corrective action in response to weaknesses identified by internal and external auditors.

### **Independence and Impartiality**

The Company's Internal Audit Function is independent of the operational activities audited and the Board of Directors.

The Internal Audit Function is free to report its findings and appraisals and to disclose them to the Board as required. This principle of independence ensures that the Internal Audit Function reports directly to the Board of the Company.

## **B.6 Actuarial Function**

The Company has established an effective Actuarial Function, including a nominated Head of Actuarial Function ('HoAF') approved by the CBI, which carries out the following key tasks:

- coordinate the calculation of technical provisions;
- identify any inconsistency with the requirements set out in Articles 76 to 85 of the Solvency II Directive for the calculation of technical provisions and propose corrections as appropriate;
- explain any material effects of changes of data, methodologies or assumptions between valuation dates on the amount of technical provisions;
- assess the consistency of the internal and external data used in the calculation of technical provisions against the data quality standards as set out in Article 82 of the Solvency II Directive. Where relevant, the Actuarial Function will provide recommendations on internal

procedures to improve data quality;

- take into consideration the interrelations between the Underwriting Policy, reinsurance arrangements and technical provisions, when providing its opinion;
- report in writing at least annually to the Board of Directors. The reporting should document all material tasks that have been undertaken by the Actuarial Function, and include:
  - i. details of the technical provisions
  - ii. methodologies & assumptions
  - iii. data sufficiency & quality
  - iv. experience analysis
  - v. report to the Board on reliability & adequacy
  - vi. opinion on Underwriting Policy
  - vii. opinion on reinsurance arrangements.

Their report should include any deficiencies identified and give recommendations as to how such deficiencies could be remedied

- contribute to the effective implementation of the risk management system in particular:
  - i. with regard to risk modelling underlying the calculation of the Solvency and Minimum Capital Requirement; and
  - ii. the ORSA process.
- think critically and organise the execution of actuarial approaches
- provide an Actuarial Opinion to the Board of Directors in respect of the ORSA

In establishing the Company's Actuarial Function, the Board of Directors has ensured that the persons involved have the requisite qualifications and demonstrable experience in the area of non-life reserving and are fully conversant with the Solvency II requirements for the calculation of Technical Provisions.

## **B.7 Outsourcing**

The objectives of TCS's Outsourcing Policy are to ensure that the outsourcing of critical or important operational functions or activities does not lead to:

- Reduction in the Board's responsibility for, or influence over, key functions of the Company;
- Material impairment of the quality of the Company's System of Governance;
- Any impairment of the Company's ability to meet its regulatory requirements;
- Non-adherence to the Company's approved policies and procedures;
- Undue increases in operational risk or cost;
- Material impairment of the Company's ability to fulfil its obligations to stakeholders;
- Conflicts of Interest;
- Breach of the Company's data protection obligations

All functions and activities of the Company are eligible to be outsourced provided that each of the criteria detailed above are satisfied in each instance. Sub-outsourcing is allowable only in exceptional circumstances, on the condition that the sub-outsourced service provider satisfies the above criteria and subject to approval from the Board.

The Board is responsible for the approval of and termination of all outsourcing arrangements of critical or important functions or activities. Critical or important functions or activities include key functions relating to the Company’s System of Governance and all functions within the Company that are fundamental to carry out its core business.

The Board is responsible for ensuring notification to the CBI is made in a timely manner prior to the outsourcing of critical or important functions or activities, and thereafter where there have been material developments in relation to the service provider.

The Board is responsible for assessing the risks associated with the outsourcing of critical or important functions or activities, carrying out the appropriate due diligence on the outsourced service provider and for reviewing the performance of outsourced service providers against their agreed and documented Service Level Agreements (‘SLA’).

The management of the Company is coordinated and carried out at its place of business in Ireland. TCS engages outsourced service providers in order to access the expertise and strength and depth of resources necessary to manage the specific requirements of a regulated captive insurance company.

The following critical or important functions / activities are outsourced:

Critical or important function	Outsourced Service Provider	Jurisdiction
Underwriting administration	Aon Insurance Managers (Dublin) Limited (AIMD)	Ireland
Finance and accounting	AIMD	Ireland
Compliance Function	AIMD	Ireland
Risk Management Function	AIMD	Ireland
Actuarial reserving	Barnett Waddingham	United Kingdom
Actuarial Function	Barnett Waddingham	United Kingdom
Internal Audit Function	Aon Commercial Services Ireland Limited	Ireland

## B.8 Any Other Information

The Board is satisfied, based on its assessment of the frameworks which have been established and are in use, that the Company’s system of governance is appropriate and adequate for the nature, scale and complexity of the risks inherent in its business operations.

There are no other material items to report in this section.

## **C. RISK PROFILE**

The Risk Appetite Framework adopted by the Board sets out the level of risk that the Company is prepared to accept in the pursuit of its strategic objectives. It sets out:

- the Company's overall philosophy to risk taking and the expectations of shareholders;
- the Company's tolerance to loss of capital, profit volatility and other specified measures; and
- the risk limits that are acceptable in terms of exposures to different types of risk.

The Company's Risk Register combines operational and risk management processes to deliver a descriptive analysis of material risks threatening at least one of the Company's strategic objectives.

The Board's annual ORSA process is based on the company's current and expected risk profile over the business planning period and supports the Board in achieving its strategic objectives by taking a structured and combined approach of strategy, risk management and capital management.

### **C.1 Underwriting Risk**

The Company has not written any business since the expiry of the Fire and other damage to Property Insurance programme and the General Liability programme in December 2014. The Company seeks to ensure that it has sufficient assets to meet the costs of potential claims over time, but the uncertainty surrounding the severity and frequency of claims can lead to variation in the Company's performance over the short term. Whilst considerable judgment is involved, the Directors ensure that suitable processes are in place to ensure the reliability, sufficiency and adequacy of the statistical and accounting data to be considered on the loss reserving exercises.

As the Company is a captive insurer, it is effectively insured the risks of one customer, its parent group, and thus is exposed to risk concentration. However, diversification is achieved through the varying geographical locations of the underlying risks.

The principal assumptions underlying the Company's estimation of liabilities is that the Company's future claims development will follow a similar pattern to past claims development experience.

The Company manages these risks through arranging for an external qualified actuary to review reserve adequacy of the Company on an annual basis. The Company also monitors emerging issues and factors in their potential impact on the Company's claims reserving.

The Company takes all reasonable steps to ensure that it has appropriate information regarding its underwriting exposures. Annual support and certification is provided by the Company's Actuarial Function.

As part of the ORSA submissions, the Board of Directors have always included a stress test scenario incorporating differing claims experience. As tested for the year ended 31 December 2020 ORSA submission, the impact of an increase in the General Liability (GL) reserves by 100% based on the 2019 reserves figures was carried out. While this scenario resulted in a slight reduction in the Company's available capital, the regulatory solvency requirements were still achieved.

Sensitivity analysis is also performed for underwriting risks by selecting conservative movements of gross and net claims reserves for financial statements purposes and holding all other assumptions constant.

31 December 2020 Value in USD	Impact on Total Gross and Net Claims	Impact on PBT for the year	Impact on Equity for the year
Increase in Loss Reserves by 10%	39,443	39,443	34,513
Decrease in Loss Reserves by 10%	(39,443)	(39,443)	(34,513)

31 December 2019 Value in USD	Impact on Total Gross and Net Claims	Impact on PBT for the year	Impact on Equity for the year
Increase in Loss Reserves by 10%	53,500	53,500	46,813
Decrease in Loss Reserves by 10%	(53,500)	(53,500)	(46,813)

## C.2 Market Risk

The risk of future changes in market prices, which would result in devaluation of investable assets, may result from several factors, including, but not limited to, value, liquidity, duration, composition, interest rates, foreign exchange rates and market fluctuations. The Company diversifies its portfolio to reduce the exposure to market fluctuations and market risk concentrations.

TCS has an investment strategy in place in line with its Risk Appetite Framework and the related 'Prudent Person' regulatory requirements. The Company endeavours to:

- prudently invest with consideration of the prevailing financial market environment;
- ensure the Company invests appropriately so as not to result in the Company failing to meet its Solvency Capital Requirements;
- ensure that the Company holds assets of sufficient value and liquidity to meet all liabilities as they become due;
- maximise investment return within the levels of risk as defined by the Company's Risk Appetite;
- ensure compliance with the Liquidity Strategy and Policy;
- ensure compliance with the Asset-Liability Management Strategy and Policy; and
- ensure effective risk management of investments at all times, with due consideration of the risks associated with investments and procedures to monitor, manage and report these risks in a timely manner as part of the Company's overall Risk Management System.

There were no material changes to the measures used to assess the market risk exposure or the material risks over the reporting period.

Given the short-term cash nature of the assets and the Intercompany Loan, the impact of interest rate risk is limited. The exposure is kept under review. An increase of 50 basis points in interest rates would have increased profit for the financial year by USD 37,124 (2019: USD 37,697). The Company did not have any interest-bearing bank accounts during 2020.

Value in USD	2020	2019
Increase by 5 basis points	37,124	37,697
Decrease by 5 basis points	(37,124)	(37,697)

The Company is exposed to currency risk to the extent its assets and liabilities are denominated in a currency different from its functional currency. The Company's principal transactions are carried out in US dollar and its exposure to foreign exchange risk arises primarily with respect to euro. The business financial assets are primarily denominated in the same currencies as its insurance liabilities, which mitigate the foreign currency exchange rate risk. Due to the limited exposure to currency risk, the Company considers that it is unnecessary to attempt to mitigate foreign exchange rate fluctuations.

There were no material changes to the measures used to assess the market risk exposure or the material risks over the reporting period.

### **C.3 Credit Risk**

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The assets that are exposed to credit risk are:

- Cash and cash equivalents;
- Deposits by ceding undertakings;
- Board approved Intercompany loan with Motorola Solutions Finance. EMEA Ltd.

The Company utilises custodians deemed to be of high credit quality to hold its cash and cash equivalents and deposits with credit institutions, and additionally has limits in place in relation to the amount of cash which can be held by any one financial institution.

Investments and deposits are managed under the Investment strategy (market risk).

There were no material changes to the measures used to assess the credit risk exposure or the material risks over the reporting period.

### **C.4 Liquidity Risk**

The Company is exposed if proceeds from financial assets are not sufficient to fund obligations arising from its insurance contracts. The Company can be exposed to daily calls on its available investment assets, principally from insurance claims. Liquidity risk is the risk that cash may not be available to pay obligations when they are due without incurring material costs or penalties.

The Company has determined that liquidity risk does not represent a significant exposure to its business. This assessment is based on the fact that the Company has its investments held in highly liquid assets which it can access immediately or within a very short time frame without incurring material costs or penalties.

There were no material changes to the measures used to assess the liquidity risk exposure or the material risks over the reporting period.

## **C.5 Operational Risk**

Operational risk is the risk of loss arising from system failure, human error, fraud, or external events. When controls fail to perform, operational risk can cause damage to reputation, have legal or regulatory implications, or can lead to financial loss.

Operational risk is managed by a strong governance structure being put in place, which includes the extensive oversight by the shareholder, the Board of Directors and the Heads of Functions.

The Company has a rigorous control framework and monitoring process in place to manage operational risk. Controls include effective segregation of duties, access controls, authorisation and reconciliation procedures. Outsourced activities are monitored and managed in the same manner in line with the Outsourcing policy.

In addition, TCS is subject to Internal and External Audit review.

TCS maintains a regulatory dialogue with the CBI to mitigate the risk of any potential sanction or compliance breach as well as using expert, industry leading, service providers to provide its outsourced functions which helps avoid any material error or delay. In order to ensure the quality of the outsourced functions is as high as possible, TCS has put in place service level agreements and regularly reviews the outsourced service providers.

The Company does not consider that it is exposed to material residual risk in this area due to the formality that has been created around the Company's processes and procedures including those for financial and regulatory reporting. There is no specific risk concentration associated with this category as internal controls include appropriate segregation of duties.

There were no material changes to the measures used to assess the operational risk exposure or the material risks over the reporting period.

## **C.6 Other Material Risk**

### **Strategic Risk**

Strategic risk is the risk of loss arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes i.e. the risk associated with implementing the wrong strategy or failing to correctly implement the chosen strategy.

The control and monitoring actions/principles underlying the strategic Risk Management of the Company are:

- Review at least annually the appropriateness of the high level overall objectives for the Company; the major risks facing the Company; the Risk Appetite for each of these major risks identified. The Board of Directors will ensure continuing appropriateness, at least annually and revisions shall be affected where necessary.
- Ensure all plans are regularly reviewed to ensure that Risk Tolerances are not exceeded individually or in total.

### **Sensitivity Risk**

The Actuarial Function assesses annually the sensitivity of its estimate of the Company's unpaid claim liabilities of varying the key assumptions underlying its analysis. Given the nature of the Company's exposures, the key assumptions underlying the actuarial analysis are subject to a range of reasonable interpretations.

No other material risks have been identified.

There are no other material items to report in this section.

### **C.7 Any Other Information**

The Board are actively monitoring developments as a result of the Coronavirus/Covid-19 situation, and its potential impact on the risk profile of the Company. Based on the current assessment of the risks posed at the time of approving this Report, there are no identified issues with the ability to maintain appropriate capitalisation levels in line with solvency needs. The Company cannot predict the Coronavirus's potential future direct or indirect effects and, therefore, it is not possible to quantify any future potential material negative impact at this point in time.

## D. VALUATION FOR SOLVENCY PURPOSES

### D.1 Assets

TCS prepares its financial statements in accordance with Financial Reporting Standards (“FRS”) 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and FRS 103 Insurance contracts, being applicable UK and Irish GAAP accounting standards, and in accordance with the Companies Act 2014 and the European Union (Insurance Undertakings: Financial Statements) Regulations 2015.

TCS uses the historical cost convention.

TCS has 4 classes of assets:

- Cash and cash equivalents
- Intercompany loan
- Deposits other than cash equivalents
- Other debtors

Cash and cash equivalents are current accounts with daily liquidity. The Company utilises custodians deemed to be of high credit quality to hold its cash. Carrying amounts approximate fair value due to the high liquidity of the instruments.

The Intercompany loan to Motorola Solutions Finance. EMEA Ltd a subsidiary of Motorola Solution, Inc. registered in the US, and is included in the balance sheet at carrying value with accrued interest included in both the financial statements and the solvency II Quantitative Reporting Template (QRTs).

Deposits other than cash equivalents represents restricted cash held in Citibank Trust NA to support the Reinsurance trust agreement are stated at the carrying value for both regulatory and financial statements purposes.

Other debtors are deposits with ceding undertakings that are held in escrow and are stated in the balance sheet at carrying value.

A reconciliation of the valuation for Solvency II purposes is as follows:

Assets Value in USD	Financial Statements	Solvency II	Reclass.	Fair Value Adj.
Cash and cash equivalents	283,259	283,259	-	-
Investments – Intercompany Loan	7,424,747	7,424,747	-	-
Deposits other than cash equivalents	1,196,748	1,196,748	-	-
Other Debtors	33,000	33,000	-	-
<b>Total</b>	<b>8,937,754</b>	<b>8,937,754</b>	-	-

## D.2 Technical Provisions

Provision is made for notified losses on all underwriting years. The Company has regard to the gross and net loss positions as indicated by the claim circumstances reported to date and loss projections carried out under the direction of the Head of Actuarial Function using actuarial techniques.

Reserves are based upon management's best estimate of the ultimate liabilities and are determined with the assistance of, and based on, the results of the analysis performed by the Actuarial Function. The reserves include estimates for both case reserves and losses incurred but not reported ('IBNR').

The technical provisions relate to the Fire and other property damage (Property) & Third-Party Liability (Liability) lines of business and amounts at 31 December 2020, gross and net are set out below in USD:

Line of business Value in USD	Claims Provisions - Financial Statements	Gross Best Estimate Liability	Risk Margin	Gross Technical Provisions - SII
Liability	381,556	281,793	9,977	291,770
Property	12,876	10,707	379	11,087
<b>Total</b>	<b>394,433</b>	<b>292,501</b>	<b>10,356</b>	<b>302,857</b>

The decrease in the technical provisions from the financial statements amount of USD 394,434 to the SII gross technical provisions relates to the removal of the margin of uncertainty included in the IBNR provision in the financial statements while also including a provision of events not in data, ULAE and expenses, allowance for discounting and the calculated risk margin. The technical provisions do not include any outwards reinsurance business therefore the gross technical provisions are equal to the net technical provisions.

These amounts comply in all material respects with the relevant Solvency II requirements.

The starting point for the calculation of the Solvency II technical provisions is the amounts which have been calculated for the financial statements reserving basis. Within the financial statements, full provision is made for the estimated cost of all claims notified but not settled at the period-end using the best information available at that time. Provision is made for the cost of claims incurred but not reported and at the period-end, and potential development on outstanding claims estimates (together regarded as IBNR reserves). In addition, an estimate is made for future claims handling expenses relating to claims outstanding at the period-end.

Provisions are calculated gross. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. In estimating the cost of claims notified but not paid, the Company has regard to claims circumstances as reported, any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. IBNR provisions are established having regard for the results of a valuation on a best-estimate basis by an independent actuary together with a margin for uncertainty which has been determined by management.

Claims projections have been carried out using Chain Ladder method (CL) and the Bornhuetter-Ferguson method (BF) method. The CL method involves analysis of historic losses to obtain development factors. BF method combines the CL ultimate loss estimates, with a second independent estimate known as the prior estimate. BF method is more suitable for recent years where there has been little claims development to date, and estimates produced by the CL method may be unreliable. The CL method has been used to estimate reserves for the earlier, more fully developed underwriting years.

Solvency II requires undertakings to hold technical provisions which correspond to the amount they would have to pay to transfer their (re)insurance obligations immediately to another undertaking. This value comprises a **best estimate** and a **risk margin**, intended to represent a market consistent valuation. The technical provisions take account of the time value of money by discounting using a risk-free interest rate term structure as at the valuation date. There is no allowance for prudence in the calculation of best estimates.

The best estimate is calculated by considering all future cash inflows and outflows required to settle the existing (re)insurance obligations over their lifetime. It represents the mean outcome of all possible scenarios, taking account of how likely they are to occur and their potential variability. In this regard, the best estimate is a probability-weighted average of future cash flows, allowing for the time value of money.

The Solvency II best estimate is calculated gross. The best estimate is made up of a claims provision and a premium provision, relating to past and future exposures respectively. There are no unexpired risks hence there is no need to estimate premium provision for TCS. Claims payments in the claim provision have been projected at annual intervals using annual paid development patterns. The Company has a relatively high level of retention and no recoveries are projected because the claim amounts are well below this retention. As there is no projection for any reinsurance recoveries, an allowance for reinsurer default is not applicable.

The Solvency II claims provision is equivalent to the expected net present value of the best estimate claims reserve, with additional allowances to allow for all possible outcomes through the inclusion of provisions for Events Not in Data (ENID) and the future expenses that will be incurred in servicing the existing reinsurance obligations. The claims provision also includes all unpaid premium relating to earned exposures that are within payment terms.

Estimates are “best estimates” in the sense that they are intended to be a probability-weighted average of all possible outcomes. TCS has employed techniques and assumptions that are appropriate for the purpose of calculating its Solvency II technical provisions. The actual amounts required to meet future claim payments may differ from estimates for a number of reasons, such as model specification error, parameter error and random error due to the inherent uncertainty in insurance. External environment risk factors may cause material deviations in estimates of technical provisions, including persistent negative interest rates, inflation and currency exchange rate fluctuations.

The Solvency II risk margin is intended to represent an amount that TCS would be required to pay, in excess of the best estimate of the liabilities, for a third party to assume the risk of running off the existing liabilities. The actuarial calculation of the risk margin is consistent with the Solvency II regulations, applying a 6% cost of capital to the amount of capital required at the beginning of each year to support the run-off of the insurance obligations. These future costs of capital are then

discounted to the valuation date and summed to calculate the amount of risk margin required. For the Company the risk margin has been calculated as USD10k.

The Solvency II regulations require firms to split contracts into “homogenous risk groups”, that is, into groups of policies that share risk characteristics, when assessing Solvency II technical provisions. The Solvency II regulations impose a secondary requirement that the split must be at least as granular as the Solvency II “line of business”.

The following table shows the mappings from TCS’s lines of business to Solvency II lines of business.

TCS Reserving Class	Solvency II lines of business
Liability	Third-party liability
Property	Fire and other property damage

The reconciliation between the value of technical provisions for solvency purposes and the financial statements at 31 December 2020 is shown below:

Value in USD	Gross	Net
<b>Claims provisions on financial statements basis</b>	<b>394,433</b>	<b>394,433</b>
Removal of margin	(100,745)	(100,745)
Solvency II Expenses	7,117	7,117
Provision for Events Not In Data & ULAE	90,000	90,000
Allowance for Discounting	696	696
<b>Solvency II claims provisions (ex. Risk Margin)</b>	<b>292,501</b>	<b>292,501</b>
Risk Margin	10,356	10,356
<b>Solvency II claims provisions</b>	<b>302,857</b>	<b>302,857</b>

As the Company is in run-off and have no unexpired risks, there is no need to estimate premium provisions. Information on how the Company manages risk in the area of underwriting and reserving is set out in Section C1. Operational risks relating to the Company’s technical provisions and claims data are managed using the Control Framework described in Section B.4.

The Company is satisfied that it has access to sufficient historical claims data on an annual basis for the calculation of its technical provisions and that this data is accurate and appropriate for the Company’s needs. Claims management processes by the Company are appropriate and adequate given the nature of the underlying risks. Significant reporting delays are not experienced.

In calculating its technical provisions on a Solvency II basis, TCS has not applied any of the following items:

- matching adjustment referred to in Article 77b of Directive 2009/138/EC;
- volatility adjustment referred to in Article 77d of Directive 2009/138/EC;
- transitional risk-free interest rate-term structure referred to Article 308c of Directive 2009/138/EC; and
- transitional deduction referred to in Article 308d of Directive 2009/138/EC.

### **D.3 Other Liabilities**

Other liabilities are classified into USD 132,738 of Payables (any other liabilities, not elsewhere shown) which relates to accrued expenses. There is no deferred tax liability in the financial statements or solvency II balance sheet as the Company is not writing any new business and future profits are not likely to be sufficient to offset losses in a reasonable timescale.

### **D.4 Alternative Methods of Valuation**

No alternative methods were used.

### **D.5 Any Other Information**

Having considered all areas and that no major threats have yet been identified, The Board of Directors have no reason to believe that a material uncertainty exists that may cast significant doubt about the ability of the Company to continue as a going concern. The Board of Directors are satisfied that the Company has adequate and appropriate capital to support the Company business plans.

There is no other information to report.

## E. CAPITAL MANAGEMENT

### E.1 Own Funds

The Company has put in place a Capital Management policy to ensure that ‘Own Fund’ items, both at issue and subsequently, meet the requirements of the Solvency II capital regime. The objectives of the policy are to ensure that on an on-going basis the Company has:

- own fund items available to meet its capital requirements; and
- Developed processes to ensure the appropriateness of its own fund items.

On an annual basis the Company reviews the level, composition and classification of own fund items to ensure they continue to meet its own solvency needs, and its regulatory obligations in respect of Solvency Capital Requirement (SCR) and Minimum Capital Requirement (MCR). A 3 year forward looking time horizon is used for business planning purposes and any anticipated changes to the Company’s business and risk profile are factored into the ORSA process to assess the solvency and capital needs over this business planning period. It is intended that the Company’s capital needs will be managed out of its existing pool of own funds and the efficient management of the Company’s reinsurance business. Should additional funds be required outside of that, they will be advanced by the shareholder. There have been no material changes to this approach from the prior year

The Company’s own funds consist of the following items:

- Issued Share Capital
- Retained Earnings

Any change to the share capital requires the approval of the Shareholder and the Board. Retained earnings are adjusted quarterly to take account of the profits/losses earned in the period together with any Solvency II valuation adjustments.

The payment of dividends is considered on an annual basis by the Board as part of its medium-term capital assessment. Potential dividends will be considered as part of the Company’s ORSA process to ensure that the Company will continue to meet its solvency needs over the business planning period. No dividends were paid in 2020 or 2019.

Any other qualifying own fund item requires the review and approval of the Board. In such instances, the Board must ensure that the terms and conditions of any own fund item are clear and unambiguous in relation to the capital classification.

Own fund items at the end of reporting period and the prior year comparative period are as follows:

Value in USD	2020	2019
Ordinary paid up share capital	5,000,000	5,000,000
Reconciliation reserve	3,502,159	3,589,445
Total Tier 1 capital	8,502,159	8,589,445

The reconciliation reserve represents the Company’s retained profits as adjusted for Solvency II valuation principals. The adjustments which arise in the application of these principles are shown in the equity reconciliation below.

At the end of the current reporting period eligible own funds available to meet the Company's SCR and MCR is USD 8,502,159, comprised solely of Tier 1 capital.

The equity position as shown in the Company's 2020 period-end financial statements can be reconciled to the basic own funds balance under Solvency II as follows:

Value in USD	2020
Equity per the Company's financial statements	<b>8,410,582</b>
Adjustments to technical provisions	91,577
Own funds (excess of assets over liabilities for solvency purposes)	<b>8,502,159</b>

Adjustments are made to technical provisions in line with the valuation methodologies set out in section D.2 above. These adjustments are reflected in the Company's reconciliation reserve.

TCS has no ancillary own funds and there are no transitional arrangements impacting its capital calculations.

## **E.2 Solvency capital requirement and minimum capital requirement**

At the end of the current reporting period, TCS' SCR and MCR have been calculated as USD 2,023,593 and USD 4,540,270 respectively (2019: USD2,069,050 and USD 4,156,580).

The SCR is intended to correspond to the capital the Company needs to hold in order to limit the probability of ruin, in the following 12 months, to 0.5%, i.e. ruin would occur less than once in every 200 years. The SCR calculated at the end of the current reporting period, relates to the capital required to support the business over the prospective 12 months; covering existing liabilities at the end of the period. Based on the Company's eligible own funds of USD 8,502,159, the Company has a solvency ratio at 31 December 2020 of 187% (own funds over MCR).

The SCR has been calculated using the standard formula and without the application of any undertaking specific parameters. In the non-life risk module, the risk margin on technical provisions has been calculated using the second simplification provided in EIOPA's technical specifications. This is considered appropriate given the nature of the Company's business as a captive non-life insurer.

The split of SCR by risk modules is shown below, together with the prior year comparative is outlined on the following page:

Risk Charge Value in USD	31 Dec 2020	31 Dec 2019	Variation
<b>Market Risk</b>	<b>1,991,833</b>	<b>2,023,531</b>	<b>(31,698)</b>
<i>Interest</i>	15	2,527	(2,512)
<i>Equity</i>	-	-	
<i>Property</i>	-	-	
<i>Spread</i>	202,373	205,238	(2,865)
<i>Currency</i>	53,452	76,122	(22,670)
<i>Concentration</i>	1,979,438	2,009,559	(30,121)
<i>Diversification</i>	(243,445)	(269,915)	26,470
Health Risk	-	-	
Counterparty Risk	8,139	9,721	(1,582)
Life Underwriting Risk	-	-	
Non-life Underwriting Risk	77,588	109,862	(32,274)
Intangible Asset	-	-	
Diversification	(62,742)	(86,685)	23,943
<b>BSCR</b>	<b>2,014,818</b>	<b>2,056,429</b>	<b>(41,611)</b>
Adj	-	-	
Operational Risk	8,775	12,621	(3,846)
<b>Solvency Position</b>			
<b>SCR</b>	<b>2,023,593</b>	<b>2,069,050</b>	<b>(45,457)</b>
Total eligible own funds to meet the SCR	8,502,159	8,589,445	(87,286)
Surplus	6,478,566	6,520,395	(41,829)
OF/SCR	420%	415%	5%
<b>MCR</b>	<b>4,540,270</b>	<b>4,156,580</b>	<b>383,690</b>
Total eligible own funds to meet the MCR	8,502,159	8,589,445	(87,286)
Surplus	3,961,889	4,432,865	(470,976)
OF/MCR	187%	207%	(20%)

The slight movement on the SCR from the prior year is mainly driven by the decrease in the market risk, especially concentration risk decreased from USD 2.01m to USD 1.98m due to decrease in the intercompany loan.

The MCR is calculated through a prescribed formula based on the net technical provisions (excluding the risk margin) and net written premium. It is also constrained to be between 25% and 45% of the SCR. Further to this, SI 485 sets out absolute minimum MCR values for non-life and life insurers,

reinsurers and captives. In the case of TCS, as a non-life captive insurer writing liability business, this absolute floor is €3,700,000. Having carried out the calculations and applied the relevant limits, the resultant MCR for the Company is USD 4,540,270 (equivalent of the absolute floor translated at the period-end exchange rate). The movement in MCR from the prior year reflects the change in EUR/USD exchange rates over the period.

### **E.3 Use of Duration Based Equity Risk Sub Model in calculation of the SCR**

There was no use of duration-based equity risk sub model in the calculation of the SCR

### **E.4 Differences between the Standard Model & Any Internal Model**

The Company used the Standard Model in determining the SCR and MCR and did not rely on any internal model.

### **E.5 Any Non-Compliance with MCR and SCR**

There are no issues with non-compliance with the MCR and SCR.

### **E.6 Any Other Material Information**

There is no other information to report.

### **E.7 Additional Voluntary Information**

There is no additional voluntary information to report.

*Note: Tables within this report contain minor rounding differences in certain instances due to amounts being displayed as whole numbers or in thousands while the source workings underlying the annual reporting templates are calculated to two decimal places. These differences are immaterial.*

## **APPENDICES**
