Quarterly Household Wealth Report

Q4 – 2025

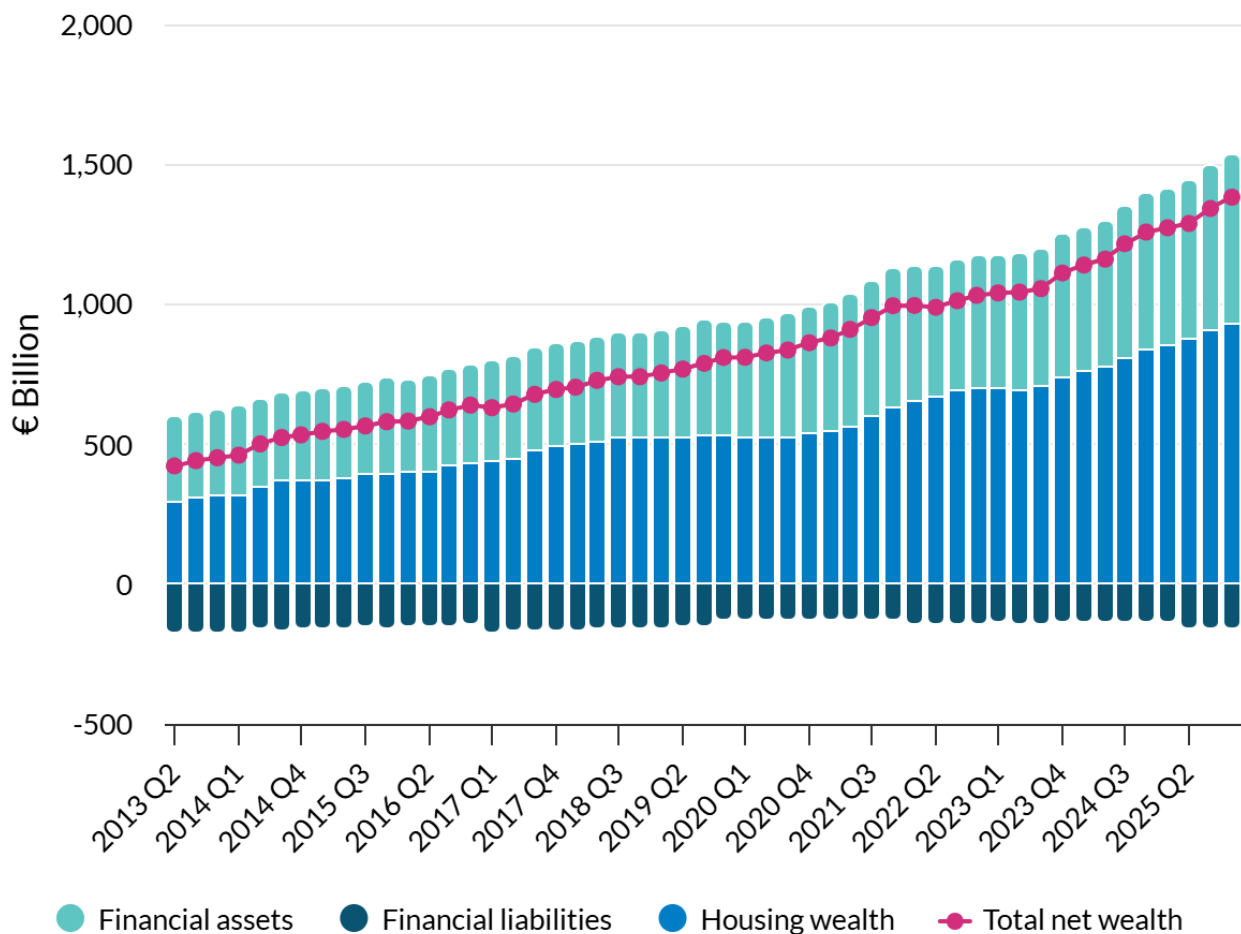

June 2026

Quarterly Household Wealth Report

Key Points – Q4 2025

- The net wealth of Irish households reached €1,382.6bn at the end of Q4 2025, increasing by €40.5bn since the previous quarter.
- Total household investment of €8.8bn over the quarter was mainly driven by investment in new housing assets.
- The total value of housing assets owned by Irish households increased by €26.4bn since the previous quarter, largely due to positive revaluations.
- As of Q4 2025, the wealthiest 10 per cent of households held 47.3 per cent of total net wealth in the country.

Chart 1: Total net wealth of Irish households

Source: QFA statistics and Central Bank estimates. Full series available through the start menu.

Total net wealth of Irish households rose by €40.5bn to stand at €1,382.6bn in Q4 2025. This represents a new series high, continuing the pattern of growth seen in recent years.

The overall increase in net wealth was driven by a rise in housing wealth, which increased by €26.4bn. Housing wealth accounts for 67.3 per cent of total net wealth and 60.4 per cent of the total assets of Irish households.

Households' financial assets stood at €609.3bn at the end of Q4 2025 and were mainly composed of currency and deposits (€220.3bn) and insurance and pension entitlements (€281.5bn).

Total liabilities, mainly consisting of long-term loans, totalled €157.2bn. This amount decreased by €0.8bn from the end of the previous quarter.

Chart 2: Quarterly investment of Irish households, by instrument

Source: QFA statistics and Central Bank estimates. Full series available through the chart menu.

Households' total investment in new housing and financial assets totalled €8.8bn in Q4 2025. Of this, investment in new housing equalled €5.0bn, which is €1.2bn higher than in the previous quarter. Financial investments were primarily in currency and deposits (€1.9bn), and in insurance and pension entitlements (€2.9bn).

In recent years, Irish households have generally displayed positive quarterly investment in housing and financial instruments.

Chart 3: Household leverage indicators

Debt-to-Assets Ratio

Debt-to-Income Ratio

Source: QFA statistics and Central Bank estimates. Full series available through the chart menu.

Total household assets increased by €39.7bn over the course of the quarter. As household loans remained mainly unchanged at €152.1bn since the end of Q3 2025, the debt-to-assets ratio of Irish households declined to 9.9 per cent.

The debt-to-income ratio of Irish households also marginally decreased to reach 84.0 per cent at the end of the quarter. Data from the [Central Statistics Office](#) (CSO) shows that household gross disposable income (on an annualised basis) equalled €181.0bn as of Q4 2025.

Chart 4: Total net wealth of Irish households, by wealth decile

Source: DWA statistics. Full series available through the chart menu.

[Distributional Wealth Accounts \(DWA\)](#) data¹ provide insights on the distribution of wealth across Irish households.

As of Q4 2025, the wealthiest 10 per cent of Irish households owned €661.3bn, or 47.3 per cent of total household net wealth in the country.

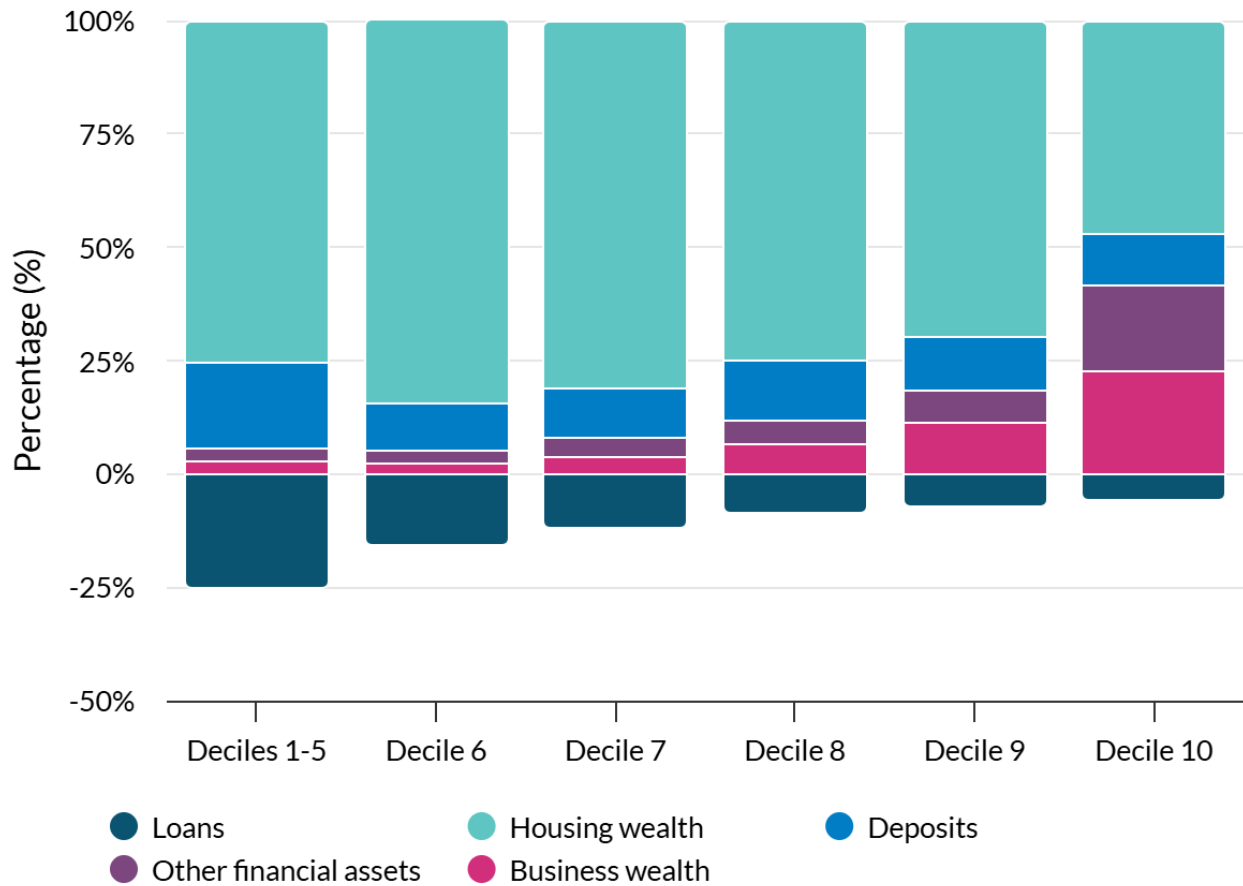

The total net wealth of households in the poorest half of the distribution increased by €4.2bn (3.9 per cent) to stand at €131.4bn, or 9.4 per cent of the national total.

As a result, the richest 10 per cent of Irish households held more than five times the amount held by households in the bottom half of the net wealth distribution altogether as of Q4 2025.

¹ Distributional wealth data is sourced from experimental Distributional Wealth Accounts (“DWA”), published by the European Central Bank. This dataset adopts a different methodology than Quarterly Financial Accounts so far used in this report. Information on how the two data sources compare, and further details on the DWA’s compilation are available on the dedicated Data Portal [webpage](#).

Households in the “middle” part of the distribution (i.e., those in deciles 6 to 9) owned €606.6bn overall, or 43.3 per cent of total net wealth in the country at quarter-end.

Chart 5: Balance sheet composition of Irish households, by wealth decile

Source: DWA statistics. Full series available through the chart menu.

The balance sheet composition of Irish households differs significantly between the wealthier and poorer.

Overall, as of Q4 2025, households in the top net wealth decile displayed a more diversified portfolio composition. Other financial assets (i.e., debt securities, listed shares, investment fund shares, and life insurance and annuity entitlements) featured prominently, accounting for 18.8 per cent of total assets. Wealthier households also displayed lower leverage (5.7 per cent), when compared to households in the bottom half of the wealth distribution.

Conversely, poorer households held the largest part of their financial wealth in deposits (19.1 per cent of their total assets) and were significantly more leveraged (25.1 per cent).

For all household groups, housing assets represent the main component of their wealth.

Since the beginning of the series, the balance sheet composition of households in each wealth decile has remained generally stable over time.

Chart 6: Gini coefficient of wealth inequality

Source: DWA statistics. Full series available through the chart menu.

As of Q4 2025, the Irish Gini coefficient (a widely used measurement of wealth inequality) was 63.4.

This remained well below the value of the same index for the euro area as a whole (72.4) and of most other European countries, as it has been for the past years. Moreover, since the beginning of the series, the Gini coefficient for Ireland decreased significantly (-13.8 points), indicating a notable reduction in the level of wealth inequality in the country.

The sustained de-leveraging process of poorer households and the rise in value of housing assets over the years – which mainly benefited households for whom this asset represents a

larger component of their total wealth (i.e., mid-lower deciles) – drove the increase in the share of total net wealth held by the poorest half of households. As a result, net wealth inequality in Ireland significantly decreased since the beginning of the series.

Further information

This release complements Irish Quarterly Financial Accounts (QFA) data for the household sector with estimates for Irish households' holdings of housing assets.

Full QFA data series for Ireland 2002 Q1 to present and other information are available from the Central Bank website: <https://www.centralbank.ie/statistics/data-and-analysis/financial-accounts>

Distributional Wealth Accounts (DWA) are experimental statistics produced by the European System of Central Banks (ESCB). They complement macroeconomic sector accounts with distributional information for the household sector. Full DWA series are available from the ECB website: <https://data.ecb.europa.eu/data/datasets/DWA>

For details on disposable income see the Central Statistical Office (CSO) releases on Institutional Sector Accounts Non-Financial Assets, available from the CSO website: <https://www.cso.ie>
